

# 2026 Latest Dumps C1000-189 Vce | C1000-189 100% Free Reliable Test Preparation

Contending for the success fruit of C1000-189 exam questions, many customers have been figuring out the effective ways to pass it. And that is why we have more and more customers and everyday the hot hit and high pass rate as well. It is all due to the advantage of our useful C1000-189 practice materials, and we have these versions of our C1000-189 study materials for our customers to choose according to their different study habits:the PDF, the Software and the APP online.

## IBM C1000-189 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Configuration: This section of the exam measures the skills of DevOps Administrators and evaluates their ability to configure and optimize Instana operational settings. It involves setting up business process monitoring, configuring both cloud and serverless agents, and defining agent proxy parameters. Candidates will learn to implement various technologies and sensors, manage OpenTelemetry integrations, set up smart alerts, create service naming rules, and define custom SLIs and payloads for alert channels. Managing licenses and ensuring proper configuration of alerts and notifications are also key components of this domain.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Security and Compliance:</b> This section of the exam measures the skills of IT Security Analysts and focuses on the data protection and compliance aspects of Instana deployment. Candidates must describe and implement data retention policies, plan for regulatory compliance, secure APIs, manage user access, and interpret audit logs. The goal is to ensure secure system configurations that align with organizational and regulatory standards.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Installation:</b> This section of the exam measures the skills of System Implementation Specialists and focuses on installing and deploying Instana across different environments. It includes installing the Instana backend, deploying and configuring agents, and migrating existing Instana setups. Candidates will also demonstrate their ability to implement Synthetic Monitoring and manage Points of Presence (PoPs) effectively for end-to-end performance validation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Integration:</b> This section of the exam measures the skills of Integration Engineers and assesses their proficiency in connecting Instana with external monitoring and automation tools. Candidates must demonstrate knowledge of integrating agent-based systems such as Omegamon, ITM, and ITCAM, as well as external platforms like Prometheus and Grafana. The section also includes configuring alert channels, automation actions, and utilizing the Instana REST API to support customized workflows and data visibility.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Planning:</b> This section of the exam measures the skills of Cloud Monitoring Engineers and covers the foundational planning tasks required for successful Instana deployment. Candidates must understand the installation prerequisites, the architectural design of Instana for on-premises environments, and the platform core capabilities and use cases. It also assesses knowledge of different agent modes, supported sensors and tracers, and the distinctions between cloud service agents and serverless agents essential for scalable implementation.</li> </ul>

## C1000-189 Reliable Test Preparation & C1000-189 Study Test

The experts in our company have been focusing on the C1000-189 examination for a long time and they never overlook any new knowledge. The content of our C1000-189 study materials has always been kept up to date. We will inform you by E-mail when we have a new version. With our great efforts, our C1000-189 practice dumps have been narrowed down and targeted to the C1000-189 examination. We can ensure you a pass rate as high as 99%!

### IBM Instana Observability v1.0.277 Administrator - Professional Sample Questions (Q34-Q39):

#### NEW QUESTION # 34

Which two methods can Instana administrators use to create an API token?

- **A. Personal API tokens**
- **B. Team API token**
- C. JSON Web tokens
- D. Sensor-specific API token
- E. Unit-specific API tokens

**Answer: A,B**

Explanation:

IBM Instana supports two primary methods for creating API tokens necessary for secure automation and integration: Team API tokens and Personal API tokens. The official documentation states: "API tokens for REST API access can be generated either on a per-user (personal) basis, or at the team level for shared automation use." Personal tokens are created from the user profile menu and scoped to an individual's permissions, supporting traceability and revocation. Team tokens are created under team or group settings and represent organizational integrations or CI/CD pipeline automation. JSON Web Tokens (A) are an industry token standard but not a creation flow in Instana. Unit- or Sensor-specific tokens are not supported (C, D); all automation integrations must use Personal or Team tokens, which are easily managed and rotated via the web UI for improved security hygiene.

### NEW QUESTION # 35

Which statement correctly describes the usage and migration options for the Self-Hosted Standard Edition?

- A. It can be used for both new installations and upgrades from any edition.
- B. It is not intended for new installations, only for upgrades from the Self-Hosted Classic Edition.
- **C. It does not support data migration from the Self-Hosted Classic Edition.**
- D. It is only for new installations, but data can be migrated from a Self-Hosted Classic Edition.

