AgilePM-Foundation Real Dump - Latest AgilePM-Foundation Test Materials

According to our investigation, the test syllabus of the AgilePM-Foundation exam is changing every year. Some new knowledge will be added into the annual real exam. Some old knowledge will be deleted. So you must have a clear understanding of the test syllabus of the AgilePM-Foundation study materials. Now, you can directly refer to our study materials. Our experts have carefully researched each part of the test syllabus of the AgilePM-Foundation Study Materials. Then they compile new questions and answers of the study materials according to the new knowledge parts.

The AgilePM-Foundation Certification Exam is a multiple-choice exam that consists of 50 questions. AgilePM-Foundation exam is computer-based and can be taken at a registered testing center or online. Candidates have 40 minutes to complete the exam, and a score of 50% or higher is required to pass. Successful candidates will receive a certificate that demonstrates their knowledge and understanding of AgilePM principles and practices. They will also become members of the AgilePM community, which provides access to resources, networking opportunities, and further training and development.

APMG-International AgilePM-Foundation: Agile Project Management (AgilePM) Foundation Exam is an excellent certification program for individuals who want to learn Agile project management principles and practices. Agile Project Management (AgilePM) Foundation Exam certification is internationally recognized and can help individuals advance their careers in project management. AgilePM-Foundation Exam is designed to be accessible and can be taken online or in-person, making it a convenient option for individuals who are looking to obtain this certification.

APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q105-Q110):

NEW QUESTION # 105

How does the Post-Project phase add value to a project?

- A. Brings a baseline of the Evolving Solution into operational use
- B. Iteratively explores the low- level detail of the requirements
- **C. Checks how well the expected business benefits have been met**
- D. Define how the operation of the solution will be managed

Answer: C

NEW QUESTION # 106

What phase will decide on which projects are started, based on a clearly defined objective?

- A. Foundations
- B. Post-project
- C. Feasibility
- **D. Pre-Project**

Answer: D

NEW QUESTION # 107

During what phase should a baseline of the Evolving Solution be put into operational use?

- A. Foundations
- **B. Deployment**
- C. Post-Project
- D. Evolutionary Development

Answer: B

Explanation:

A baseline of the Evolving Solution should be put into operational use during the Deployment phase⁷. This phase is when the latest increment of the product is put into live use, marking the transition from development to real-world operation.

NEW QUESTION # 108

Which of the common Agile concepts, behaviors, and techniques delivers a version of a product with just enough features to be usable by early customers who can then provide feedback for future product development?

- **A. Minimum viable product.**
- B. Self-organized teams.
- C. Full transparency.
- D. Empowerment.

Answer: A

Explanation:

* Minimum Viable Product (MVP): An MVP allows early customers to use a product and provide valuable feedback, which is then incorporated into subsequent iterations. This is central to Agile practices, emphasizing incremental delivery and responsiveness to user needs.

* Other Options:

* B: Full transparency relates to visibility into processes and progress, not product development.

* C and D: These refer to team dynamics, not product delivery.

Key AgilePM Concepts Referenced:

* Incremental Delivery: AgilePM Handbook, Chapter 3, Section 3.7.

NEW QUESTION # 109

Which of the following is NOT an expectation for a Product increment?

- A. It is independent of all other Product Increments
- B. It is a step towards achieving a Product Goal
- C. It has been accepted as usable
- D. It meets the Definition of 'Done'

Answer: A

Explanation:

Agile delivery expects each increment to be usable, meet the agreed quality bar (Definition of Done), and move the product toward its goal. AgilePM's incremental, timeboxed approach stresses that every slice should be demonstrably valuable or verifiable, with acceptance criteria satisfied and quality never compromised. However, increments in an evolving solution are typically additive and cumulative; they build upon prior work to extend capability. Requiring that an increment be independent of all others is unnecessary and often impractical for integrated solutions. What matters is that it is coherent, tested, and acceptable to stakeholders within the agreed standards. Thus, options A, C, and D describe standard expectations for an increment in AgilePM/Scrum-aligned practice, whereas B does not. Therefore, B is the correct "NOT" choice.

NEW QUESTION # 110

.....

In order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our AgilePM-Foundation learning questions in this website. And we can assure you that you will get the latest version of our AgilePM-Foundation Training Materials for free from our company in the whole year after payment on AgilePM-Foundation practice quiz. Last but not least, we will provide the most considerate after sale service for our customers on our AgilePM-Foundation exam dumps.
