

AZ-700 Valid Dumps Ppt & Free AZ-700 Pdf Guide

The AZ-700 exam is a critical step in advancing your career in Azure networking solutions. By effectively utilizing [AZ 700 Exam Dumps](#), practicing with [AZ 700 Exam Questions](#), and leveraging resources like Dumps Arena, you can increase [AZ 700 Dumps](#) your chances of success. Remember, preparation is key—stay focused, practice regularly, and approach the exam with confidence.

Our products are officially certified, and our AZ-700 exam materials are definitely the most authoritative product in the industry. In order to ensure the authority of our AZ-700 practice prep, our company has really taken many measures. We have hired the most professional experts to compile the content of the AZ-700 study braindumps, and design the displays. So our AZ-700 learning questions can stand the test of the market.

One of the main benefits of passing the Microsoft AZ-700 Exam is that it helps individuals to gain a deeper understanding of the Azure networking solutions. By passing the exam, individuals will be able to design, implement, and manage complex Azure networking solutions with ease. This will enable them to create more efficient and secure cloud infrastructure for their organizations.

100% Pass 2026 AZ-700: Designing and Implementing Microsoft Azure Networking Solutions Updated Valid Dumps Ppt

There are a lot of experts and professors in or company in the field. In order to meet the demands of all people, these excellent experts and professors from our company have been working day and night. They tried their best to design the best AZ-700 study materials from our company for all people. By our study materials, all people can prepare for their AZ-700 exam in the more efficient method. We can guarantee that our study materials will be suitable for all people and meet the demands of all people, including students, workers and housewives and so on. If you decide to buy and use the AZ-700 Study Materials from our company with dedication on and enthusiasm step and step, it will be very easy for you to pass the exam without doubt. We sincerely hope that you can achieve your dream in the near future by the AZ-700 study materials of our company.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q67-Q72):

NEW QUESTION # 67

You have the network security groups (NSGs) shown in the following table.

Name	Resource	Prefix
NSG1	Subnet1	10.10.0.0/24
NSG2	Subnet2	10.10.1.0/24

In NSG1, you create inbound rules as shown in the following table.

Priority	Port	Action
101	80	Allow
150	443	Allow
200	*	Deny

You have the Azure virtual machines shown in the following table.

Name	Subnet
VM1	Subnet1
VM2	Subnet1
VM3	Subnet2

NSG2 has only the default rules configured.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
VM3 can connect to port 8080 on VM1.	<input type="radio"/>	<input type="radio"/>
VM1 and VM2 can connect on port 9090.	<input type="radio"/>	<input type="radio"/>
VM1 can connect to VM3 on port 9090.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
VM3 can connect to port 8080 on VM1.	<input type="radio"/>	<input checked="" type="radio"/>
VM1 and VM2 can connect on port 9090.	<input type="radio"/>	<input checked="" type="radio"/>
VM1 can connect to VM3 on port 9090.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

NO, NO, YES

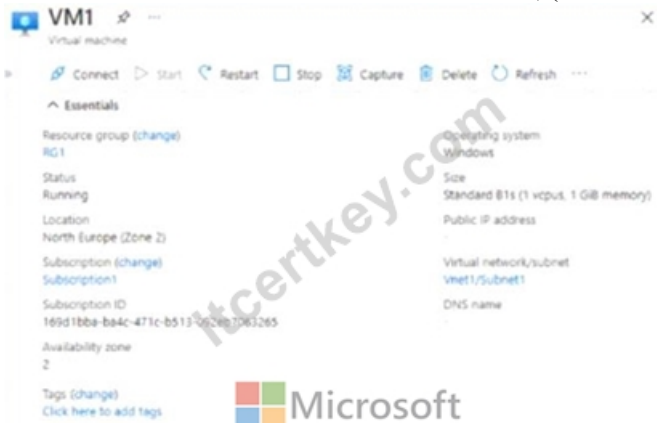

1. VM3 can connect to port 8080 on VM1 : false, UserRule_DenyVirtualNetworkInbound
2. VM1 and VM2 can connect on port 9090: false, UserRule_DenyVirtualNetworkInbound
3. VM1 can connect to VM3 on port 9090: true

