

# Authoritative C1000-173 New Braindumps Files Help You to Get Acquainted with Real C1000-173 Exam Simulation

BONUS!!! Download part of VCE4Dumps C1000-173 dumps for free: <https://drive.google.com/open?id=1-NDOYmh0LZCCUpVABfrikC0wJyHbEZzAT>

The C1000-173 exam questions are designed and verified by experienced and qualified C1000-173 exam trainers. So you rest assured that with IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam dumps you can streamline your C1000-173 Exam Preparation process and get confidence to pass IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam in first attempt.

## IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Security Requirements:</b> This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Architect with Data Governance Services:</b> This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.</li> </ul>

## C1000-173 New Braindumps Files | IBM Exam C1000-173 Braindumps: IBM Cloud Pak for Data v4.7 Architect Pass Certainly

We don't want you to prepare and practice the old questions and waste time. Therefore, our team of certified experts includes updated IBM Cloud Pak for Data v4.7 Architect C1000-173 Exam Questions as soon as they are released. VCE4Dumps provides up-to-date IBM exam questions.

### IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q64-Q69):

#### NEW QUESTION # 64

Which mechanism will ensure long term system stability of a Cloud Pak for Data environment?

- A. Adjust the data throttle property on a per user basis to limit data throughput to available resources.
- B. Add more worker nodes.
- **C. Enforce quotas to specify the maximum amount of memory and vCPU for the platform, a specific service, or a project.**
- D. Setup pod autoscaling to set a resource limit for all Cloud Pak for Data service pods.

**Answer: C**

#### NEW QUESTION # 65

How are Knowledge Accelerators deployed?

- A. Deploy by IBM support upon request.
- B. Deploy from the Cloud Pak for Data marketplace.
- C. Deployed as part of the sample assets.
- **D. Deploy from the IBM Knowledge Accelerator API.**

**Answer: D**

Explanation:

Knowledge Accelerators are a part of IBM Knowledge Catalog in IBM Cloud Pak for Data and provide predefined industry-specific business terms and relationships. These accelerators are not included by default with sample assets nor automatically deployed through the Cloud Pak for Data marketplace. Instead, they are imported using dedicated API endpoints provided by IBM for Knowledge Accelerators. Deployment involves uploading the accelerator assets using the IBM Knowledge Accelerator API, and once imported, they can be customized and published within the governance framework. This approach provides the flexibility required for various enterprise governance models.

#### NEW QUESTION # 66

After importing IBM Knowledge Accelerator assets using an API endpoint, what change must be made before the assets can be

used by the appropriate users?

- A. Ensure a shared credential has been configured.
- **B. Add collaborators to the Knowledge Accelerators categories.**
- C. Add users to the Knowledge Accelerators security group.
- D. Ensure the user permission role is active.

**Answer: B**

Explanation:

After importing IBM Knowledge Accelerator (KA) assets using an API (or other methods), those assets -- such as categories, terms, and relationships -- are part of governance artifacts in Cloud Pak for Data. However, to make them usable by specific users, you must assign collaborators to the relevant categories.

This ensures users have the appropriate permissions (e.g., to view, curate, or manage terms) within the Information Governance Catalog (IGC) or Watson Knowledge Catalog.

#### **NEW QUESTION # 67**

Which plug-in is used by the Cloud Pak for Data Audit Logging service to forward audit records to a SIEM system?

- A. Apache Kafka output
- B. OSS/J
- **C. Fluentd output**
- D. Logstash output

**Answer: C**

Explanation:

The Audit Logging service in IBM Cloud Pak for Data uses Fluentd as the core log forwarding mechanism. Fluentd output plug-ins are configured to route audit logs to external SIEM systems such as Splunk or QRadar. These plug-ins are versatile and support multiple formats and transport protocols. Other options listed--like Logstash, OSS/J, or Kafka--are not the designated default forwarding mechanisms used within the CP4D Audit Logging architecture.

#### **NEW QUESTION # 68**

When planning the integration of IBM Cloud Pak for Data with existing enterprise systems, which aspect is crucial for ensuring seamless connectivity and data exchange? (Select two)

- **A. Network bandwidth**
- **B. API compatibility**
- C. User authentication mechanisms
- D. Data encryption standards

**Answer: A,B**

#### **NEW QUESTION # 69**

.....

We can provide you with efficient online services during the whole day, no matter what kind of problems or consultants about our C1000-173 quiz torrent; we will spare no effort to help you overcome them sooner or later. First of all, we have professional staff with dedication to check and update our C1000-173 Exam Torrent materials on a daily basis, so that you can get the latest information from our C1000-173 exam torrent at any time. Besides our after-sales service engineers will be always online to give remote guidance and assistance for you on C1000-173 study questions if necessary.
