## CIPS Managing Ethical Procurement and Supply (L5M5) L5M5 Prüfungsfragen mit Lösungen (Q88-Q93):

### 88. Frage

XYZ Corporation has been acquired by a global company that plans to centralize all sourcing activities and standardize processes. Which factor could help XYZ Corporation gain a competitive advantage through this centralization?

- A. Efficiency gains that lead to increased productivity and lower prices
- B. Increased due diligence activity resulting in lower governance of suppliers
- C. Ability to use more favorable legislation in different countries and avoid local legal obligations
- **D. Improved benchmarking shared data to provide ability to agree prices with global competitors**

**Antwort: D**

Begründung:

Choice B- Improved benchmarking and shared data can help a company agree on prices with global competitors and gain a competitive advantage. Option B is the correct answer.

Incorrect answer:

Choice A- Legal obligations have to be maintained from wherever the company is operating. Avoiding or adhering to legislations is not a competitive advantage.

Choice C- Competitive advantage can best be described as what sets an organization apart. Increased efficiency is the result of competitive advantage but not a competitive advantage itself.

Choice D- Increased due diligence activity resulting in lower governance of suppliers is not a competitive advantage for XYZ Corporation.

### 89. Frage

Company X's CSR initiatives focus on community support through profit donations to local charities, organizing employee volunteer days, and providing scholarships for underprivileged students. In contrast, its ESG practices prioritize environmental sustainability by reducing its carbon footprint with renewable energy, cutting waste by 20% in five years, and promoting leadership diversity. What distinguishes Company X's CSR initiatives from its ESG practices?

- A. CSR initiatives are mandatory for compliance, while ESG practices are optional
- B. CSR initiatives only involve philanthropic activities, whereas ESG practices focus solely on environmental sustainability
- C. There is no distinction; both CSR and ESG are the same
- **D. CSR initiatives emphasize community support, while ESG practices target environmental sustainability and governance improvements**

**Antwort: D**

Begründung:

Choice A- Correct Answer. This option accurately reflects the difference between CSR and ESG. The CSR initiatives are centered on community support and philanthropic efforts (like donations and volunteer programs) which are basically factors at a top level, while the ESG practices focus on quantifiable goals related to environmental impact and governance structures (such as reducing carbon emissions and ensuring diversity in leadership).

Incorrect answer:

Choice B- This option is misleading. CSR initiatives are generally voluntary efforts that companies undertake to demonstrate social responsibility, while ESG practices can be driven by regulatory requirements in some sectors, but they are often also voluntary.

Many companies adopt ESG standards to attract investors and manage risk, but it's not accurate to categorize CSR as mandatory.

Choice C- This option oversimplifies both concepts. While CSR often includes philanthropic activities, it can also involve ethical labor practices, community engagement, and more. Similarly, ESG encompasses environmental, social, and governance factors, not just environmental sustainability. Therefore, this option doesn't capture the full scope of either concept.

Choice D- This option is incorrect. While CSR and ESG are related and can overlap, they are distinct concepts. CSR focuses more on a company's ethical obligations and contributions to society, while ESG refers to specific metrics like KPI's to assess a company's impact on environmental and social issues and its governance practices.

### 90. Frage

Which of the following could be considered a competitive advantage for a company?

- A. Return on investment
- B. Brand reputation
- C. High profit margin
- **D. Reduced lead times**

**Antwort: D**

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Documents:

A competitive advantage is something that makes one organisation more attractive than its competitors. The L5M5 study guide (p.62) highlights reduced lead times as a clear competitive advantage because customers value speed, reliability, and efficiency in delivery. While high profit margins (B) and ROI (C) are outcomes of strong performance, they do not necessarily attract customers.

Brand reputation (D) is important but is considered a broader intangible asset rather than a direct competitive advantage in procurement. Reduced lead times demonstrate operational excellence, helping procurement gain a strategic edge in the marketplace.

### 91. Frage

Which scenario best illustrates the inclusion of a community benefits clause in a procurement contract?

- A. A procurement contract mandates penalties for late delivery of goods
- B. A supplier is required to adhere to strict environmental standards during project execution
- C. A construction company agrees to use locally sourced materials to reduce costs

- D. A contractor commits to employing a percentage of workers from the local community and offering training programs for skill development

**Antwort: D**

Begründung:

Choice B- A community benefits clause is included in procurement contracts to promote social and economic benefits for local communities. This often includes actions like creating job opportunities, providing training, or supporting local businesses, as described in option B.

Incorrect answer:

Choice A- Focuses on cost reduction rather than community benefits.

Choice C- Relates more to environmental considerations than community development.

Choice D- This option is about enforcement mechanisms, not generating community benefits.

## 92. Frage

SA8000 measures an organisation's social accountability. Which of the following is a disadvantage of this standard?

- A. It is not recognised in some countries
- B. It is industry specific
- C. It is only applicable to larger organisations
- D. It requires a management system which can be costly to implement

**Antwort: D**

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Documents:

SA8000 is an internationally recognised certification standard for social accountability. It requires organisations to adopt management systems to monitor compliance with social standards, including child labour elimination, safe working conditions, and fair wages. According to the L5M5 study guide (p.264), one disadvantage is the cost of implementing and maintaining the management system, which can be resource-intensive for smaller organisations. SA8000 is not industry-specific, is recognised globally, and is applicable to both large and small organisations. However, the investment in audits, training, and compliance documentation can be significant, making this a barrier for some companies.
