system will send the latest version of EDI101 exam braindumps to your email automatically. We also have online service stuff, and if you have any questions just contact us.

EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q32-Q37):

NEW QUESTION # 32

A new error started logging to your interface and your team decides that this error should be worked on an existing workqueue. You properly update the workqueue rule to include the new error. Which of the following will your workqueue contain moving forward if you take no other actions? (SELECT ALL THAT APPLY)

- A. No occurrences of the new error
- B. Future occurrences of the new error, and none of the previous occurrences
- C. All errors previously added to the workqueue
- D. All occurrences of the new error, past and future

Answer: B,C

Explanation:

Workqueue rules in Bridges are generally not retroactive by default. Once you update a rule, only future occurrences of the error will be caught by the new logic (Option A). Any errors that were already in the workqueue from previous rules will remain there (Option C). To get past occurrences of the new error into the workqueue, you would need to run the Maintenance utility described in Question 26.

NEW QUESTION # 33

Which of the following refers to specifically the 2nd component in the 5th field of PID?

- A. PID-5[2]
- B. PID-5
