Cisco Designing Cisco Security Infrastructure Sample Questions (Q36-Q41):

NEW QUESTION # 36
Which design policy addresses harmful content creation by generative AI?

- A. watermarking
- B. quantum resistant encryption
- C. retrieval augmented generation
- D. human in the loop

Answer: A

Explanation:
Watermarking is a generative AI design policy that embeds hidden identifiers into AI-generated content. This helps address the risk of harmful content creation by enabling traceability and accountability, making it easier to detect and regulate malicious or misleading AI outputs.

NEW QUESTION # 37
A telecommunications company recently introduced a hybrid working model. Based on the new policy, employees can work remotely for 2 days per week if corporate equipment is used. The IT department is preparing corporate laptops to support users during the remote working days.
Which solution must the IT department implement that provides secure connectivity to corporate resources and protects sensitive corporate data even if a laptop is stolen?

- A. Secure Client
- B. Cisco Duo
- C. ISE Posture
- D. Umbrella

Answer: A

Explanation:
Cisco Secure Client (formerly AnyConnect) provides secure remote connectivity through VPN, ensuring encrypted access to corporate resources. It also integrates endpoint security features, protecting sensitive corporate data even if a laptop is stolen.

NEW QUESTION # 38
A product manager is focused on maintaining the security integrity of a microservice-based application as new features are developed and integrated. To ensure that known software vulnerabilities are not introduced into the product, it is crucial to implement a robust application security technique. The technique must be applied during the build phase of the software development lifecycle, which allows the team to proactively entity and address vulnerability risks before deployment. Which application security technique must be applied to accomplish the goal?

- A. container scanning
- B. Open API specification analysis
- C. secret detection
- D. infrastructure as code scanning

Answer: A

Explanation:
Container scanning during the build phase ensures that no known software vulnerabilities are introduced into the application. It scans container images for outdated libraries, misconfigurations, and security flaws before deployment, allowing proactive remediation. This directly supports maintaining the security integrity of a microservice-based application.

NEW QUESTION # 39
A global marketing firm, based in California with customers on every continent, suffered a data breach that exposed employee and customer PII. Which regulations is the company in danger of violating?

- A. GDPR
- B. ISO27001
- C. ISO SP800-53
- D. FedRamp

Answer: A

Explanation:
Since the company serves customers on every continent, including the European Union, exposing customer PII puts it at risk of violating the General Data Protection Regulation (GDPR).
GDPR applies globally to any organization handling EU residents' personal data, regardless of where the company is based.

NEW QUESTION # 40
The network security team of a private university is conducting a comprehensive audit to evaluate the security posture across the network infrastructure. During the review, the security team found that a trusted vendor disclosed serious vulnerabilities identified in a product that plays a crucial role in the university's CI/CD pipeline. The security team must act promptly to mitigate the potential risks posed by these vulnerabilities. Which action must the security team take first in response to the disclosure?

- A. Confirm impact by validating presence of the product in company's environment
- B. Leverage IDS to measure the impact of the vulnerability.
- C. Patch the impacted product as soon as possible
- D. Notify customers of the impact and its source

Answer: A

Explanation:
The first step after a vulnerability disclosure is to validate whether the affected product exists in the organization's environment. This ensures the vulnerability is relevant before applying patches or notifying stakeholders, preventing wasted effort and focusing on actual exposure.
