

Free PDF 2026 CCDAK: Confluent Certified Developer for Apache Kafka Certification Examination Latest Test Free

P.S. Free 2026 Confluent CCDAK dumps are available on Google Drive shared by LatestCram: <https://drive.google.com/open?id=1FMSXbdBPRzwCKGr-WNi6e4WxJ9aoGz7g>

The superiority of our CCDAK practice materials is undeniable. We are superior in both content and a series of considerate services. We made the practice materials for conscience's sake to offer help. Our CCDAK actual exam withstands the experiment of the market also. With the help from our CCDAK training engine, passing the exam will not be a fiddly thing anymore. So this is your high time to flex your muscles this time.

The CCDAK certification exam is meant for developers, architects, and engineers who have experience with Kafka development, and are looking to validate their expertise in the field. CCDAK exam provides a recognized validation of Kafka proficiency, which is valuable for both individuals and organizations. For individuals, the certification can help to enhance their career prospects and demonstrate their expertise to potential employers. For organizations, the certification can help to identify skilled Kafka developers and ensure that they have the necessary expertise to meet business needs.

By becoming certified, developers can demonstrate their proficiency in Apache Kafka and differentiate themselves from their peers. Confluent Certified Developer for Apache Kafka Certification Examination certification showcases the candidate's knowledge and validates their ability to design and develop high-quality streaming applications using Kafka. Furthermore, it helps organizations to identify individuals with the necessary skills and expertise to design and build data streaming applications, which is essential for addressing business problems in real-time.

Confluent Certified Developer for Apache Kafka (CCDAK) Certification Examination is a globally recognized certification for Kafka developers. CCDAK Exam is designed to test developers' knowledge and skills in building applications using Apache Kafka. Confluent Certified Developer for Apache Kafka Certification Examination certification provides Kafka developers with a competitive edge in the job market and demonstrates their expertise in building and managing Kafka clusters.

New CCDAK Exam Test, CCDAK Upgrade Dumps

Our Confluent CCDAK practice exam simulator mirrors the CCDAK exam experience, so you know what to anticipate on Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) certification exam day. Our Confluent Certified Developer for Apache Kafka Certification Examination practice test LatestCram features various question styles and levels,

so you can customize your Confluent CCDAK Exam Questions preparation to meet your needs.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q53-Q58):

NEW QUESTION # 53

Which statements are correct about ksqlDB SQL? (Choose 3.)

- A. Primary key indexing is supported.
- B. It supports windowed joins.
- C. It is ANSI compliant.
- D. Queries can run continuously.
- E. It can do joins.

Answer: B,D,E

NEW QUESTION # 54

Which actions will trigger partition rebalance for a consumer group? (select three)

- A. A consumer in a consumer group shuts down
- B. Add a new consumer to consumer group
- C. Increase partitions of a topic
- D. Add a broker to the cluster
- E. Remove a broker from the cluster

Answer: A,B,C

Explanation:

Rebalance occurs when a new consumer is added, removed or consumer dies or partitions increased.

NEW QUESTION # 55

Your Kafka cluster has five brokers. The topic t1 on the cluster has:

* Two partitions

* Replication factor = 4

* `min.insync.replicas = 3` You need strong durability guarantees for messages written to topic t1. You configure a producer `acks=all` and all the replicas for t1 are in-sync. How many brokers need to acknowledge a message before it is considered committed?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

With `acks=all`, the leader waits for `min.insync.replicas` to acknowledge the message. Since `min.insync.replicas=3`, Kafka will only commit the message once 3 brokers (leader + 2 followers) confirm they have the message.

From Kafka Documentation > Acks and Durability:

"If `acks=all` is specified, the producer will wait until the full set of in-sync replicas has acknowledged the record. The minimum number of in-sync replicas is controlled by `min.insync.replicas`." Even though the replication factor is 4, only 3 acknowledgments are needed, as defined by `min.insync.replicas`.

Reference: Apache Kafka Producer Configs > `acks`, `min.insync.replicas`

NEW QUESTION # 56

If I want to have an extremely high confidence that leaders and replicas have my data, I should use

- A. acks=all, replication factor=2, min.insync.replicas=1
- B. acks=all, replication factor=3, min.insync.replicas=1
- C. acks=all, replication factor=3, min.insync.replicas=2
- D. acks=1, replication factor=3, min.insync.replicas=2

Answer: C

Explanation:

acks=all means the leader will wait for all in-sync replicas to acknowledge the record. Also the min in-sync replica setting specifies the minimum number of replicas that need to be in-sync for the partition to remain available for writes.

NEW QUESTION # 57

What is the protocol used by Kafka clients to securely connect to the Confluent REST Proxy?

- A. SASL
- B. HTTPS (SSL/TLS)
- C. Kerberos
- D. HTTP

Answer: B

Explanation:

TLS - but it is still called SSL.

NEW QUESTION # 58

.....

We give priority to the relationship between us and users of the CCDAK preparation materials, as a result of this we are dedicated to create a reliable and secure software system not only in payment on CCDAK training quiz the but also in their privacy. So we have the responsibility to delete your information and avoid the leakage of your information about purchasing CCDAK Study Dumps. We believe that mutual understanding is the foundation of the corporation between our customers and us.
