NEW QUESTION # 29

A PowerProtect Data Manager was deployed. Which option is displayed on the welcome screen when the PowerProtect Data Manager UI is accessed for the first time?

- A. Change Password
- B. Configure
- C. Restore from Disaster Recovery Backup
- D. Restore Backup

Answer: B,C

Explanation:

After the PowerProtect Data Manager OVA is deployed and the virtual machine is powered on, the administrator accesses the UI via a web browser using the assigned IP address or FQDN.

Upon this first access, the system has not yet been initialized. Therefore, the UI presents a Welcome Screen that offers two distinct paths for the administrator:

Configure (Option A): This is the "New Install" path. Selecting this option launches the configuration wizard where the administrator sets the system name, NTP, DNS, passwords, and other foundational settings.

Restore from Disaster Recovery Backup (Option B): This path is used if the administrator is recovering a previous PPDM environment. It allows the user to point the new appliance to an existing metadata backup (stored on a PowerProtect DD) to restore the full configuration and protection history of a failed instance.

NEW QUESTION # 30
