

# Valid SSE-Engineer Exam Voucher | Reliable SSE-Engineer Exam Materials

DOWNLOAD the newest PassSureExam SSE-Engineer PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=17pazgkamlGkhdqWjS9F4jleMQFGfgab>

For candidates, one of the most important things for you is to know the latest information of the exam. SSE-Engineer Training Materials of us will meet your needs. And our system will send the latest version to you automatically, so that you can know the recent information. We have free update for one year, that is to say, you can get free update version for 365 days after purchasing. In addition, we will pass guarantee and money back guarantee.

## Palo Alto Networks SSE-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Prisma Access Planning and Deployment: This section of the exam measures the skills of Network Security Engineers and covers foundational knowledge and deployment skills related to Prisma Access architecture. Candidates must understand key components such as security processing nodes, IP addressing, DNS, and compute locations. It evaluates routing mechanisms including routing preferences, backbone routing, and traffic steering. The section also focuses on deploying Prisma Access service infrastructure for mobile users using VPN clients or explicit proxy and configuring remote networks. Additional topics include enabling private application access using service connections, Colo-Connect, and ZTNA connectors, implementing identity authentication methods like SAML, Kerberos, and LDAP, and deploying Prisma Access Browser for secure user access.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Prisma Access Administration and Operation: This section of the exam measures the skills of IT Operations Managers and focuses on managing Prisma Access using Panorama and Strata Cloud Manager. It tests knowledge of multitenancy, access control, configuration, and version management, and log reporting. Candidates should be familiar with releasing upgrades and leveraging SCM tools like Copilot. The section also evaluates the deployment of the Strata Logging Service and its integration with Panorama and SCM, log forwarding configurations, and best practice assessments to maintain security posture and compliance.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Prisma Access Troubleshooting: This section of the exam measures the skills of Technical Support Engineers and covers the monitoring and troubleshooting of Prisma Access environments. It includes the use of Prisma Access Activity Insights, real-time alerting, and a Command Center for visibility. Candidates are expected to troubleshoot connectivity issues for mobile users, remote networks, service connections, and ZTNA connectors. It also focuses on resolving traffic enforcement problems including security policies, HIP enforcement, User-ID mismatches, and split tunneling performance issues.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Prisma Access Services:</b> This section of the exam measures the skills of Cloud Security Architects and covers advanced features within Prisma Access. Candidates are assessed on how to configure and implement enhancements like App Acceleration, traffic replication, IoT security, and privileged remote access. It also includes implementing SaaS security and setting up effective policies related to security, decryption, and QoS. The section further evaluates how to create and manage user-based policies using tools like the Cloud Identity Engine and User ID for proper identity mapping and authentication.</li> </ul>

## Reliable SSE-Engineer Exam Materials | SSE-Engineer Latest Braindumps

You can become more competitive force in the job hunting market and you can also improve your ability in the process of getting a certificate. SSE-Engineer study materials of us will help you get the certificate successfully. With experienced experts to compile SSE-Engineer study materials, they are high-quality and accuracy, and you can pass the exam just one time. Moreover, we offer you free demo, and you can have a try before buying SSE-Engineer Exam Dumps, so that you can have a better understanding of what you are going to buy.

### Palo Alto Networks Security Service Edge Engineer Sample Questions (Q39-Q44):

#### NEW QUESTION # 39

How can a network security team be granted full administrative access to a tenant's configuration while restricting access to other tenants by using role-based access control (RBAC) for Panorama Managed Prisma Access in a multitenant environment?

- A. Create a custom role enabling all privileges within the specific tenant's scope and assign it to the security team's user accounts.
- B. Create a custom role with Device Group and Template privileges and assign it to the security team's user accounts.
- C. Set the administrative accounts for the security team to the "Superuser" role.
- **D. Create an Access Domain and restrict access to only the Device Groups and Templates for the Target Tenant.**

**Answer: D**

Explanation:

In a Panorama Managed Prisma Access multitenant environment, Access Domains provide granular role-based access control (RBAC). By defining an Access Domain, the network security team can be granted full administrative privileges for a specific tenant's configuration while ensuring they cannot access or modify other tenants. This method enforces proper segmentation and ensures compliance with multitenant security policies.

