### NEW QUESTION # 31

A Media Cloud customer utilizes Industries Order Management to manage advertising publishing. Order Management orchestrates the fulfillment steps across multiple external systems, such as inventory management for reserve/assign ad placement, ad servers, and a billing system for invoicing.

Which two guidelines should a Consultant follow when designing an orchestration plan to external systems?

Choose 2 answers

- **A. Create a master end-to-end plan to sequence the major milestones of all orders.**
- B. Use a single swim lane or orchestration plan for all callouts to all external systems.
- C. Fully describe all Commercial product entities using product attributes.
- **D. Create separate orchestration plan definitions for provisioning, logistics, inventory, and/or billing.**

**Answer: A,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Designing orchestration plans benefits from creating a master end-to-end plan for sequencing order milestones and breaking orchestration into separate plans per functional area (provisioning, logistics, billing) to manage complexity and integration points. Using a single swim lane or over-describing commercial products is not recommended.

### NEW QUESTION # 32

A home store wants to advertise their products on a particular TV channel owned by a publishing company.

Which channel should this media plan include?

- A. Out Of Home (OOH)
- B. Digital
- C. Print
- **D. Linear**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Linear refers to traditional TV broadcasting channels where advertisements run in a scheduled, linear fashion. ### NEW QUESTION # 33

A company is planning to adopt Media Cloud and has requirements around the relationship between clients and their advertising agencies, where they want to capture the role of each agency so they can identify clearly what is the Agency of Record. They also have requirements to map contacts within the agencies.

How should the Media Cloud data model be used to represent these relationships?

- **A. Advertisers and agencies should be created as Accounts and contacts as Contacts, and the Party Model should be adopted to define the relationships between them.**
- B. Advertisers should be created as Accounts, and agencies should be represented by a custom field added to the Contact object. Contacts should then be assigned to the Accounts.
- C. Advertisers and agencies should be created as Accounts, with agencies listed as child Accounts to the client Accounts, with Contacts related to those.
- D. Advertisers and agencies should be created as Accounts, and a custom lookup field should be created to represent the client/agency relationship. Contacts should be created under the Accounts.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Party Model in Media Cloud is designed to represent complex relationships between entities such as Advertisers and Agencies. Both are Accounts, and relationships between them (including roles like Agency of Record) are defined via the Party Model, which also supports mapping Contacts within those Accounts. This model provides flexibility and best practice for relationship management over custom lookups or hierarchical Account structures.

What does a Consultant need to create in Salesforce to specify the callout URL?

- **A. Named Credential**
- B. Connected App
- C. Auth. Provider
- D. Custom Metadata

**Answer: A**

Explanation:
