

Pass Guaranteed Microsoft - Efficient GH-100 - GitHub Administration Free Exam Questions

DOWNLOAD the newest Exam4Free GH-100 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=12t7mBdWEDZq9RfHQ2JAI4vJw1J7bik5k>

The smartest way of getting high passing score in GH-100 valid test is choosing latest and accurate certification learning materials. The up-to-date GH-100 exam answers will save you from wasting much time and energy in the exam preparation. The content of our GH-100 Dumps Torrent covers the key points of exam, which will improve your ability to solve the difficulties of GH-100 real questions. Just add our exam dumps to your cart to get certification.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI• CD pipelines.
Topic 2	<ul style="list-style-type: none">• Manage GitHub Actions: This section of the exam measures skills of DevOps Engineers and emphasizes managing workflows, reusable actions, and distribution strategies within the enterprise. It explains configuring organization-level policies, managing self-hosted and GitHub-hosted runners, controlling access through IP allow lists, handling encrypted secrets, and integrating third-party vaults for workflow security.
Topic 3	<ul style="list-style-type: none">• Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI• CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.
Topic 4	<ul style="list-style-type: none">• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 5	<ul style="list-style-type: none">• Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.

Latest GH-100 Braindumps Questions, Valid GH-100 Exam Voucher

Our GH-100 exam materials are the most reliable products for customers. If you need to prepare an exam, we hope that you can choose our GH-100 study guide as your top choice. In the past ten years, we have overcome many difficulties and never give up. And we have quickly grown up as the most influential company in the market. And our GH-100 preparation questions are the most popular among the candidates.

Microsoft GitHub Administration Sample Questions (Q64-Q69):

NEW QUESTION # 64

You want to ensure a secret is automatically available to only workflows in internal and private repositories in the organization. Where do you configure the required access policy?

- A. Organization secret
- B. Rulesets
- C. Actions policies
- D. Runner groups

Answer: A

Explanation:

You set the access policy on the Organization Secret itself - configuring its visibility so it's scoped automatically to only internal and private repositories.

NEW QUESTION # 65

Which of the following is a benefit of creating a new GitHub organization?

- A. Clear separation of reggs, projects, teams, billing, and organization-specific policies.
- B. Reduced administrative overhead.
- C. Simplified collaboration across all organizations.
- D. Automatic inheritance of policies from other organizations.

Answer: A

Explanation:

Creating a new organization gives you a dedicated container for your shared work, letting you isolate repositories, projects, teams, billing settings, and policy configurations on an organization-by-organization basis.

NEW QUESTION # 66

Why would a GitHub App be favored over a machine account for automation tasks?

- A. Machine accounts are easier to audit than GitHub Apps.
- B. GitHub Apps are limited to a single repository.
- C. Machine accounts are required for webhook delivery.
- D. GitHub Apps provide a higher rate limit ceiling than using a personal access token on a machine account, when they use an install token and are owned by a GitHub Enterprise Cloud licensed enterprise.

Answer: D

Explanation:

GitHub Apps authenticate with short-lived installation tokens scoped to fine-grained permissions and, when owned by a GitHub Enterprise Cloud organization, enjoy a higher rate limit (15,000 requests/hour) compared to a machine account's personal access token.

NEW QUESTION # 67

Which events from the audit log are exposed by the GraphQL API? Each answer presents a complete solution. (Choose three.)

- A. pushes to repositories
- B. changes in permissions
- C. promoting users to administrators
- D. cloning of repositories
- E. changes to permissions of a GitHub App

Answer: B,C,E

Explanation:

The GraphQL Audit Log API surfaces entries whenever repository or organization permissions are changed ("Changes permissions").

It records when users are elevated to administrative roles ("Promotes users to admin").

It logs alterations to a GitHub App's granted permissions ("Changes permissions of a GitHub App").

NEW QUESTION # 68

A token was used to access an organization's resource via API. What fields in the audit log help determine who used it?

- A. The token expiration date
- B. The token's permissions and the geographic region of access
- C. The token ID, requesting IP address, and associated user
- D. The GitHub Actions runner name

Answer: C

Explanation:

The audit log records the token's identifier (the hashed_token value), the source IP address of the request, and the actor (the user or app) associated with that token, allowing you to trace exactly who used it.

NEW QUESTION # 69

.....

Microsoft GH-100 is a certification exam to test IT expertise and skills. If you find a job in the IT industry, many human resource managers in the interview will reference what Microsoft related certification you have. If you have Microsoft GH-100 Certification, apparently, it can improve your competitiveness.
