C-S4CPB-2508최신버전 시험공부, C-S4CPB-2508최신 기출문제

IT업계에 종사하는 분들은 치열한 경쟁을 많이 느낄것입니다. 치열한 경쟁속에서 자신의 위치를 보장하는 길은 더 많이 배우고 더 많이 노력하는것 뿐입니다.국제적으로 인정받은 IT인증자격증을 취득하는것이 제일 중요한 부분이 아닌가 싶기도 합니다. 다른 분이 없는 자격증을 내가 소유하고 있다는 생각만 해도 뭔가 안전감이 느껴지지 않나요? 더는 시간낭비하지 말고Itcertkr의SAP인증 C-S4CPB-2508덤프로SAP인증 C-S4CPB-2508시험에 도전해보세요.

최신 SAP Certified Associate C-S4CPB-2508 무료샘플문제 (Q32-Q37):

질문 # 32

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Requirements app
- B. SAP Cloud ALM Processes app
- C. Availability and Dependencies of Solution Processes Excel
- **D. Business Driven Configuration Questionnaire**

정답: D

설명:

The Business Driven Configuration Questionnaire is a tool that helps you collect the values that are entered into the configuration activities in SAP Central Business Configuration. It is a web-based questionnaire that guides you through the configuration settings for each solution process. You can use the questionnaire to enter the values for the configuration activities, review the values, and export them to an Excel file. You can then import the Excel file to SAP Central Business Configuration and apply the values to the configuration activities. 질문 # 33

You are recording actions for a custom process step in a test automate

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture a static label on the screen that should be checked during test execution.
- B. To capture an error message on the screen that can be used later.
- C. To capture a value in a text field that should be stored as a variable.
- D. To capture text in a message screen that can be used for data binding later.

정답: C,D

설명:

When you are recording actions for a custom process step in a test automate, you press the "Read" button on the recording panel in the following situations:

* To capture a value in a text field that should be stored as a variable. This allows you to reuse the value in other steps or test cases, or to compare it with an expected value1.

* To capture text in a message screen that can be used for data binding later. This allows you to extract data from the message screen and use it as an input for another step or test case2.

You do not press the "Read" button to capture an error message or a static label on the screen, as these are not values that need to be stored or used later. Instead, you can use the "Check" button to verify that the error message or the label is displayed as expected3. 질문 # 34

Which technologies should you use to integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution? Note: There are 2 correct answers to this question

- A. SAP Cloud Connector
- B. Predelivered APIs
- C. SAP Process Orchestration
- D. SAP Integration Suite

정답: B,D

설명:

To integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution, you should use SAP Integration Suite and predelivered APIs. SAP Integration Suite is a cloud-based integration platform that provides a comprehensive set of capabilities to connect applications, data, and processes across different environments. Predelivered APIs are predefined interfaces that enable communication and data exchange between SAP S/4HANA Cloud Public Edition and other SAP public cloud solutions, such as SAP SuccessFactors, SAP Ariba, SAP Fieldglass, and SAP Concur. SAP Process Orchestration and SAP Cloud Connector are not the correct technologies for this scenario, as they are mainly used for integrating SAP S

/4HANA Cloud Public Edition with on-premise or hybrid systems. References = SAP S/4HANA Cloud Public Edition - Integration, SAP Integration Suite, SAP S/4HANA Cloud Public Edition - API Hub

질문 # 35

How can you migrate data to SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. With a separate SAP HANA database
- B. With XML or CSV templates
- C. With Core Data Services
- D. With the zero downtime service

정답: A,B

설명:

You can migrate data to SAP S/4HANA Cloud Public Edition using the SAP S/4HANA Migration Cockpit, a tool that provides multiple methods of migrating data from legacy systems, SAP or non-SAP, to the target system1. The SAP S/4HANA Migration Cockpit supports the following migration methods2:

* With XML or CSV templates: You can use predefined templates in XML or CSV format to fill in your source data and upload them to the staging tables in the SAP S/4HANA Cloud system. The templates are based on the predefined migration objects that cover the most common business data, such as master data, transaction data, and configuration data. You can download the templates from the SAP S

/4HANA Migration Cockpit or from the SAP Best Practices Explorer.

* With a separate SAP HANA database: You can use a separate SAP HANA database as a staging area to store your source data and transfer it to the SAP S/4HANA Cloud system. You can use any tool or method to extract your source data from your legacy system and load it to the SAP HANA database.

You can also use the predefined migration objects or create your own custom objects using the migration object modeler.

* Directly from an SAP ERP system: You can connect your SAP ERP system to the SAP S/4HANA Cloud system and transfer your source data directly without using a staging area. You can use the predefined migration objects or create your own custom objects using the migration object modeler.

This method requires the installation of the SAP S/4HANA Migration Cockpit add-on in your SAP ERP system.

The other two options, with the zero downtime service and with Core Data Services, are not valid methods of migrating data to SAP S/4HANA Cloud Public Edition. The zero downtime service is a tool that enables you to upgrade your SAP S/4HANA system with minimal downtime, but it is not used for data migration³. Core Data Services (CDS) are a set of domain-specific languages and services for defining and consuming semantically rich data models, but they are not used for data migration⁴. References = Migrating Data to SAP S/4HANA Cloud, Public Edition, Migrating Data with the SAP S/4HANA Migration Cockpit, Zero Downtime Service for SAP S/4HANA, Core Data Services (CDS)

질문 # 36

In which type of extensibility is the SAP Business Technology Platform used to host a custom extension?

- A. Side-by-side extensibility
- B. Classic extensibility
- C. Developer extensibility
- D. Key user extensibility

정답: A
