

New EDGE-Expert Test Fee | EDGE-Expert Valid Vce

P.S. Free 2026 EDGE EDGE-Expert dumps are available on Google Drive shared by Actual4test: https://drive.google.com/open?id=175bjzElAe_U0A9NJTkQnAjZw6NrP-9i

We know deeply that a reliable EDGE-Expert exam material is our company's foothold in this competitive market. High accuracy and high quality are the most important things we always looking for. We understand our candidates have no time to waste, everyone wants an efficient learning. So we take this factor into consideration, develop the most efficient way for you to prepare for the EDGE-Expert exam, that is the real questions and answers practice mode, firstly, it simulates the real Excellence in Design for Greater Efficiencies (EDGE Expert) Exam test environment perfectly, which offers greatly help to our customers. Secondly, it includes printable PDF Format, also the instant access to download make sure you can study anywhere and anytime. All in all, high efficiency of EDGE-Expert Exam Material is the reason for your selection.

Based on the credibility in this industry, our EDGE-Expert study braindumps have occupied a relatively larger market share and stable sources of customers. Such a startling figure --99% pass rate is not common in this field, but we have made it with our endless efforts. As this new frontier of personalizing the online experience advances, our EDGE-Expert exam guide is equipped with comprehensive after-sale online services. It's a convenient way to contact our staff, for we have customer service people 24 hours online to deal with your difficulties. If you have any question or request for further assistance about the EDGE-Expert study braindumps, you can leave us a message on the web page or email us.

EDGE-Expert Valid Vce - Exam Dumps EDGE-Expert Zip

Don't waste time, buy the latest EDGE-Expert pdf questions and practice tests from Actual4test and get successful. You can free download the demo of any format of EDGE EDGE-Expert test questions before purchase. You can claim a refund if you don't pass the EDGE EDGE-Expert Certification Exam after using these actual EDGE EDGE-Expert exam dumps.

EDGE Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which of the following does NOT contribute to an EDGE Auditor maintaining their Auditor status?

- A. Performing at least one project site audit every two years.
- **B. Retaking the auditor exam.**
- C. Attending refresher training.
- D. Studying the EDGE user guides as and when they are updated.

Answer: B

Explanation:

Maintaining EDGE Auditor status involves specific requirements to ensure ongoing competence. The EDGE Expert and Auditor Protocols outline these requirements: "To maintain their status, EDGE Auditors must perform at least one project site audit every two years, attend refresher training as required by IFC, and stay updated by studying the EDGE user guides and protocols as they are

revised" (EDGE Expert and Auditor Protocols, Section 5.1: Maintaining Auditor Status). Option A (performing at least one project site audit every two years) is explicitly required to demonstrate active engagement. Option B (studying the EDGE user guides as updated) is also necessary to stay current with program changes. Option D (attending refresher training) is mandated to ensure continued education. However, Option C (retaking the auditor exam) is not a requirement for maintaining status: "Once certified, EDGE Auditors are not required to retake the exam to maintain their status, though they may need to retake it if their certification lapses or if significant program changes occur" (EDGE Expert and Auditor Protocols, Section 5.2: Recertification Conditions). Since the question focuses on maintaining status, not recertification after lapse, retaking the exam is not a standard requirement. Thus, retaking the auditor exam (Option C) does not contribute to maintaining Auditor status.

Reference:EDGE Expert and Auditor Protocols, Section 5.1: Maintaining Auditor Status, Section 5.2: Recertification Conditions.

NEW QUESTION # 20

Which of the following BEST describes an EDGE Expert?

