Every practice exam or virtual exam of the NCLEX-RN study materials is important for you. It is a good chance to test your current revision conditions. So it is essential to summarize each exercise to help you adjust your review plan. Now, we have added a new function to our online test engine and windows software of the NCLEX-RN Real Exam, which can automatically generate a report according to your exercises of the NCLEX-RN exam questions.

Passing the NCLEX-RN exam is a critical step towards becoming a licensed registered nurse. In addition to passing the exam, nurses must also meet other requirements for licensure, such as completing a nursing program and passing a criminal background check. Once licensed, nurses must also fulfill continuing education requirements to maintain their license and stay up-to-date on the latest developments in nursing practice.

NCLEX-RN exam is computer-adaptive, which means that the difficulty of the questions is determined by the student's responses. NCLEX-RN Exam adapts to the student's skill level, with questions becoming more difficult as the student answers correctly, and easier if the student answers incorrectly. This format ensures that each student receives a unique exam tailored to their individual abilities.

High Pass Rate NCLEX NCLEX-RN Test Dumps Cram is the best for you - PassCollection

Our website has focused on the study of NCLEX-RN vce braindumps for many years and created latest NCLEX-RN dumps pdf for all level of candidates. All questions and answers are tested and approved by our IT professionals who are specialized in the NCLEX-RN Pass Guide. You can completely trust the accuracy of our NCLEX-RN exam questions because we will full refund if you failed exam with our training materials.

NCLEX-RN exam is computerized and adaptive, meaning that the difficulty of the questions is adjusted based on the candidate's performance. NCLEX-RN exam is designed to measure the candidate's ability to apply knowledge, skills, and judgment in a variety of clinical situations. NCLEX-RN Exam is divided into four categories: safe and effective care environment, health promotion and maintenance, psychosocial integrity, and physiological integrity.

NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q191-Q196):

NEW QUESTION # 191

A nasogastric (NG) tube inserted preoperatively is attached to low, intermittent suctions. A client with an NG tube exhibits these symptoms: He is restless; serum electrolytes are Na 138, K 4.0, blood pH 7.53. This client is most likely experiencing:

- A. Metabolic alkalosis
- B. Metabolic acidosis
- C. Hyperkalemia
- D. Hyponatremia

Answer: A

Explanation:

(A) Sodium level is within normal limits. (B) Sodium level is within normal limits. (C) pH level is consistent with alkalosis. (D) With an NG tube attached to low, intermittent suction, acids are removed and a client will develop metabolic alkalosis.

NEW QUESTION # 192

A 3-year-old child is hospitalized with burns covering her trunk and lower extremities. Which of the following would the nurse use to assess adequacy of fluid resuscitation in the burned child?

- A. Pulse rate
- B. Serum potassium level
- C. Blood pressure
- D. Urine output

Answer: D

Explanation:

Explanation

(A) Blood pressure can remain normotensive even in a state of hypovolemia. (B) Serum potassium is not reliable for determining adequacy of fluid resuscitation. (C) Urine output, alteration in sensorium, and capillary refill are the most reliable indicators for assessing adequacy of fluid resuscitation. (D) Pulse rate may vary for many reasons and is not a reliable indicator for assessing adequacy of fluid resuscitation.

NEW QUESTION # 193

A client is being treated for congestive heart failure. His medical regimen consists of digoxin (Lanoxin) 0.25 mg po daily and furosemide 20 mg po bid. Which laboratory test should the nurse monitor?

- A. Intake and output
- B. Calcium
- C. Magnesium
- D. Potassium

Answer: D

Explanation:

Explanation/Reference:

Explanation:

(A) Intake and output are not laboratory tests. (B) Serum calcium levels are not affected by digoxin or furosemide. (C) Furosemide is a non-potassium-sparing loop diuretic. Hypokalemia is a common side effect of furosemide and may enhance digoxin toxicity. (D) Serum magnesium levels are not affected by digoxin or furosemide.

NEW QUESTION # 194

A 23-year-old borderline client is admitted to an inpatient psychiatric unit following an impulsive act of self-mutilation. A few hours after admission, she requests special privileges, and when these are not granted, she stands up and angrily shouts that the people on the unit do not care, and she storms across the room.

The nurse should respond to this behavior by:

- A. Communicating a desire to assist the client to regain control, offering a one-to-one session in a quiet area
- B. Placing her in seclusion until the behavior is under control
- C. Confronting the client, letting her know the consequences for getting angry and disrupting the unit
- D. Walking up to the client and touching her on the arm to get her attention

Answer: A

Explanation:

Explanation/Reference:

Explanation:

(A) Threatening a client with punitive action is violating a client's rights and could escalate the client's anger. (B) Angry clients need respect for personal space, and physical contact may be perceived as a threatening gesture escalating anger. (C) Client lacks sufficient self-control to limit own maladaptive behavior; she may need assistance from staff. (D) Confronting an angry client may escalate her anger to further acting out, and consequences are for acting out anger aggressively, not for getting angry or feeling angry.

NEW QUESTION # 195

In discussing the plan of care for a child with chronic nephrosis with the mother, the nurse identifies that the purpose of weighing the child is to:

- A. Measure adequacy of nutritional management
- B. Impress the child with the importance of eating well
- C. Determine changes in the amount of edema
- D. Check the accuracy of the fluid intake record

Answer: C

Explanation:

Explanation

(A) Weighing a child with nephrosis is to assess for edema, not nutrition. (B, C) This is not the purpose for weighing the child. (D) Weight and measurement are the primary ways of evaluating edema and fluid shifts.

NEW QUESTION # 196
