Tens of thousands of people have used our C-S4CPB-2508 Study Materials and the pass rate of the exam is high as 98% to 100%. This means as long as you learn with our C-S4CPB-2508 learning quiz, you will pass the exam without doubt.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q59-Q64):

NEW QUESTION # 59

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Customer project manager
- **B. Customer system admin**
- C. Partner project manager
- D. Partner lead configuration expert

Answer: B

NEW QUESTION # 60

How can you migrate data to SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. With Core Data Services
- **B. With a separate SAP HANA database**
- C. With the zero downtime service
- **D. With XML or CSV templates**

Answer: B,D

NEW QUESTION # 61

What tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- **A. SAP Fiori extensibility apps**
- B. SAP Business Application Studio
- C. SAP Cloud SDK
- **D. SAP Build**

Answer: A,D

Explanation:

Tools that enable non-developers to create low/no-code extensions are designed to be user-friendly, requiring minimal to no

programming knowledge, allowing business users to tailor applications to their specific needs. Among these tools, SAP Fiori extensibility apps and SAP Build stand out:

* SAP Fiori extensibility apps: These apps allow users to adapt the user interface and behavior of standard SAP Fiori apps without writing code. Users can personalize forms, fields, and workflows directly within the SAP Fiori environment, making it possible to adjust applications to meet specific business requirements.

* SAP Build: SAP Build is a suite of tools designed to enable users to create and enhance applications, automate processes, and design business sites with low-code or no-code approaches. It provides a user-friendly interface where users can drag and drop components, set up workflows, and integrate data without needing deep technical expertise.

NEW QUESTION # 62

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. Added partner content
- B. The selected scope
- C. System consistency checks
- D. The selected deployment target

Answer: B,D

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 63

After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. Integration and API List
- B. SAP Business Accelerator Hub
- C. SAP Cloud ALM Requirements app
- D. Integration Solution Advisory Methodology

Answer: D

NEW QUESTION # 64