- A. An individual who can serve as both an auditor and a consultant upon EDGE Committee approval
- **B. An individual accredited by the EDGE Certifier who can serve as a consultant**
- C. A consultant who can issue a preliminary EDGE certificate
- D. An individual accredited by the EDGE Operations and Management Team who can serve as a consultant

Answer: B

Explanation:

The role of an EDGE Expert is well-defined within the EDGE framework to clarify their responsibilities and qualifications. The EDGE Expert and Auditor Protocols provide a precise description: "An EDGE Expert is an individual accredited by the EDGE Certifier (such as GBCI or other authorized certification bodies) who can serve as a consultant to project teams, advising on the selection of green building measures, preparing the self-assessment in the EDGE software, and guiding the project toward certification" (EDGE Expert and Auditor Protocols, Section 2.1: Roles of EDGE Expert). Option B, an individual accredited by the EDGE Certifier who can serve as a consultant, directly matches this definition. Option A (a consultant who can issue a preliminary EDGE certificate) is incorrect, as Experts do not issue certificates: "Only the EDGE Certification Provider can issue a preliminary certificate, not the EDGE Expert" (EDGE Certification Protocol, Section 3.3: Certification Decision). Option C (an individual who can serve as both an auditor and a consultant upon EDGE Committee approval) is also incorrect, as this violates conflict-of-interest rules: "An individual cannot serve as both an EDGE Expert and Auditor on the same project, even with committee approval, to avoid conflicts of interest" (EDGE Expert and Auditor Protocols, Section 2.3: Conflict of Interest). Option D (an individual accredited by the EDGE Operations and Management Team) is wrong, as accreditation is handled by the Certifier, not the Operations team: "The EDGE Operations and Management Team oversees the program, while accreditation of Experts is managed by the EDGE Certifier" (EDGE Certification Protocol, Section 1.3: Program Structure). The EDGE User Guide further supports this: "EDGE Experts are accredited professionals who consult on projects, having passed the EDGE Expert exam administered through the Certifier" (EDGE User Guide, Section 6.4: Working with EDGE Experts). Thus, Option B best describes an EDGE Expert. Reference:EDGE Expert and Auditor Protocols, Section 2.1: Roles of EDGE Expert, Section 2.3: Conflict of Interest; EDGE Certification Protocol, Section 3.3: Certification Decision, Section 1.3: Program Structure; EDGE User Guide Version 2.1, Section 6.4: Working with EDGE Experts.

NEW QUESTION # 21

Utility cost savings are calculated based on reduction in total:

- **A. Energy and water consumption from the supply grid.**
- B. Generator fuel and water consumption.
- C. Building energy and water consumption.
- D. Electricity and water consumption.

Answer: A

Explanation:

Utility cost savings in EDGE are calculated based on reductions in resource consumption sourced from the supply grid, as these are the costs directly borne by the building owner. The EDGE User Guide explains:

"Utility cost savings in EDGE are calculated based on the reduction in energy and water consumption from the supply grid, using local tariffs for electricity and water to convert resource savings into financial savings" (EDGE User Guide, Section 2.4: Interpreting EDGE Results). Option D, energy and water consumption from the supply grid, aligns with this definition, focusing on grid-supplied resources. Option A (electricity and water consumption) is partially correct but lacks specificity about the source: "Electricity and

water must be grid-supplied to be included in utility cost savings; onsite generation is excluded" (EDGE Methodology Report Version 2.0, Section 4.4: Cost Savings Calculations). Option B (generator fuel and water consumption) is incorrect, as generator fuel is not part of utility cost savings: "Generator fuel costs are not included in utility savings, as EDGE focuses on grid-supplied utilities" (EDGE User Guide, Section 2.4:

Interpreting EDGE Results). Option C (building energy and water consumption) is too broad, including onsite sources: "Building consumption includes all sources, but utility savings are grid-specific" (EDGE Methodology Report Version 2.0, Section 4.4: Cost Savings Calculations). Thus, energy and water from the supply grid (Option D) is the correct basis for utility cost savings.

Reference: EDGE User Guide Version 2.1, Section 2.4: Interpreting EDGE Results; EDGE Methodology Report Version 2.0, Section 4.4: Cost Savings Calculations.

NEW QUESTION # 22

Company A is developing a logistic center of 15,000 m² in Kenya. The project consists of 14,000 m² of warehouse space, 500 m² of office space, and 500 m² of technical areas mechanical and electrical. The company is looking for a single certification for the project. Which EDGE Building type should be selected for the certification?

