

# First-grade Valid AI-102 Real Test Provide Prefect Assistance in AI-102 Preparation

DOWNLOAD the newest Prep4pass AI-102 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1dq5JxmPwKMltRSBRF5pxYZyhx27HqOu>

As the old saying tells that, he who doesn't go advance will lose his ground. So you will have a positive outlook on life. All in all, abandon all illusions and face up to reality bravely. Our AI-102 practice exam will be your best assistant to get the AI-102 Certification. And our AI-102 study materials are always considered the guarantee to pass the exam. You are the best and unique in the world. Just be confident to face new challenge!

Microsoft AI-102 Certification Exam is an excellent opportunity for professionals to showcase their expertise in designing and implementing AI solutions using Microsoft Azure. By passing AI-102 exam, you will demonstrate your skills and knowledge to build AI applications that can meet the needs of businesses. Designing and Implementing a Microsoft Azure AI Solution certification will help you stand out in the job market and advance your career as an AI engineer, data scientist, or developer.

Microsoft AI-102 is a certification exam that is designed to test the skills and knowledge of candidates in designing and implementing solutions that use Microsoft Azure AI. Designing and Implementing a Microsoft Azure AI Solution certification exam is intended for professionals who have a strong understanding of Microsoft Azure and its services, as well as experience in the design and deployment of AI solutions. AI-102 Exam is designed to assess a candidate's ability to use Azure AI services to solve business problems and create intelligent applications.

## 2026 High-quality Valid AI-102 Real Test Help You Pass AI-102 Easily

With the advent of knowledge times, we all need some professional certificates such as Microsoft AI-102 to prove ourselves in different working or learning condition. So making right decision of choosing useful practice materials is of vital importance. Here we would like to introduce our Microsoft AI-102 practice materials for you with our heartfelt sincerity.

### Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q229-Q234):

#### NEW QUESTION # 229

You are developing a photo application that will find photos of a person based on a sample image by using the Face API.

You need to create a POST request to find the photos.

How should you complete the request? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values	Answer Area
detect	POST {Endpoint}/face/v1.0/
findsimilars	Request Body
group	
identify	
matchFace	
matchPerson	
verify	

```

{
  "faceId": "c5c24a82-6845-4031-9d5d-978df9175426",
  "largeFaceListId": "sample_list",
  "largeFaceListId": "sample_list",
  "maxNumOfCandidatesReturned": 10,
  "mode": " "
}

```

**Answer:**

**Explanation:**

Project Types: Microsoft

Classification Types: Classification

Domains: Object Detection

Classification Types: Multiclass (Single tag per image)

Domains: General

**Explanation**

Values	Answer Area
detect	POST {Endpoint}/face/v1.0/ detect
findsimilars	Request Body
group	
identify	
matchFace	
matchPerson	
verify	

```

{
  "faceId": "c5c24a82-6845-4031-9d5d-978df9175426",
  "largeFaceListId": "sample_list",
  "largeFaceListId": "sample_list",
  "maxNumOfCandidatesReturned": 10,
  "mode": " matchPerson "
}

```

Box 1: detect

Face - Detect With Url: Detect human faces in an image, return face rectangles, and optionally with faceIds, landmarks, and attributes.

POST {Endpoint}/face/v1.0/detect

Box 2: matchPerson

Find similar has two working modes, "matchPerson" and "matchFace". "matchPerson" is the default mode that it tries to find faces of the same person as possible by using internal same-person thresholds. It is useful to find a known person's other photos. Note that an empty list will be returned if no faces pass the internal thresholds.

"matchFace" mode ignores same-person thresholds and returns ranked similar faces anyway, even the similarity is low. It can be

used in the cases like searching celebrity-looking faces.

### NEW QUESTION # 230

You are building a chatbot by using the Microsoft Bot Framework Composer. You have the dialog design shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
<code>user.name</code> is an entity.	<input type="radio"/>	<input type="radio"/>
The dialog asks for a user name and a user age and assigns appropriate values to the <code>user.name</code> and <code>user.age</code> properties.	<input type="radio"/>	<input type="radio"/>
The chatbot attempts to take the first non-null entity value for <code>username</code> or <code>personName</code> and assigns the value to <code>user.name</code> .	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
<code>user.name</code> is an entity.	<input type="radio"/>	<input checked="" type="radio"/>
The dialog asks for a user name and a user age and assigns appropriate values to the <code>user.name</code> and <code>user.age</code> properties.	<input checked="" type="radio"/>	<input type="radio"/>
The chatbot attempts to take the first non-null entity value for <code>username</code> or <code>personName</code> and assigns the value to <code>user.name</code> .	<input checked="" type="radio"/>	<input type="radio"/>

### NEW QUESTION # 231

You are using a Language Understanding service to handle natural language input from the users of a web-based customer agent.

The users report that the agent frequently responds with the following generic response: "Sorry, I don't understand that." You need to improve the ability of the agent to respond to requests.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. (Choose three.)

## Actions

## Answer Area

Add prebuilt domain models as required.
Validate the utterances logged for review and modify the model.
Migrate authoring to an Azure resource authoring key.
Enable active learning.
Enable log collection by using Log Analytics.
Train and republish the Language Understanding model.

### Answer:

Explanation:

#### Actions

Add prebuilt domain models as required.
Validate the utterances logged for review and modify the model.
Migrate authoring to an Azure resource authoring key.
Enable active learning.
Enable log collection by using Log Analytics.
Train and republish the Language Understanding model.

#### Answer Area

Enable active learning.
Validate the utterances logged for review and modify the model.
Train and republish the Language Understanding model.

### NEW QUESTION # 232

You deploy a web app that is used as a management portal for indexing in Azure Cognitive Search. The app is configured to use the primary admin key.

During a security review, you discover unauthorized changes to the search index. You suspect that the primary access key is compromised.

You need to prevent unauthorized access to the index management endpoint. The solution must minimize downtime.

What should you do next?

- A. Add a new query key, change the app to use the new query key, and then delete all the unused query keys.
- B. Regenerate the secondary admin key, change the app to use the secondary admin key, and then regenerate the primary key.
- C. Regenerate the primary admin key, change the app to use the secondary admin key, and then regenerate the secondary admin key.
- D. Change the app to use a query key, and then regenerate the primary admin key and the secondary admin key.

### Answer: C

Explanation:

Explanation

Regenerate admin keys.

Two admin keys are created for each service so that you can rotate a primary key, using the secondary key for business continuity.

1. In the Settings > Keys page, copy the secondary key.
2. For all applications, update the API key settings to use the secondary key.
3. Regenerate the primary key.
4. Update all applications to use the new primary key.

Note: Two admin api-keys, referred to as primary and secondary keys in the portal, are automatically generated when the service is created and can be individually regenerated on demand. Having two keys allows you to roll over one key while using the second key for continued access to the service.

Reference:

<https://docs.microsoft.com/en-us/azure/search/search-security-api-keys#regenerate-admin-keys>

### NEW QUESTION # 233

You need to enable speech capabilities for a chatbot.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- **A. Create a Speech service.**
- **B. Register a Direct Line Speech channel.**
- C. Create a Language Understanding service.
- D. Register a Cortana channel.
- E. Enable CORS for the chatbot app.
- **F. Enable WebSockets for the chatbot app.**

**Answer: A,B,F**

Explanation:

You can use the Speech service to voice-enable a chat bot.

The Direct Line Speech channel uses the text-to-speech service, which has neural and standard voices.

You'll need to make a small configuration change so that your bot can communicate with the Direct Line Speech channel using web sockets.