NEW QUESTION # 68

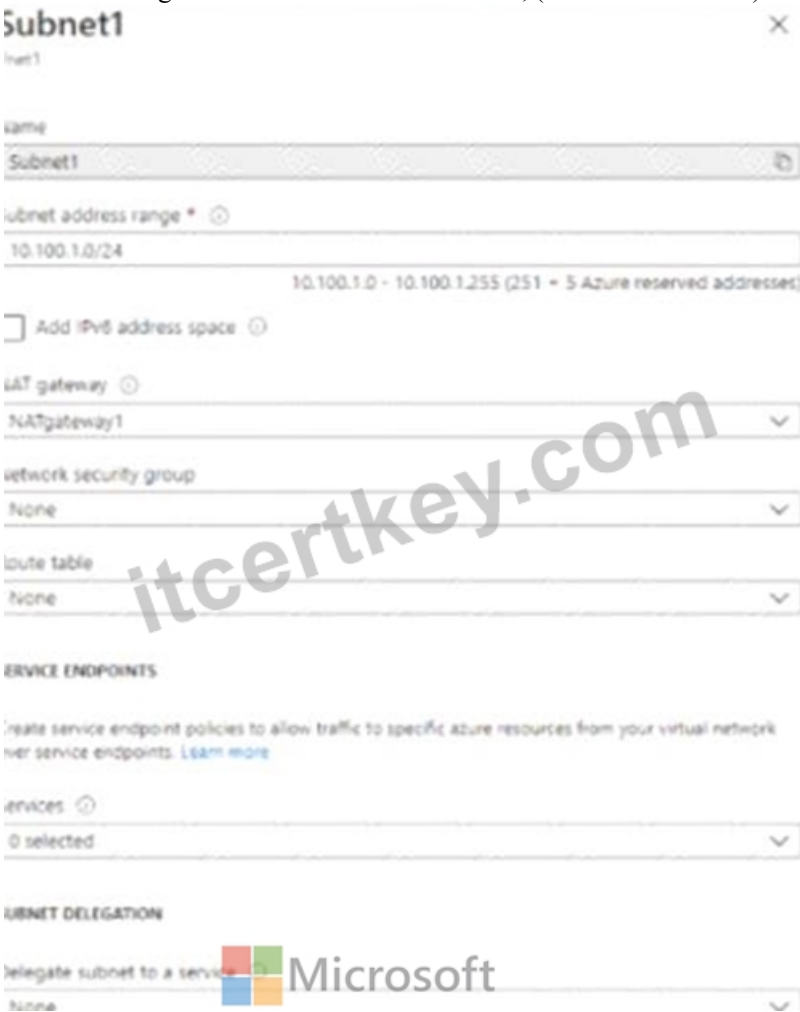

You have an Azure virtual network named Vnet1 that contains two subnets named Subnet1 and Subnet2. You have the NAT gateway shown in the NATgateway1 exhibit, (Click the NATgateway1 tab)

You have the virtual machine shown in the VM1 exhibit, (Click the VM1 tab)

Subnet1 is configured as shown in the Subnet1 exhibit, (Click the Subnet1 tab)

For each of the following statements, select Yes if the statement is true. Otherwise, select No

Statements	Yes	No
VM1 can communicate outbound by using NATgateway1.	<input type="radio"/>	<input type="radio"/>
The virtual machines in Subnet2 communicate outbound by using NATgateway1.	<input type="radio"/>	<input type="radio"/>
All the virtual machines that use NATgateway1 to connect to the internet use the same public IP address.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
VM1 can communicate outbound by using NATgateway1.	<input checked="" type="radio"/>	<input type="radio"/>
The virtual machines in Subnet2 communicate outbound by using NATgateway1.	<input checked="" type="radio"/>	<input type="radio"/>
All the virtual machines that use NATgateway1 to connect to the internet use the same public IP address.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation

Yes, Yes, No

NEW QUESTION # 69

Drag and Drop Question

Your on-premises network contains two subnets named Subnet and Subnet2. Subnet2 contains a Hyper-V host that contains two virtual machines named VM1 and VM2. VM1 and VM2 are connected to Subnet2.

You have an Azure virtual network named VNet1 that contains GatewaySubnet and a subnet named VSubnet1. VNet1 is connected to the on-premises network by using a Site-to-Site (S2S) VPN connection.

You plan to migrate VM1 to VNet1 and maintain the existing IP address of VM1. VM2 will remain on Subnet2.