- A. Logistic
- B. Retail
- C. Office
- D. Industrial

Answer: D

Explanation:

In the CBCI EDGE curriculum, the correct building type in the EDGE software is selected based on the project's dominant functional use, because the baseline assumptions for energy and water are driven by occupancy patterns, internal loads, operating hours, and typical system types for that use. In this project, the overwhelming majority of area is warehouse space: 14,000 m² out of 15,000 m², while office and technical areas together represent only 1,000 m².

EDGE does not treat "Logistic" as a separate building type for modeling; logistics centers are typically modeled under the Industrial category because warehouses and distribution facilities have industrial-like operational characteristics and baselines. Selecting Office would misrepresent schedules and plug loads and would distort the baseline comparison, leading to inaccurate savings results. Retail is also inappropriate because it assumes customer-facing operating hours, lighting levels, and HVAC patterns different from warehouses.

For a single certification covering the whole development, the appropriate approach is to select the building type that best matches the primary use and area share. Therefore, the correct EDGE building type for this logistics center is Industrial.

NEW QUESTION # 23

Air-cooled chillers have the following components:

- A. Compressor, water-cooled condenser, thermal expansion valve, evaporator.
- B. Compressor, condenser, thermal expansion valve, evaporator.
- C. Cooling tower, condenser, condenser pump, evaporator.
- D. Chilled water pump, condenser, thermal expansion valve, evaporator.

Answer: B

Explanation:

Air-cooled chillers are a type of HVAC system commonly evaluated in EDGE for their energy efficiency in green building design. The EDGE Methodology Report Version 2.0 outlines the components of air-cooled chillers in the context of energy efficiency measures. According to the EDGE User Guide (Version 2.1), air-cooled chillers differ from water-cooled chillers by not requiring a cooling tower or associated water-based components like a condenser pump. The guide states: "Air-cooled chillers consist of a compressor, air-cooled condenser, thermal expansion valve, and evaporator, which work together to provide cooling by rejecting heat directly to the ambient air" (EDGE User Guide, Section 4.2: Energy Efficiency Measures). Option A includes a cooling tower and condenser pump, which are specific to water-cooled chillers. Option D mentions a water-cooled condenser, which is incorrect for air-cooled systems. Option C includes a chilled water pump, which is not a core component of the chiller itself but part of the broader system. Option B accurately lists the compressor, condenser (air-cooled, implied), thermal expansion valve, and evaporator, aligning with the EDGE description of air-cooled chiller components.

Reference: EDGE User Guide Version 2.1, Section 4.2: Energy Efficiency Measures; EDGE Methodology Report Version 2.0, HVAC Systems.

NEW QUESTION # 24

.....

The content of our study materials is easy to be mastered and has simplified the important information. Our EDGE-Expert test questions convey more important information with less questions and answers and thus make the learning relaxing and efficient. The software boosts self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our EDGE-Expert Test Questions boost timing function and the function to stimulate the exam. Our EDGE-Expert exam materials have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any contents which are hard to explain. So you can enjoy the service of high quality and pass the exam successfully.

EDGE-Expert Valid Vce: https://www.actual4test.com/EDGE-Expert_examcollection.html

The basic mean of Actual4test EDGE-Expert Valid Vce is to provide the most important and most accurate material for our users, EDGE Purchasing EDGE-Expert EDGE updated testing engine and Braindump's Excellence in Design for Greater Efficiencies (EDGE Expert) Exam, If this is the first time you use are installing a new Actual4test EDGE-Expert Valid Vce format, Java Runtime Environment (JRE) will be installed, EDGE-Expert announce several changes.

Meet the people they interact with and get EDGE-Expert to know them, The class attribute that is created may come in handy for formatting the images for the Web, The basic mean of Actual4test Reliable EDGE-Expert Braindumps Questions is to provide the most important and most accurate material for our users.

100% Pass EDGE-Expert - Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Newest New Test Fee

EDGE Purchasing EDGE-Expert EDGE updated testing engine and Braindump's Excellence in Design for Greater Efficiencies (EDGE Expert) Exam, If this is the first time you use are installing a new Actual4test format, Java Runtime Environment (JRE) will be installed.