**Answer: C**

Explanation:

IBM's product migration matrix for Instana confirms strict usage boundaries between different self-hosted editions. The documentation clarifies: "Instana Self-Hosted Standard Edition does not support migration of data from the Self-Hosted Classic Edition." Each edition uses different architectural components, storage formats, and telemetry databases. Therefore, upgrading from Classic to Standard Edition requires a fresh install, without direct movement of monitoring history or historical configuration. Upgrades are only supported within the same product branch, ensuring compatibility and stability. Attempting migration from the Classic Edition is unsupported and risks operational deviation. Standard Edition can be newly installed but not upgraded from the Classic base, as per IBM's verified change and upgrade path guidance.

### NEW QUESTION # 36

What is the default value of the agent log level?

- A. Debug
- B. Trace
- **C. Info**
- D. Warn

**Answer: C**

Explanation:

The Instana agent uses configurable logging levels to balance verbosity and operational clarity. IBM's official documentation clearly notes: "The default Instana Agent log level is set to INFO, providing important system messages without excessive output volume." Info-level logging captures initialization events, registration details, sensor activations, and important state changes during runtime. Higher verbosity levels, such as DEBUG or TRACE, are reserved for troubleshooting or engineering analysis and generally disabled by default to prevent log overgrowth or performance penalties. WARN and ERROR levels handle exception events but do not constitute day-to-day operational detail. Administrators may raise or lower the logging level dynamically through environment variables or agent configuration files if deeper insights are needed for debugging sensor or connectivity problems. Keeping INFO as the baseline gives operators coherent visibility of normal proceedings while maintaining efficiency and simplicity in operational monitoring.

### NEW QUESTION # 37

For Instana Standard Edition, in which file should the salesKey be updated?

- **A. license.json**
- B. config.yaml
- C. Gui.api
- D. download.pl

**Answer: A**

Explanation:

Licensing in Instana is controlled by a key called "salesKey," which must be placed in the license.json file for Standard Edition. Per IBM Instana Observability documentation, "The salesKey is part of the license.json file, which must be updated to activate the Instana Standard Edition license." This file is checked at startup and authorizes agent/server deployment, binding entitlement and features to the account. Instana's licensing model relies on proper key management within license.json for compliance and support tracking. The config.yaml file manages agent technical configuration, not licensing. Download.pl and gui.api files are not associated with salesKey or licensing. Any update to the license must be done within license.json and validated by Instana's backend for activation completeness-this procedure is outlined step-by-step in the installation and onboarding guides.

### NEW QUESTION # 38

What is Instana's custom built software that is designed to monitor a specified technology?

- A. Sensor
- B. Tracer
- C. Profiling
- D. Service

**Answer: A**

Explanation:

Instana uses Sensors as specialized software components embedded within its agents to monitor and extract telemetry from various supported technologies. The verified documentation states: "Sensors are built-in modules that detect, identify, and monitor specific technologies such as databases, servers, run-times, and messaging systems." These components ensure that the agent collects targeted metrics, events, and traces optimized for individual stacks like MySQL, Kafka, or Java. When deployed, the Instana agent automatically discovers technologies running in the environment and loads corresponding Sensors dynamically, requiring minimal user configuration. Tracers handle transaction propagation, Profiling covers code-level performance, and Service is a higher abstraction in application topology-not individual monitoring logic. The Sensor concept remains core to Instana's automatic discovery and observability architecture as validated in IBM's architectural reference sections.

### NEW QUESTION # 39

.....

As the old saying goes, "Everything starts from reality, seeking truth from facts." This means that when we learn the theory, we end up returning to the actual application. Therefore, the effect of the user using the latest C1000-189 exam dump is the only standard for proving the effectiveness and usefulness of our products. I believe that users have a certain understanding of the advantages of our C1000-189 Study Guide, but now I want to show you the best of our C1000-189 training Materials - Amazing pass rate. Based on the statistics, prepare the exams under the guidance of our C1000-189 practice materials, the user's pass rate is up to 98% to 100%, And they only need to practice latest C1000-189 exam dump to hours.
