

Professional-Data-Engineer Braindumps Valid Questions Pool Only at TestValid

P.S. Free & New Professional-Data-Engineer dumps are available on Google Drive shared by TestValid:
<https://drive.google.com/open?id=1Ybfx8L5-IUbngRZX6nJbZmRq5vazGn3>

TestValid can satisfy the fundamental demands of candidates with concise layout and illegible outline of our Professional-Data-Engineer exam questions. We have three versions of Professional-Data-Engineer study materials: the PDF, the Software and APP online and they are made for different habits and preference of you, Our PDF version of Professional-Data-Engineer Practice Engine is suitable for reading and printing requests. And i love this version most also because that it is easy to take with and convenient to make notes on it.

Career Path

Completing the exam associated with the Google Professional Data Engineer certification provides you with a great validation of your skills in designing, building, operationalizing, securing, and monitoring data processing systems. The job roles that you can take up after getting certified include a Google Cloud Data Engineer, an Operations Engineer, a Cloud Infrastructure Engineer, a DevOps Infrastructure Engineer, a Cloud Database Engineer, a Google Cloud IAM Engineer, a DataOps Engineer, a Big Data Engineer, a Google Cloud Platform Data Architect, and more. The average salary that you can expect to earn with this certificate is around \$125,550 per year. However, the real remuneration will depend on a specific job title, location of an individual, and his/her working experience.

Professional-Data-Engineer Reliable Test Book - Professional-Data-Engineer Test Simulator

Are you still feeling distressed for expensive learning materials? Are you still struggling with complicated and difficult explanations in textbooks? Do you still hesitate in numerous tutorial materials? Professional-Data-Engineer study guide can help you to solve all these questions. Professional-Data-Engineer certification training is compiled by many experts over many years according to the examination outline of the calendar year and industry trends. With Professional-Data-Engineer Study Guide, you only need to spend 20 to 30 hours practicing to take the exam. In addition, Professional-Data-Engineer certification training has a dedicated expert who updates all data content on a daily basis and sends the updated content to the customer at the first time. Therefore, using Professional-Data-Engineer guide torrent, you don't need to worry about missing any exam focus.

Google Certified Professional Data Engineer Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24

You want to use Google Stackdriver Logging to monitor Google BigQuery usage. You need an instant notification to be sent to your monitoring tool when new data is appended to a certain table using an insert job, but you do not want to receive notifications for other tables. What should you do?

- A. Using the Stackdriver API, create a project sink with advanced log filter to export to Pub/Sub, and subscribe to the topic from your monitoring tool.
- B. In the Stackdriver logging admin interface, enable a log sink export to Google Cloud Pub/Sub, and subscribe to the topic from your monitoring tool.
- C. Make a call to the Stackdriver API to list all logs, and apply an advanced filter.
- D. In the Stackdriver logging admin interface, and enable a log sink export to BigQuery.

Answer: A

Explanation:

A and B are wrong since don't notify anything to the monitoring tool.

C has no filter on what will be notified. We want only some tables.

NEW QUESTION # 25

You are deploying a new storage system for your mobile application, which is a media streaming service. You decide the best fit is Google Cloud Datastore. You have entities with multiple properties, some of which can take on multiple values. For example, in the entity 'Movie' the property 'actors' and the property 'tags' have multiple values but the property 'date released' does not. A typical query would ask for all movies with actor=<actormame> ordered by date_released or all movies with tag=Comedy ordered by date_released. How should you avoid a combinatorial explosion in the number of indexes?

- A. Option A
- B. Option D
- C. Option C
- D. Option B.

Answer: A

NEW QUESTION # 26

You need to set access to BigQuery for different departments within your company. Your solution should comply with the following requirements:

* Each department should have access only to their data.

* Each department will have one or more leads who need to be able to create and update tables and provide them to their team

* Each department has data analysts who need to be able to query but not modify data.

How should you set access to the data in BigQuery?

- A. Create a table for each department. Assign the department leads the role of Editor, and assign the data analysts the role of Viewer on the project the table is in.
- B. Create a table for each department. Assign the department leads the role of Owner, and assign the data analysts the role of Editor on the project the table is in.
- C. Create a dataset for each department. Assign the department leads the role of WRITER, and assign the data analysts the role of READER on their dataset.
- D. Create a dataset for each department. Assign the department leads the role of OWNER, and assign the data analysts the role of WRITER on their dataset.

Answer: A

NEW QUESTION # 27

When running a pipeline that has a BigQuery source, on your local machine, you continue to get permission denied errors. What could be the reason for that?

- A. BigQuery cannot be accessed from local machines
- B. Pipelines cannot be run locally
- C. You are missing gcloud on your machine
- D. Your gcloud does not have access to the BigQuery resources

Answer: D

Explanation:

When reading from a Dataflow source or writing to a Dataflow sink using DirectPipelineRunner, the Cloud Platform account that you configured with the gcloud executable will need access to the corresponding source/sink Reference:

<https://cloud.google.com/dataflow/java-sdk/JavaDoc/com/google/cloud/dataflow/sdk/runners/DirectPipelineRun>

NEW QUESTION # 28

You want to use a database of information about tissue samples to classify future tissue samples as either normal or mutated. You are evaluating an unsupervised anomaly detection method for classifying the tissue samples. Which two characteristic support this method? (Choose two.)

- A. You already have labels for which samples are mutated and which are normal in the database.
- B. There are very few occurrences of mutations relative to normal samples.
- C. You expect future mutations to have similar features to the mutated samples in the database.
- D. There are roughly equal occurrences of both normal and mutated samples in the database.
- E. You expect future mutations to have different features from the mutated samples in the database.

Answer: B,C

Explanation:

Unsupervised anomaly detection techniques detect anomalies in an unlabeled test data set under the assumption that the majority of the instances in the data set are normal by looking for instances that seem to fit least to the remainder of the data set.

https://en.wikipedia.org/wiki/Anomaly_detection

NEW QUESTION # 29

.....

To be successful in your social life and own a high social status you must own good abilities in some area and plenty of knowledge. Passing the test Professional-Data-Engineer exam can make you achieve those goals and prove that you are competent. Buying our Professional-Data-Engineer practice test can help you pass the Professional-Data-Engineer Exam fluently and the learning costs you little time and energy. The questions and answers of our Professional-Data-Engineer test question are chosen elaborately and to simplify the important information to make your learning relaxing and efficient.
