New CCFA-200b Exam Experience - High Pass Rate Guaranteed.

A free demo of CCFA-200b practice test questions and up to 1 year of free updates are also available at ActualTestsQuiz. So, this is the time to download valid CrowdStrike CCFA-200b exam questions and start studying. There is no room for delays in CrowdStrike Falcon Administrator (CCFA-200b) preparation exams or second thoughts when you know that you have to survive the competition and safeguard your job.

CrowdStrike Falcon Administrator Sample Questions (Q101-Q106):

NEW QUESTION # 101

While a host is Network contained, you need to allow the host to access internal network resources on specific IP addresses to perform patching and remediation. Which configuration would you choose?

- A. Configure a Containment Policy with the specific IP addresses
- B. Configure a Real Time Response policy allowlist with the specific IP addresses
- C. Configure the Host firewall to allowlist the specific IP addresses
- D. Configure a Containment Policy with the entire internal IP CIDR block

Answer: A

Explanation:

While a host is Network contained, the administrator can allow the host to access internal network resources on specific IP addresses to perform patching and remediation by configuring a Containment Policy with the specific IP addresses. This policy allows users to specify which ports, protocols and IP addresses are allowed or blocked during network containment. The other options are either incorrect or not related to network containment.

NEW QUESTION # 102

Where can you find hosts that have been offline for ten minutes or longer?

- A. Host Groups
- B. Sensor Report
- C. Sensor Coverage Dashboard
- D. Host Management

Answer: C

NEW QUESTION # 103

The alignment of a particular prevention policy to one or more host groups can be completed in which of the following locations within Falcon?

- A. Policy alignment is configured in the General Settings section under the Configuration menu
- B. Policy alignment is configured in each policy in the "Assigned Host Groups" tab
- C. Policy alignment is configured in the "Host Management" section in the Hosts application
- D. Policy alignment is configured only once during the initial creation of the policy in the "Create New Policy" pop-up window

Answer: B

Explanation:

The alignment of a particular prevention policy to one or more host groups can be completed in each policy in the "Assigned Host Groups" tab. This tab allows the administrator to select which host groups will use the policy, as well as view the number of hosts and sensors assigned to each group. The other options are either incorrect or not available.

NEW QUESTION # 104

Which statement describes what is recommended for the Default Sensor Update policy?

- A. No configuration is required. Once a Custom Sensor Update policy is created the Default Sensor Update policy is disabled
- B. Since the Default Sensor Update policy is pre-configured with recommend settings out of the box, configuration of the Default Sensor Update policy is not required
- C. The Default Sensor Update should be configured to always automatically upgrade to the latest sensor version
- D. The Default Sensor Update policy should align to an organization's overall sensor updating practice while leveraging Auto N-1 and Auto N-2 configurations where possible

Answer: D

Explanation:

The statement that describes what is recommended for the Default Sensor Update policy is that the Default Sensor Update policy should align to an organization's overall sensor updating practice while leveraging Auto N-1 and Auto N-2 configurations where possible. As explained in question 139, the Default Sensor Update policy is a "catch-all" policy that applies to any host that is not assigned to a specific Sensor Update policy. Therefore, it is recommended that the Default Sensor Update policy should align to your organization's overall sensor updating practice, such as how frequently and how quickly you want to update your sensors. It is also recommended that you leverage the Auto N-1 and Auto N-2 configurations, which allow you to automatically update your sensors to the latest or second-latest sensor version without requiring manual intervention.

NEW QUESTION # 105

What would be the most appropriate action to take if you wanted to prevent a folder from being uploaded to the cloud without disabling uploads globally?

- A. A Machine Learning exclusion
- B. A Custom IOC entry
- C. An IOA exclusion
- D. A Sensor Visibility exclusion

Answer: B

Explanation:

The most appropriate action to take if you wanted to prevent a folder from being uploaded to the cloud without disabling uploads globally is to create a Custom IOC entry. A Custom IOC (indicator of compromise) entry allows you to define custom rules for detecting or preventing malicious activity based on file hashes, file paths, IP addresses, or domains. You can use regex (regular expression) syntax to create a Custom IOC entry that matches the folder path that you want to block from being uploaded to the cloud.

NEW QUESTION # 106

.....

Will you feel nervous for your exam? If you do, you can choose us, we will help you reduce your nerves as well as increase your confidence for the exam.
