The OGEA-101 certification verifies that you are a skilled professional. PracticeDump product is designed by keeping all the rules and regulations in focus that The Open Group publishes. Our main goal is that you can memorize the actual The Open Group OGEA-101 exam question to complete the TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) test in time with extraordinary grades. The Open Group OGEA-101 Exam Dumps includes The Open Group OGEA-101 dumps PDF format, desktop OGEA-101 practice exam software, and web-based OGEA-101 practice test software.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.
Topic 2	<ul style="list-style-type: none">• Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.

Topic 3	<ul style="list-style-type: none"> Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.
Topic 4	<ul style="list-style-type: none"> Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 Exam.
Topic 5	<ul style="list-style-type: none"> Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.
Topic 6	<ul style="list-style-type: none"> Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
Topic 7	<ul style="list-style-type: none"> Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.

Pass Guaranteed 2026 Authoritative The Open Group OGEA-101: Valid TOGAF Enterprise Architecture Part 1 Exam Test Prep

Our TOGAF Enterprise Architecture Part 1 Exam guide torrent is equipped with time-keeping and simulation test functions, it's of great use to set up a time keeper to help adjust the speed and stay alert to improve efficiency. Our expert team has designed a high efficient training process that you only need 20-30 hours to prepare the exam with our OGEA-101 Certification Training. With an overall 20-30 hours' training plan, you can also make a small to-do list to remind yourself of how much time you plan to spend in a day with OGEA-101 test torrent.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q51-Q56):

NEW QUESTION # 51

Consider the following ADM phases objectives.

□ Which phase does each objective match?

- A. 1H-2F-3F-4G
- B. 1F-2G-3H-4H
- C. 1G-2H-3H-4F
- D. 1F-2G-3G-4H

Answer: A

Explanation:

According to the TOGAF Standard, Version 9.2, the ADM phases and their objectives are as follows:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between

them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

Requirements Management: To manage the architecture requirements throughout the ADM cycle, and to ensure alignment with the business requirements.

Based on the above definitions, we can match each objective with the corresponding phase as follows:

Objective 1: Ensure that the business value and cost of work packages and transition architectures is understood by key stakeholders. This objective is achieved in Phase H: Architecture Change Management, where the value realization and cost-benefit analysis of the architecture are performed².

Objective 2: Ensure conformance with the Target Architecture by implementation projects. This objective is achieved in Phase F: Migration Planning, where the conformance requirements and criteria for the implementation projects are defined³.

Objective 3: Ensure that the architecture development cycle is maintained. This objective is achieved in Phase F: Migration Planning, where the architecture roadmap and iteration cycle are maintained³.

Objective 4: Ensure that the Architecture Governance Framework is executed. This objective is achieved in Phase G: Implementation Governance, where the architecture governance processes and procedures are applied to the implementation projects⁴.

1: The TOGAF Standard, Version 9.2, Chapter 5: Architecture Development Method (ADM)

2: The TOGAF Standard, Version 9.2, Chapter 21: Architecture Change Management

3: The TOGAF Standard, Version 9.2, Chapter 20: Migration Planning

4: The TOGAF Standard, Version 9.2, Chapter 19: Implementation Governance

NEW QUESTION # 52

Consider the following ADM phases objectives:

- * Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
- * Ensure conformance with the Target Architecture by implementation projects
- * Ensure that the architecture development cycle is maintained
- * Ensure that the Architecture Governance Framework is executed

Which phase does each objective match?

- A. 1F - 2G - 3H - 4H
- B. 1F - 2G - 3G - 4H
- C. 1G - 2H - 3H - 4F
- D. 1H - 2F - 3F - 4G

Answer: A

Explanation:

Comprehensive and Detailed Explanation

* Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders

* This is the objective of Phase F: Migration Planning, where the Implementation and Migration Plan is developed, addressing costs, business value, and stakeholder concerns.

* Ensure conformance with the Target Architecture by implementation projects

* This is the focus of Phase G: Implementation Governance, which oversees implementation projects, ensuring they align with and conform to the Target Architecture through architecture contracts.

* Ensure that the architecture development cycle is maintained

* This belongs to Phase H: Architecture Change Management, which ensures the architecture remains relevant, and that the ADM cycle continues in response to new requirements and changes.

* Ensure that the Architecture Governance Framework is executed

* Also part of Phase H: Architecture Change Management, where governance is continuously applied to manage change effectively.

Correct Mapping

1 # F

2 # G

3 # H

4 # H

Which corresponds to Option A (1F - 2G - 3H - 4H).

Why the other options are incorrect

* B. (1H - 2F - 3F - 4G): Incorrect assignment of phases; for example, conformance is not part of Phase F.

* C. (1G - 2H - 3H - 4F): Misplaces objectives; conformance is not Phase H, and governance execution is not Phase F.

* D. (1F - 2G - 3G - 4H): Incorrect because maintaining the ADM cycle (3) is not Phase G, but Phase H.

NEW QUESTION # 53

Consider the following statement.

According to the TOGAF standard, a governed approach of a particular deliverable will ensure adherence to the principles, standards, and requirements of the existing or developing architectures.

Which deliverable does this refer to?

- A. The Architecture Vision
- B. The Statement of Architecture Work
- C. The Architecture Definition Document
- **D. An Architecture Contract**

Answer: D

Explanation:

According to the TOGAF Standard, 10th Edition, an architecture contract is "a formal agreement between a service provider and a service consumer that defines the mutual commitments and expectations for the delivery of an architecture" 1. An architecture contract is a governed approach of a particular deliverable that will ensure adherence to the principles, standards, and requirements of the existing or developing architectures, as it specifies the roles, responsibilities, deliverables, quality criteria, and acceptance criteria for the architecture work 1. The other options are not correct, as they are not governed approaches of a particular deliverable, but rather different types of deliverables within the architecture development process. An architecture vision is "a high-level, aspirational view of the target architecture" 1. A statement of architecture work is "a document that defines the scope and approach that will be used to complete an architecture project" 1. An architecture definition document is "a document that describes the baseline and target architectures for one or more domains" 1. Reference: 1: TOGAF Standard, 10th Edition, Part I: Introduction, Chapter 3: Definitions.

NEW QUESTION # 54

Which of the following are interests important to the stakeholders in a system?

- A. Requirements
- B. Principles
- C. Architecture views
- **D. Concerns**

Answer: D

Explanation:

Concerns are interests important to the stakeholders in a system. They are used to identify and classify the system's stakeholders and to guide the selection of viewpoints for the architecture description. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.1 Architecture Viewpoints

NEW QUESTION # 55

Which section of the TOGAF template for Architecture Principles should highlight the business benefits of adhering to the principle?

- A. Name
- **B. Rationale**
- C. Implications
