For Cisco 350-401 exam applicants who don't always have access to the internet, desktop-based practice exam software is appropriate. This Cisco 350-401 practice test software is compatible with Windows computers. Much like the web-based practice exam, our desktop practice test simulates the actual test. This Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) (350-401) exam simulation software has the same features as our web-based practice exam, including most probable real exam questions, customizable practice test sessions, and quick result on how you did. To eliminate mistakes and exam anxiety, we advise using this Cisco 350-401 practice test software.

Get to know about the Requirements of the Managing Industrial Networks with Cisco Networking Technologies (IMINS) Cisco 350-401 Exam:

No prerequisite are needed for the Cisco 350-401 Exam. Minute details can be found on Cisco.com. I recommend that candidates should start preparing for the Cisco 350-401 Exam by taking a hard look at Cisco's Official Curriculum. The Cisco Learning Network has other course materials that are very helpful. Still, it is recommended that candidates should refer to the Cisco Documentation Center for the latest technical information on Cisco devices. Check the Cisco Learning Network regularly for updates or changes to this curriculum.

2026 350-401 Prep Guide 100% Pass | Valid Training Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Materials Pass for sure

After the user has purchased our 350-401 learning materials, we will discover in the course of use that our product design is extremely scientific and reasonable. Details determine success or failure, so our every detail is strictly controlled. For example, our learning material's Windows Software page is clearly, our 350-401 Learning material interface is simple and beautiful. There are no additional ads to disturb the user to use the 350-401 qualification question. Once you have submitted your practice time, 350-401 study tool system will automatically complete your operation.

Cisco 350-401 Certification Exam, also known as Implementing Cisco Enterprise Network Core Technologies (ENCOR), is a popular entry-level exam for network engineers and IT professionals. Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) certification exam covers a wide range of topics related to enterprise network technologies, including network automation, security, routing and switching, and wireless networking.

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q153-Q158):

NEW QUESTION # 153

Which feature is supported by EIGRP but is not supported by OSPF?

- A. equal-cost load balancing
- B. route summarization
- C. unequal-cost load balancing
- D. route filtering

Answer: C

NEW QUESTION # 154

Drag and drop the LISP components from the left onto the function they perform on the right. Not all options are used.

Answer:

Explanation:

Explanation:

Table Description automatically generated

- + accepts LISP encapsulated map requests: LISP map resolver
- + learns of EID prefix mapping entries from an ETR: LISP map server
- + receives traffic from LISP sites and sends it to non-LISP sites: LISP proxy ETR
- + receives packets from site-facing interfaces: LISP ITR

Explanation:

ITR is the function that maps the destination EID to a destination RLOC and then encapsulates the original packet with an additional header that has the source IP address of the ITR RLOC and the destination IP address of the RLOC of an Egress Tunnel Router (ETR).

After the encapsulation, the original packet become a LISP packet.

ETR is the function that receives LISP encapsulated packets, decapsulates them and forwards to its local EIDs. This function also requires EID-to-RLOC mappings so we need to point out an "map-server" IP address and the key (password) for authentication. A LISP proxy ETR (PETR) implements ETR functions on behalf of non-LISP sites. A PETR is typically used when a LISP site needs to send traffic to non-LISP sites but the LISP site is connected through a service provider that does not accept no routable EIDs as packet sources. PETRs act just like ETRs but for EIDs that send traffic to destinations at non-LISP sites.

Map Server (MS) processes the registration of authentication keys and EID-to-RLOC mappings. ETRs sends periodic Map-Register messages to all its configured Map Servers.

Map Resolver (MR): a LISP component which accepts LISP Encapsulated Map Requests, typically from an ITR, quickly determines whether or not the destination IP address is part of the EID namespace

NEW QUESTION # 155

Refer to the exhibit.

Which commands are required to allow SSH connection to the router?

- A)
- B)
- C)
- D)

- A. Option D
- B. Option C
- C. Option A
- D. Option B

Answer: C

NEW QUESTION # 156

Refer to the exhibit.

An engineer must ensure that all traffic leaving AS 200 will choose Link 2 as the exit point.

Assuming that all BGP neighbor relationships have been formed and that the attributes have not been changed on any of the routers, which configuration accomplishes this task?

- A. R4(config-router)neighbor 10.2.2.2 weight 200
- B. R3(config-router)neighbor 10.1.1.1 weight 200
- C. R3(config-router)bgp default local-preference 200
- D. R4(config-router)bgp default local-preference 200

Answer: D

Explanation:

Explanation/Reference: [https://www.cisco.com/c/en/us/support/docs/ip/border-gateway-protocol-bgp/13753-25.html#:~:text=Border%20Gateway%20Protocol%20\(BGP\)%20routers,to%20use%20for%20traffic%20forwarding](https://www.cisco.com/c/en/us/support/docs/ip/border-gateway-protocol-bgp/13753-25.html#:~:text=Border%20Gateway%20Protocol%20(BGP)%20routers,to%20use%20for%20traffic%20forwarding).

NEW QUESTION # 157

Refer to the exhibit. Which command is required to verify NETCONF capability reply messages?

- A. show netconf | section rpc-reply
- B. show netconf rpc-reply
- C. show netconf xml rpc-reply
- D. show netconf schema | section rpc-reply

Answer: A
