NEW QUESTION # 57

During the production order process, what steps can be executed via background processing?

Note: There are 3 correct answers to this question.

- A. Order release
- B. Order settlement
- C. WIP determination
- D. Order creation
- E. Order confirmation

Answer: A,B,D

Explanation:

In the SAP S/4HANA production order process, background processing is used to automate repetitive or high-volume tasks to increase efficiency. The following steps are supported:

Order creation: Production orders can be automatically created from planned orders via background jobs (e.g., using program PP_ORDER_CREATE).

Order release: Releasing orders in batches ensures they are ready for execution without manual intervention for every single order (e.g., using program PPOREL).

Order settlement: This is a period-end closing activity typically performed in the background to allocate actual costs incurred to the

appropriate cost objects.
