300-435 Certificate Exam & Testking 300-435 Learning Materials

Our 300-435 test material is known for their good performance and massive learning resources. In general, users pay great attention to product performance. After a long period of development, our 300-435 research materials have a lot of innovation. And we also take the feedback of users who use the Automating and Programming Cisco Enterprise Solutions exam guide materials seriously. Once our researchers find that these recommendations are possible to implement, we will try to refine the details of the 300-435 Quiz guide. Our 300-435 quiz guide has been seeking innovation and continuous development.

Cisco 300-435 Exam is a comprehensive certification exam that tests the candidate's knowledge and skills in programming concepts, APIs, automation tools, and network programmability. 300-435 exam is designed for IT professionals who want to demonstrate their proficiency in implementing and automating Cisco enterprise solutions. Passing the exam earns the candidate the Cisco Certified DevNet Professional certification, which is a valuable credential in the IT industry.

Cisco Automating and Programming Cisco Enterprise Solutions Sample Questions (Q25-Q30):

NEW QUESTION # 25

Refer to the exhibit.

An engineer utilizing ISE as the wireless AAA service noticed that the accounting process on the server at 10.10.2.3 has failed, but authentication process is still functional.

Which ISE nodes receive WLC RADIUS traffic, using the CLI output and assuming the WLAN uses the servers in their indexed order?

- A. authentication to 10.10.2.4, accounting to 10.10.2.4.
- B. authentication to 10.10.2.3, accounting to 10.10.2.4.
- C. authentication to 10.10.2.4, accounting to 10.10.2.3.
- D. authentication to 10.10.2.3, accounting to 10.10.2.3.

Answer: D

NEW QUESTION # 26

Drag and Drop Question

Drag and drop the code from the bottom onto the box where the code is missing to find the status of a template deployment to a device. Not all of the code is shown. Not all options are used.

□

Answer:

Explanation:

□ Explanation:

To retrieve the status of a template deployment via Cisco DNA Center:

The correct API endpoint is:

template-programmer/template/deploy/status/{DEPLOYMENT_ID}

The HTTP method to use is GET for status retrieval.

The field "status" in the JSON response contains the deployment result.

□

NEW QUESTION # 27

Fill in the blanks to complete this API request against the Cisco SD-WAN vManage Statistics API, which specified a deviceId of 260fa9-2d31-4312-cf96-143b46db0211, a local-color of biz-internet, and a remote-color of gold.

□

Answer:

Explanation:

deviceId= , &local-color= , &remote-color=

NEW QUESTION # 28

Which HTTP request is valid to create a new wireless network called "Demo Wireless Network" in the organization "QASD-EROA-MKAW"?

- A. □
- B. □
- C. □
- D. □

Answer: B

Explanation:

https://documentation.meraki.com/zGeneral_Administration/Other_Topics/The_Cisco_Meraki_Dashboard_API

NEW QUESTION # 29

Which URI with the request body of Request body:

{ "name": "Test", "organizationId": "<org_id>", "type": "appliance" } creates a new Meraki network called "Test", when using APIs?

- A. POST https://api.meraki.com/api/v0/organizations/<org_id>/networks/<net_id>
- B. PUT https://api.meraki.com/api/v0/organizations/<org_id>/networks
- C. POST https://api.meraki.com/api/v0/organizations/<org_id>/networks
- D. POST <https://api.meraki.com/api/v0/networks>

Answer: C

To create a new network called "Test" using the Meraki API, the correct URI is the one that uses the POST method to the endpoint that includes the organization ID but not a specific network ID. Therefore, option D is the correct answer. References := (Automating Cisco Enterprise Solutions Official Cert Guide)
