Scrum Professional Scrum Product Owner I Sample Questions (Q91-Q96):

NEW QUESTION # 91

Is it allowed to forecast the Sprint progress using burn-up charts, following Scrum?

- A. YES
- B. NO

Answer: A

NEW QUESTION # 92

Who is accountable for managing the progress of work during a Sprint?

(choose the best answer)

- A. The Developers.
- B. The Scrum Master.
- C. The most junior member of the team.
- D. The Product Owner.

Answer: A

Explanation:

The Developers are accountable for managing the progress of work during a Sprint, as they are the ones who plan, execute, and deliver the work. The Scrum Guide states that "The Developers are the people in the Scrum Team that are committed to creating any aspect of a usable Increment each Sprint."¹ The Developers are also responsible for conducting the Daily Scrum, a 15-minute event for the Developers to synchronize activities and create a plan for the next 24 hours.¹ The Developers are self-managing, which means they decide how best to accomplish their work, rather than being directed by others outside the Scrum Team.¹ Reference:

1: The Scrum Guide², page 7

2: The Scrum Guide

NEW QUESTION # 93

The Scrum Values are: commitment, courage, creativity, openness, and respect.

- A. True
- B. False

Answer: B

NEW QUESTION # 94

True or False: The value delivered by a product can only be determined by revenue.

- A. True
- B. False

Answer: B

Explanation:

The value delivered by a product can not be determined by revenue alone, because:

* Revenue is only one aspect of value, and it may not reflect the true impact or benefit of the product for the stakeholders, the users, and the society. For example, a product may generate high revenue, but also cause environmental damage, ethical issues, or customer dissatisfaction.

* Value is a subjective and relative concept, and it may vary depending on the context, the perspective, and the criteria of the evaluation. For example, a product may have different value for different segments of customers, or for different markets or regions.

* Value is dynamic and emergent, and it may change over time due to various factors, such as feedback, competition, innovation, or regulation. For example, a product may lose its value as new alternatives or solutions become available, or as customer needs or preferences evolve.

References:

* Scrum Guide 2020, page 6: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team."

* Scrum Guide 2020, page 11: "The Product Goal describes a future state of the product which can serve as a target for the Scrum Team to plan against."

* Scrum Guide 2020, page 11: "The Product Owner is accountable for effective Product Backlog management, which includes ... optimizing the value of the work the Scrum Team performs."

NEW QUESTION # 95

The Product Vision gives an overall direction to all Sprints and helps the team to stay focused.

- A. True
- B. False

Answer: A

NEW QUESTION # 96
