

Network-Security-Essentials Practice Engine - Network-Security-Essentials Valid Test Questions

Network Security Essentials Exam Guide

The Network Security Essentials exam tests your knowledge of basic networking and how to configure, manage, and monitor a WatchGuard Firebox. This exam is appropriate for network administrators who have experience configuring and managing Firebox devices that run Fireware v12.4.

Exam Overview

Key Concepts

To successfully complete the Network Security Essentials exam, you must understand these key concepts:

Fireware Knowledge

- Firebox activation and initial setup
- Network configuration
- Policy and proxy configuration
- Subscription services configuration
- User authentication
- Device monitoring, logging, and reporting
- Branch office and mobile VPN configuration

General Network and Security Knowledge

- IPv4 networking concepts (subnets, DNS, TCP/IP, DHCP, NAT, static routing)
- General understanding of firewalls

With our Network-Security-Essentials practice materials, you don't need to spend a lot of time and effort on reviewing and preparing. For everyone, time is precious. Office workers and mothers are very busy at work and home; students may have studies or other things. Using Network-Security-Essentials guide torrent, you only need to spend a small amount of time to master the core key knowledge to pass the Network-Security-Essentials Exam and get a Network-Security-Essentials certificate. It is proved that if you spend 20 to 30 hours to study our Network-Security-Essentials exam questions, it is easy for you to pass the Network-Security-Essentials exam.

There are a lot of free online resources to study for the Network Security Essentials for Locally-Managed Fireboxes Network-Security-Essentials certification exam. Some of these resources are free, while others require payment for access. you've downloaded a free WatchGuard dumps, and PDFBraindumps offers 365 days updates. Network Security Essentials for Locally-Managed Fireboxes Network-Security-Essentials price is affordable.

Network-Security-Essentials Valid Test Questions - New Network-Security-Essentials Test Bootcamp

As is known to us, a suitable learning plan is very important for all people. For the sake of more competitive, it is very necessary for you to make a learning plan. We believe that our Network-Security-Essentials actual exam will help you make a good learning plan.

You can have a model test in limited time by our Network-Security-Essentials Study Materials, if you finish the model test, our system will generate a report according to your performance. And in this way, you can have the best pass percentage on your Network-Security-Essentials exam.

WatchGuard Network Security Essentials for Locally-Managed Fireboxes Sample Questions (Q25-Q30):

NEW QUESTION # 25

As you troubleshoot a Branch Office VPN tunnel, you see the log message below. Which settings can you modify in the BOVPN virtual interface configuration to resolve this issue? (Select one.)

- A. VPN Routes
- B. Gateway Settings
- C. Phase 1 Settings
- **D. Phase 2 Settings**
- E. BOVPN-Allow policies

Answer: D

Explanation:

When troubleshooting a Branch Office VPN (BOVPN) tunnel, issues in the Phase 2 settings can commonly cause connectivity problems. Adjusting settings such as the encryption and integrity algorithms, or setting correct lifetimes in Phase 2, may resolve compatibility or timeout issues with third-party VPN endpoints. This configuration ensures the two VPN endpoints can securely exchange data in alignment with each other's capabilities and settings.

NEW QUESTION # 26

You configured a Firebox for a school environment. Students must have more restricted access than teachers, and unauthenticated users cannot have any Internet access. You added Student and Teacher groups to your proxy policies that handle web traffic. Based on the image below, this configuration can accomplish your goals.

- **A. True**
- B. False

Answer: A

Explanation:

The image shows a configuration for a school environment with separate HTTP and HTTPS proxy policies for Students and Teachers. This separation allows for different levels of access control based on group membership, providing more restrictive access for students compared to teachers.

* Students are restricted by specific HTTP and HTTPS proxy policies, limiting their access to designated content and sites.

* Teachers have their own policies, which can be configured with more permissive rules.

* Unauthenticated users are not included in any policy, effectively blocking their internet access, as the firewall denies traffic not explicitly allowed by a policy.

This configuration meets the requirements by:

* Allowing teachers and students access as per their respective policies.

* Blocking unauthenticated users from internet access entirely.

NEW QUESTION # 27

Your users have no network connectivity on their computers in the 10.0.40.0/24 network. You investigate and discover the DHCP address pool for this network is exhausted, but there are no available IP addresses in the network to assign. Which of these options can you use to expand the IP address space of this network? (Select two.)

- A. Create a Dynamic NAT rule for traffic from the 10.0.40.1/24 network going to the 10.0.50.1/24 network
- B. Change the IP address of the 10.0.40.1/24 network to 10.0.40.123/24
- C. Enable a wireless SSID for the 10.0.40.1/24 network
- **D. Bridge the 10.0.40.1/24 network across additional interfaces**
- **E. Add 10.0.50.1/24 to the 10.0.40.1/24 network as a secondary network**

Answer: D,E

Explanation:

- * Adding a Secondary Network (10.0.50.1/24): By adding a secondary subnet (such as 10.0.50.1/24) to the existing 10.0.40.1/24 network, you expand the IP address space, effectively increasing the number of available IP addresses for DHCP allocation.
 - * Bridging Across Additional Interfaces: Bridging the 10.0.40.1/24 network across multiple interfaces can also increase the available address pool by creating a larger logical network. This approach helps manage IP space across a broader range of devices without subnet fragmentation.
- These methods provide scalable solutions to expand IP address availability within constrained network spaces.

