

Reliable Scrum SAFe-Practitioner Dumps | Valid SAFe-Practitioner Real Test

P.S. Free & New SAFe-Practitioner dumps are available on Google Drive shared by Icertmaster: https://drive.google.com/open?id=1ooe90or5RF_BDkqJ0X7B7yE9DDOPIk9C

With the collection of SAFe-Practitioner real questions and answers, our website aim to help you get through the real exam easily in your first attempt. There are SAFe-Practitioner free demo and dumps files that you can find in our exam page, which will play well in your certification preparation. We give 100% money back guarantee if our candidates will not satisfy with our SAFe-Practitioner vce braindumps.

The Scrum SAFe-Practitioner Exam consists of multiple-choice questions that are designed to test the candidate's knowledge and understanding of the SAFe framework. The questions are designed to be challenging and require the candidate to think critically about the concepts and principles of the framework.

To prepare for the SAFe 5 Practitioner exam, professionals can attend SAFe training courses and workshops. These courses provide professionals with the knowledge and skills necessary to implement the SAFe framework in their organization successfully. Additionally, professionals can access study materials, such as practice exams, online resources, and study guides, to help them prepare for the exam.

Now are you in preparation for SAFe-Practitioner exam? If so, you must be a man with targets. Our Icertmaster are committed to help such a man with targets to achieve the goal. SAFe-Practitioner exam simulation software developed by us are filled with the latest and comprehensive questions. If you buy our product, we will offer one year free update of the questions for you. With our software, passing SAFe-Practitioner Exam will no longer be the problem.

The SAFe 5 Practitioner (SP) certification is highly valued in the Agile community, as it demonstrates a candidate's expertise in Agile principles and practices, as well as their ability to lead successful SAFe implementations. SAFe Practitioner Exam(6.0) certification is recognized by organizations worldwide and can lead to increased career opportunities and higher salaries.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q58-Q63):

NEW QUESTION # 58

What is one key benefit of a backlog refinement session?

- A. It serves a variety of purposes, including a dedicated time for planning, retrospecting, exploring, and innovating
- B. It allows the team to state the problem and think about what, where, when, and the impact
- C. It is the main way in SAFe for achieving relentless improvement
- **D. It provides time to identify dependencies and issues that could impact the next Iteration**

Answer: D

Explanation:

n: A backlog refinement session is a periodic activity teams use to define, discuss, estimate, and establish acceptance criteria for upcoming backlog items¹. One key benefit of a backlog refinement session is that it provides time to identify dependencies and issues that could impact the next iteration. By doing so, teams can reduce uncertainty, avoid surprises, and plan more effectively. Backlog refinement also helps surface problems with the current plan, which may require discussion at the team, PO, or coach syncs². Additionally, backlog refinement helps teams align their backlog with the ART backlog, the PI objectives, and the customer needs². NEW QUESTION # 59

What does the Continuous Delivery Pipeline enable?

- A. Continuous refactoring
- B. Increased technical debt
- C. Ongoing learning
- D. Delivery of large batches

Answer: C

Explanation:

The Continuous Delivery Pipeline enables ongoing learning by providing fast and frequent feedback loops throughout the value delivery process. The pipeline consists of four aspects: Continuous Exploration, Continuous Integration, Continuous Deployment, and Release on Demand, each of which supports the validation of assumptions, hypotheses, and outcomes. By applying the Lean Startup cycle of Build-Measure-Learn, the pipeline allows the organization to test and learn from the market, the customers, and the users, and to adapt and improve the solutions accordingly. The pipeline also fosters a culture of innovation and experimentation, where teams can explore new ideas and opportunities, and learn from failures and mistakes. References: Continuous Delivery Pipeline - Scaled Agile Framework, Build-Measure-Learn - Scaled Agile Framework

NEW QUESTION # 60

PI Objectives are business summaries of what each team intends to deliver in the upcoming PI.

- A. FALSE
- B. TRUE

Answer: B

NEW QUESTION # 61

What is an example of a program event?

- A. Daily stand-up
- B. Iteration review
- C. Innovation and Planning
- D. Scrum of scrums

Answer: C

Explanation:

A program event is an event that involves all the teams in an Agile Release Train (ART) and occurs at the program level. According to the SAFe for Teams SP (6.0) handbook, there are three program events: PI Planning, System Demo, and Inspect and Adapt¹. Innovation and Planning (IP) is also a program event, as it is a special iteration that occurs at the end of each Program Increment (PI) and provides time for the ART to innovate, plan, and improve². Therefore, Innovation and Planning is an example of a program event. The other options are not program events, but team events, as they occur at the team level and involve only one agile team. Scrum of scrums, Iteration review, and Daily stand-up are team events that are part of the iteration execution cycle³. NEW QUESTION # 62

The CALMR approach to DevOps includes Automation, Lean flow, Measurement, and Recovery. What does the "C" represent?

- A. Cycle-time
- B. Continuous Integration
- C. Culture
- D. Cadence

Answer: C

Explanation:

Culture is the first element of the CALMR approach to DevOps in SAFe. It refers to the shared mindset and values that support successful DevOps adoption. Culture in SAFe is influenced by the Lean-Agile principles and practices that guide the entire framework. Culture in DevOps requires customer-centricity, collaboration, trust, empowerment, learning, and feedback among all the stakeholders involved in the value stream. Culture also fosters a shift-left mentality, where operational and quality concerns are addressed early and often in the development process. Culture is the foundation for the other elements of CALMR: automation, lean flow, measurement, and recovery.
