

DEP-2025 Training Questions & DEP-2025 Relevant Answers

What level of expertise do you expect from this training?

☐ A Beginner

☐ B Intermediate

☐ C Advanced

P.S. Free & New DEP-2025 dumps are available on Google Drive shared by Actual4Labs: <https://drive.google.com/open?id=16PXXK8I4X5Lc1mtPNhYD8bY11Bjb2Ij3D>

We are here divide grieves with you to help you pass your DEP-2025 exam with ease. You can abandon the time-consuming thought from now on. You won't regret your decision of choosing our DEP-2025 study guide. In contrast, they will inspire your potential without obscure content to feel. After getting our DEP-2025 Exam Prep, you will not live under great stress during the DEP-2025 exam period. You will experience a pleasant and leisure study method with boomed success!

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 2	<ul style="list-style-type: none">• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 3	<ul style="list-style-type: none">• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 4	<ul style="list-style-type: none">• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 5	<ul style="list-style-type: none">• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 6	<ul style="list-style-type: none">• Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.
Topic 7	<ul style="list-style-type: none">• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.

Topic 8	<ul style="list-style-type: none"> • Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 9	<ul style="list-style-type: none"> • Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Topic 10	<ul style="list-style-type: none"> • Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 11	<ul style="list-style-type: none"> • Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 12	<ul style="list-style-type: none"> • Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 13	<ul style="list-style-type: none"> • Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.

Free PDF Quiz 2026 Apple DEP-2025: Unparalleled Apple Deployment and Management Exam Training Questions

The DEP-2025 PDF Questions of Actual4Labs are authentic and real. These Apple Deployment and Management Exam (DEP-2025) exam questions help applicants prepare well prior to entering the actual Apple Deployment and Management Exam (DEP-2025) exam center. Due to our actual DEP-2025 Exam Dumps, our valued customers always pass their Apple DEP-2025 exam on the very first try hence, saving their precious time and money too.

Apple Deployment and Management Exam Sample Questions (Q238-Q243):

NEW QUESTION # 238

What happens when a user doesn't install a managed software update after the deadline passed on Mac?

- A. The update automatically installs without user intervention if the deadline is missed.
- B. Users receive notifications that the update is now overdue and needs immediate attention.
- C. Users receive a reminder that they can still defer the update for up to 30 days.
- D. All update notifications are disabled to reduce user distraction.

Answer: A

Explanation:

Apple's managed software updates allow MDM administrators to enforce deadlines for macOS upgrades or patches. Apple Learning specifies that if the user does not manually install the update before the deadline, the update installs automatically. This occurs regardless of user activity, ensuring the Mac is brought into compliance. Users may receive reminders before the deadline, but once the deadline passes, the update is forced to install. This guarantees that security patches or new OS versions are not indefinitely delayed by end-user inaction. Notifications are not suppressed, and there is no 30-day deferral once a deadline is in effect. The entire purpose of this mechanism is to ensure organizations can enforce timely compliance with critical security or functional updates.

References: Apple Platform Deployment - "Enforce software update deadlines with MDM."

NEW QUESTION # 239

Your organization deployed managed Mac computers with Apple silicon to its users. They don't want users to access Startup Security Utility. Which MDM command can your organization use to prevent users from accessing Startup Security Utility?

- A. SetFirmwarePassword
- **B. SetRecoveryLock**
- C. EnableFileVault
- D. PreventSystemSecurityAccess

Answer: B

Explanation:

Apple silicon Macs introduced a new security model, replacing firmware passwords with the SetRecoveryLockMDM command. This command allows administrators to set a recovery password that must be entered before anyone can boot into macOS Recovery. Since Startup Security Utility is accessed through Recovery, the Recovery Lock effectively prevents end users from entering this tool without IT authorization. Apple's learning materials clarify that legacy commands like SetFirmwarePassword apply only to Intel-based Macs. FileVault protects data at rest but does not block access to Recovery. PreventSystemSecurityAccess is not a defined MDM command. The correct and modern approach is SetRecoveryLock, which aligns with Apple silicon's secure boot architecture and enterprise deployment best practices. References: Apple Platform Deployment - "Use Recovery Lock with Apple silicon Macs."

NEW QUESTION # 240

What's the benefit of using Managed Distribution?

- A. Allows personalization
- B. Improves network performance
- **C. Enables app and content management**
- D. Separates personal and managed data

Answer: C

Explanation:

Managed Distribution, available through Apple Business Manager (ABM) or Apple School Manager (ASM), enables app and content management by allowing administrators to purchase, assign, and revoke licenses for apps and books, deployed via MDM. This ensures centralized control over organizational content.

Personalization (option A) is user-driven, not a distribution benefit. Network performance (option B) is enhanced by content caching. Data separation (option D) is a User Enrollment feature. The Apple Business Manager User Guide emphasizes content management as the key benefit.

Reference: Apple Business Manager User Guide (Section: Managed Distribution).

NEW QUESTION # 241

What's required to deploy macOS configuration profiles to devices?

- **A. An MDM solution**
- B. User acceptance
- C. An Apple Developer account
- D. A VPN configuration

Answer: A

Explanation:

Deploying macOS configuration profiles to devices requires an MDM solution, which pushes the profiles remotely via APNs to enrolled devices, ensuring centralized management. An Apple Developer account (option A) is for app development, not profile deployment. User acceptance (option B) is needed for manual installation but not for MDM deployment, especially on supervised devices. A VPN configuration (option D) is unrelated. The Apple Platform Deployment Guide specifies MDM as the standard method for deploying profiles to macOS devices.

Reference: Apple Platform Deployment Guide (Chapter: Configuration Profiles).

Which type of Apple ID is required for User Enrollment?

- Answer: B**

User Enrollment, designed for BYOD, requires a Managed Apple ID to separate personal and managed data cryptographically. Created via Apple Business Manager (ABM) or Apple School Manager (ASM), Managed Apple IDs enable organizational policies while preserving user privacy. Personal Apple IDs (options A and C, the same) are not used for User Enrollment, as they lack organizational control. There's no "Shared Apple ID" (option D); Shared iPad uses Managed Apple IDs differently. The Apple Platform Deployment Guide mandates Managed Apple IDs for User Enrollment.