You need to prepare the environment to ensure that VM1 can communicate with VM2 once the migration is complete.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Install the Hyper-V server role in the Azure virtual machine.	1 <input type="text"/>
Create external Hyper-V virtual switches.	2 <input type="text"/>
Extend the IP address space of VNet1 to include the IP address range of Subnet1.	3 <input type="text"/>
To VNet1, add a subnet named VSubnet2 that uses the same address range as Subnet1.	4 <input type="text"/>
Extend the IP address space of VNet1 to include the IP address range of Subnet2.	5 <input type="text"/>
To VNet1, add a subnet named VSubnet2 that uses the same address range as Subnet2.	
Deploy an Azure virtual machine that runs Windows Server Azure Edition and has two NICs connected to VSubnet1 and VSubnet2.	

Answer:

Explanation:

Actions	Answer Area
Extend the IP address space of VNet1 to include the IP address range of Subnet1.	1 Extend the IP address space of VNet1 to include the IP address range of Subnet2.
To VNet1, add a subnet named VSubnet2 that uses the same address range as Subnet1.	2 To VNet1, add a subnet named VSubnet2 that uses the same address range as Subnet2.
	3 Deploy an Azure virtual machine that runs Windows Server Azure Edition and has two NICs connected to VSubnet1 and VSubnet2.
	4 Install the Hyper-V server role in the Azure virtual machine.
	5 Create external Hyper-V virtual switches.

NEW QUESTION # 70

You have two Azure virtual networks named Hub1 and Spoke1. Hub1 connects to an on-premises network by using a Site-to-Site VPN connection.

You are implementing peering between Hub1 and Spoke1.

You need to ensure that a virtual machine connected to Spoke1 can connect to the on-premises network through Hub1.

How should you complete the PowerShell script? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values	Answer Area
-AllowForwardedTraffic	\$hub = Get-AZVirtualNetwork -ResourceGroup "RG1" -Name "Hub1"
-AllowGatewayTransit	\$spoke = Get-AZVirtualNetwork -ResourceGroup "RG2" -Name "Spoke1"
-UseRemoteGateways	Add-AZVirtualNetworkPeering -Name "Hub1-Spoke1" -VirtualNetwork \$hub
	-RemoteVirtualNetworkId \$spoke.id <input type="text" value="Value"/>
	Add-AZVirtualNetworkPeering -Name "Spoke1-Hub1" -VirtualNetwork \$spoke
	-RemoteVirtualNetworkId \$hub.id <input type="text" value="Value"/>

Answer:

Explanation:

Values	Answer Area
-AllowForwardedTraffic	\$hub = Get-AZVirtualNetwork -ResourceGroup "RG1" -Name "Hub1"
-AllowGatewayTransit	\$spoke = Get-AZVirtualNetwork -ResourceGroup "RG2" -Name "Spoke1"
-UseRemoteGateways	Add-AZVirtualNetworkPeering -Name "Hub1-Spoke1" -VirtualNetwork \$hub -RemoteVirtualNetworkId \$spoke.id -AllowGatewayTransit
	Add-AZVirtualNetworkPeering -Name "Spoke1-Hub1" -VirtualNetwork \$spoke -RemoteVirtualNetworkId \$hub.id -UseRemoteGateways

Reference:

<https://docs.microsoft.com/en-us/azure/architecture/reference-architectures/hybrid-networking/hub-spoke?tabs=cli#virtual-network-peering>

NEW QUESTION # 71

You have an instance of Azure Web Application Firewall (WAF) on Azure Front Door. You plan to create a WAF rule that will block high rates of requests from a single IP address. You need to query Log Analytics to identify the optimal threshold for the rule. Which table should you query in Log Analytics?

- A. AZFWThreatIntel
- **B. AzureDiagnostics**
- C. AGWFirewallLogs
- D. SecurityDetection

Answer: B

Explanation:

<https://learn.microsoft.com/en-us/azure/web-application-firewall/shared/application-ddos-protection#waf-log-analysis>

NEW QUESTION # 72

.....

In addition to the AZ-700 exam materials, our company also focuses on the preparation and production of other learning materials. If you choose our AZ-700 study guide this time, I believe you will find our products unique and powerful. Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. And if you buy our AZ-700 Study Guide, you will love it.