NEW QUESTION # 28

You want to send traffic from the Internet to your internal web server through the Firebox. You see the traffic is allowed in Traffic Monitor, but the web server cannot be reached. You use the TCP Dump Diagnostic Task and collect this information from the Firebox interface connected to the web server.

What could cause the problem? (Select two.)

- A. The Firebox Dynamic NAT rules are configured incorrectly
- B. The HTTPS proxy is blocking the connection because Gateway AntiVirus detected a virus
- C. The web server has firewall software installed that blocks incoming connections.
- D. The web server default gateway is configured incorrectly
- E. The IP address of the web server is on the Firebox Blocked Sites list

Answer: C,D

Explanation:

- * Firewall Software Blocking Connections: If the web server has its own firewall software, it may be configured to block incoming connections. This would prevent the server from responding to requests, even if the Firebox is allowing the traffic through.
 - * Incorrect Default Gateway Configuration: If the web server's default gateway is not correctly set to route through the Firebox, it will be unable to respond to inbound traffic routed from external sources.
- This misconfiguration is a common cause of connectivity issues in environments with complex network setups. These two issues often lead to situations where the Firebox allows traffic, but the destination server is unreachable due to internal configurations.

NEW QUESTION # 29

You configured your Firebox as a DHCP server and want to verify the status of the leased addresses. You found this information in Firebox System Manager > Status Report. What is true about DHCP leases in this deployment? (Select two.)

□

- A. The MAC address for the host using 10.0.1.2 is 00:50:56:9a:75
- B. DHCP leases for the 10.0.1.0/24 network are valid for 8 hours
- C. 252 IP addresses are currently available in the address pool for the 10.0.1.0/24 network
- D. DHCP leases for the 10.20.1.0/24 network are valid for 24 hours
- E. The hostname Server1 is associated with the IP address 10.20.1.100

Answer: B,C

Explanation:

Analyzing the DHCP lease information from the provided image:

* Lease Duration for 10.0.1.0/24 Network:

* The lease for IP address 10.0.1.2 on interface eth1 starts at 2023/03/09 21:42:33 and ends at 2023/03/10 05:42:33, showing a lease duration of 8 hours. Thus, DHCP leases for the 10.0.1.0/24 network are set to be valid for 8 hours.

* Available IP Addresses in 10.0.1.0/24 Pool:

* The summary indicates that 1 out of 253 IPs is leased for the 10.0.1.0/24 subnet, meaning 252 IPs remain available in the address pool.

These details confirm the correct answers: B and D.

Other options, such as MAC address and hostname associations, do not match the data provided in the image, making them incorrect choices. Let me know if you need further assistance analyzing DHCP configurations on Firebox devices.

NEW QUESTION # 30

.....

Our Network-Security-Essentials study materials just need you to memorize all keypoints of the knowledge of the real exam. It is unnecessary to review all irrelevant knowledges. At present, our Network-Security-Essentials exam questions have helped thousands of people pass the exam and obtain the certificate. Also, the passing rate of our Network-Security-Essentials Training Materials is the highest according to our investigation. None of the other exam braindumps in the market has the pass rate high as 98% to 100% as our Network-Security-Essentials learning quiz.

Network-Security-Essentials Valid Test Questions: https://www.pdfbraindumps.com/Network-Security-Essentials_valid-braindumps.html

Now, we will recommend the most valid & best-related Network-Security-Essentials exam study torrent for your preparation, If you want to study the Network-Security-Essentials Valid Test Questions - Network Security Essentials for Locally-Managed Fireboxes exam training questions when you are strolling outside without network, you could use the PDF version after you downloaded it, WatchGuard Network-Security-Essentials Practice Engine Choosing to be more excellent is common for many people in IT field, As for Network-Security-Essentials, there is almost 98%-100% person passing for that.

Less time input of our Network-Security-Essentials exam preparatory, It is not about some congenital things, Now, we will recommend the most valid & best-related Network-Security-Essentials Exam study torrent for your preparation.

Free PDF Quiz WatchGuard - Network-Security-Essentials - Unparalleled Network Security Essentials for Locally-Managed Fireboxes Practice Engine

If you want to study the Network Security Essentials for Locally-Managed Fireboxes exam training questions Network-Security-Essentials when you are strolling outside without network, you could use the PDF version after you downloaded it.

Choosing to be more excellent is common for many people in IT field, As for Network-Security-Essentials, there is almost 98%-100% person passing for that, This certification gives us more opportunities.
