Our company employs the first-rate expert team which is superior to others. Our experts team includes the experts who develop and research the GH-100 cram materials for many years and enjoy the great fame among the industry, the senior lecturers who boost plenty of experiences in the information about the exam and published authors who have done a deep research of the GH-100 Latest Exam file and whose articles are highly authorized. They provide strong backing to the compiling of the GH-100 exam questions and reliable exam materials resources. They can help you pass the GH-100 exam.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.
Topic 2	<ul style="list-style-type: none"> Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.
Topic 3	<ul style="list-style-type: none"> Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.

Certification GH-100 Questions & Latest GH-100 Exam Price

You have to memorize these Microsoft GH-100 questions and you will pass the Microsoft GH-100 test with brilliant results. The price of Microsoft GH-100 updated exam dumps is affordable. You can try the free demo version of any GitHub Administration GH-100 exam dumps format before buying.

Microsoft GitHub Administration Sample Questions (Q62-Q67):

NEW QUESTION # 62

What benefit does GitHub Advanced Security provide?

- A. helps organization administrators analyze and configure permissions to the least privilege required
- B. helps enterprise administrators improve and maintain network security for their GitHub Enterprise Server instances
- C. helps organization administrators manage security tokens
- **D. helps developers improve and maintain the security and quality of code**

Answer: D

Explanation:

GitHub Advanced Security equips developers with built-in code scanning (CodeQL), secret scanning, dependency review, and other AppSec tools - helping them find, fix, and prevent security vulnerabilities while maintaining code quality.

NEW QUESTION # 63

Which of the following GitHub token types supports fine-grained repository permissions AND is recommended for CI/CD automation?

- A. Device Tokens
- B. Personal Access Tokens (PATs)
- C. OAuth tokens
- **D. GitHub App Installation Access Tokens**

Answer: D

Explanation:

GitHub App Installation Access Tokens are privileged to the exact permissions you grant the App - down to individual repositories - and rotate automatically, making them the recommended choice for CI/CD automation workflows that demand least-privilege, fine-grained access.

NEW QUESTION # 64

You need GitHub to automatically notify a third-party service any time a new repository is created. You want to avoid writing custom code. The vendor has told you that they have a tool in the GitHub Marketplace. Which type of tool do you need?

- A. GitHub Copilot Extension
- B. GitHub Action
- **C. GitHub App**
- D. GitHub Models

Answer: C

Explanation:

You need a GitHub App. Marketplace integrations that listen for events like repository.created and send notifications are delivered as GitHub Apps, since they can subscribe to organization-level webhooks without you writing custom code.

NEW QUESTION # 65

When comparing Group SCIM to Team Sync for identity management in GitHub Enterprise, which statement is Correct?

- A. Group SCIM enables centralized user and group management through the IdP.
- B. Team Sync supports more identity providers than Group SCIM.
- C. Team Sync provides more automated user deprovisioning than Group SCIM.
- D. Group SCIM requires less initial configuration than Team Sync.

Answer: A

Explanation:

GroupSCIM lets you manage both user accounts and group memberships centrally in your identity provider - automatically provisioning, updating, and deprovisioning users and groups in GitHub - whereas TeamSync only mirrors IdP group membership into existing GitHub teams.

NEW QUESTION # 66

What is the key benefit of using a GitHub security advisory within a repository?

- A. It allows maintainers to privately disclose, discuss, and publish vulnerabilities.
- B. It prevents users from cloning the repository until issues are resolved.
- C. It automatically reverts commits that introduced the vulnerability.
- D. It flags all forks of the repository as vulnerable.

Answer: A

Explanation:

GitHub security advisories let maintainers privately disclose, discuss fixes, and then publish vulnerabilities in a controlled manner within the repository.

NEW QUESTION # 67

.....

Latest Microsoft GH-100 Dumps are here to help you to pass your Microsoft Certification exam with PracticeMaterial' valid, real, and updated GH-100 Exam Questions with passing guarantee.
