Latest CompTIA XK0-006 Questions in Three Different Formats

Since our company's establishment, we have devoted mass manpower, materials and financial resources into XK0-006 exam

materials and until now, we have a bold idea that we will definitely introduce our XK0-006 study materials to the whole world and make all people that seek fortune and better opportunities have access to realize their life value. Our XK0-006 Practice Questions, therefore, is bound to help you pass though the XK0-006 exam and win a better future.

CompTIA Linux+ Certification Exam Sample Questions (Q89-Q94):

NEW QUESTION # 89
A Linux server is not starting up because files in the /boot/partition are corrupt. After the initial GRUB screen, the following message is displayed:
Probing EDD (edd=off to disable)... ok
uncompression error
--system halted
Which of the following steps should the Linux administrator take to recover the system without destroying the existing installation?
(Choose two.)

- A. Reinstall the kernel packages.
- B. Start up the system using rescue boot media.
- C. Start up in single-user mode.
- D. Reinstall the OS.
- E. Replace the hard drive.
- F. Increase the amount of swap memory.

Answer: A,B

Explanation:
Using rescue boot media lets you boot the machine, mount the existing partitions, and access the corrupted /boot files without reinstalling the OS.
Reinstalling the kernel packages restores the missing or corrupt files in /boot (e.g., vmlinuz and initramfs), allowing GRUB to load and uncompress the kernel properly.

NEW QUESTION # 90
Users cannot access a server after it has been restarted. At the server console, the administrator runs the following commands:
Which of the following is the cause of the issue?

- A. The server load average is too high.
- B. The DNS entry does not have a valid IP address.
- C. The SSH service has not been allowed on the firewall.
- D. The wrong protocol is being used to connect to the web server.

Answer: C

Explanation:
The server is running and responding to pings, and DNS resolves correctly (dig server1 →
192.168.0.2). The ss -lnt output shows SSH (port 22) is listening, but the firewall (firewall-cmd -- list-all) does not list SSH among the allowed services. Therefore, external users cannot connect because the firewall is blocking SSH.

NEW QUESTION # 91
A Linux administrator is updating the group membership by executing the following commands:
However, the group membership is not changing. Which of the following explains this issue?

- A. Users cannot be added to the wheelgroup with the usermodcommand.
- B. The options wheeland adminare transposed.
- C. The command groupswas run with sudoprivileges.
- D. Executing usermodwith sudois not permitted.

Answer: C

Explanation:
Running groups with sudo shows the groups for the root user, not for the admin user. That's why the output only shows root.

Without sudo, groups admin (or re-login) would correctly show the updated group membership, including wheel.

NEW QUESTION # 92

Users report that a Linux system is unresponsive and simple commands take too long to complete. The Linux administrator logs in to the system and sees the following:

Which of the following is the system experiencing?

- **A. High CPU load**
- B. High uptime
- C. High I/O wait times
- D. High latency

Answer: A

Explanation:

The load averages (8.71, 8.24, 7.71) are well above the number of CPUs (4), showing CPU saturation. Additionally, Output 2 indicates very high CPU usage (65.88% usr, 20.54% sys) with
0% idle, confirming the system is under heavy CPU load, which explains the unresponsiveness.

NEW QUESTION # 93

A user on a Linux VM is running /work/test.shBash script and receives the following error:
bash: /work/test.sh: Permission denied
After further investigation, the user receives the following outputs:

Which of the following commands should a systems administrator run to fix the issue?

- A. mount -o remount,suid /work
- **B. mount -o remount,exec /work**
- C. chmod g+x /work/test.sh
- D. chmod o+x /work/test.sh

Answer: B

Explanation:

The script /work/test.sh already has execute permissions (-rwxr--r--), but the filesystem is mounted with the noexec option, which prevents execution of binaries and scripts. Remounting the filesystem with the exec option allows execution of the script.

NEW QUESTION # 94

......

Firstly, we can give you 100% pass rate guarantee on the XK0-006 exam. Our XK0-006 practice quiz is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. Secondly, during the period of using XK0-006 learning guide, we also provide you with 24 hours of free online services, which help to solve any problem for you on the XK0-006 exam questions at any time and sometimes mean a lot to our customers.

XK0-006 Test Assessment: https://www.dumpkiller.com/XK0-006_braindumps.html

Our XK0-006 dumps torrent files enjoy a high pass rate of 98% to 99%, which is beyond imagination for the majority of exam files, If you visit our website Dumpkiller, then you will find that our CompTIA XK0-006 practice questions are written in three different versions: PDF version, Soft version and APP version, CompTIA Valid XK0-006 Exam Dumps Do you feel the difficulty of it?

Answer questions directly, But just how much will it take, and how will you pay for it, Our XK0-006 dumps torrent files enjoy a high pass rate of 98% to 99%, which is beyond imagination for the majority of exam files.