#### NEW QUESTION # 40

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

How should Prisma Access be implemented to meet the customer requirements?

- A. Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the specific configuration scope for the connection type to manage access.
- B. Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the Strata Multitenant Cloud Manager Prisma Access configuration scope to manage access.
- **C. Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal**

connection types, and the second with remote networks and private application access for B2B connections - and use the specific configuration scope for the connection type to manage access.

- D. Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the Prisma Access Configuration scope to manage all access.

**Answer: C**

Explanation:

To meet the customer's requirements, two separate Prisma Access instances should be deployed:

\* Instance 1 should include mobile users, remote networks, and private access for internal connectivity.

This ensures that mobile users can access the internet, data centers, and remote branch locations while enforcing security policies.

\* Instance 2 should be configured with remote networks and private application access for B2B connections. This instance will restrict access to only the required internally developed applications using non-standard ports, ensuring that partners cannot access other corporate resources.

By using specific configuration scopes for different connection types, the security team can manage access to mobile users and branch locations, while the network team can manage B2B partner connections. This ensures proper segmentation of management responsibilities while maintaining security and compliance.

#### NEW QUESTION # 41

Based on the image below, which two statements describe the reason and action required to resolve the errors? (Choose two.)

- A. Create a do not decrypt rule for the hostname "certificates.godaddy.com."
- B. The client is misconfigured.
- C. Create a do not decrypt rule for the hostname "google.com."
- D. The server has pinned certificates.

**Answer: C,D**

Explanation:

The error messages indicate that Prisma Access is encountering certificate issues while attempting to decrypt traffic to "google.com."

This suggests that the server has pinned certificates, meaning it does not allow man-in-the-middle (MITM) decryption by Prisma Access.

Since pinned certificates prevent traffic decryption, a solution is to create a "do not decrypt" rule for the hostname

"google.com." This will allow traffic to flow without triggering certificate errors while maintaining secure communication with Google's servers.

#### NEW QUESTION # 42

Which feature can help address a customer concern about the length of time it takes to update their SaaS-allowed IP addresses while onboarding to Prisma Access?

- A. Dynamic IP pooling
- B. Traffic steering
- C. DNS-based load balancing
- D. Dedicated IP addresses

**Answer: B**

Explanation:

When onboarding to Prisma Access, using Dedicated IP addresses helps address concerns about the time required to update SaaS-allowed IP lists. With dedicated egress IPs, the customer receives fixed, predictable IP addresses that do not change dynamically. This eliminates the need to frequently update SaaS providers' allowlists, ensuring seamless access to cloud applications without interruptions due to IP address changes.

#### NEW QUESTION # 43

An engineer deploys a new branch connected to Prisma Access. From the customer premises equipment (CPE) device at the branch, Phase 1 on the tunnel is established, but Phase 2-encrypted packets are not coming back from Prisma Access.

Which Strata Logging Service log facility should the engineer review to determine why Phase 2-encrypted traffic is not being received?

- A. System logs
- B. Traffic logs
- C. Decrypt logs
- **D. Tunnel logs**

**Answer: D**

Explanation:

Since Phase 1 of the IPsec tunnel is established but Phase 2 traffic is not being received, the Tunnel logs in Strata Logging Services should be reviewed. Tunnel logs provide visibility into IPsec tunnel establishment, Phase 2 negotiation, and any errors or dropped packets related to encrypted traffic. This will help identify whether ESP (Encapsulating Security Payload) traffic is being blocked, mismatched security associations (SAs) exist, or if there are other issues with Prisma Access responding to Phase 2-encrypted packets.

#### NEW QUESTION # 44

.....

Once you try our SSE-Engineer exam test, you will be motivated greatly and begin to make changes. Our study questions always update frequently to guarantee that you can get enough test banks and follow the trend in the theory and the practice. That is to say, our product boosts many advantages and to gain a better understanding of our SSE-Engineer question torrent. It is very worthy for you to buy our product. Not only can our study materials help you pass the exam, but also it can save your much time. What are you waiting for? Follow your passion and heart.
