Microsoft AZ-140 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Plan and implement identity and security: This section of this particular exam deals with how to plan and implement identity integration, implement and plan security, plan Windows Threat Protection tools and Azure Virtual Desktop session hosts.
Topic 2	<ul style="list-style-type: none"> Plan and implement user environments and apps: This section covers planning and implementing FSLogix, implementing user experience and client settings, and configuring apps on a session host in addition to deploying and managing browsers for Azure Virtual Desktop sessions.
Topic 3	<ul style="list-style-type: none"> Plan and implement an Azure Virtual Desktop infrastructure: The current exam section evaluates the capacity and speed requirements for Azure Virtual Desktop and measures a configuration for network requirements. It also covers how to plan and deploy Azure virtual network connectivity in addition to overseeing connectivity to the internet and on-premises networks. More topics include planning and deploying storage for Azure Virtual Desktop user data, planning host pools and session hosts, and deploying them.
Topic 4	<ul style="list-style-type: none"> Monitor and maintain an Azure Virtual Desktop infrastructure: This section covers how to monitor and manage Azure Virtual Desktop services, deploy, and maintain business community, and design a backup strategy for Azure Virtual Desktop. It also covers setting up backup and restore for FSLogix user profiles, personal virtual desktop infrastructures (VDIs), and golden images.

The AZ-140 Exam is ideal for IT professionals who are looking to enhance their skills and knowledge in the field of virtual desktop infrastructure. It is also suitable for individuals who are new to Azure Virtual Desktop and are looking to gain a solid understanding of the technology and its capabilities.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q88-Q93):

NEW QUESTION # 88

You have an Azure Virtual Desktop deployment that contains a host pool named PoolV. PoolV contains a session host named Computer1 that runs Windows 11 Enterprise multi-session.

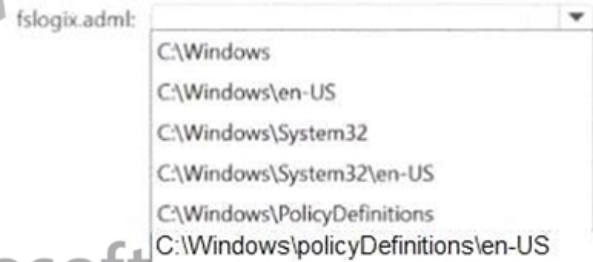

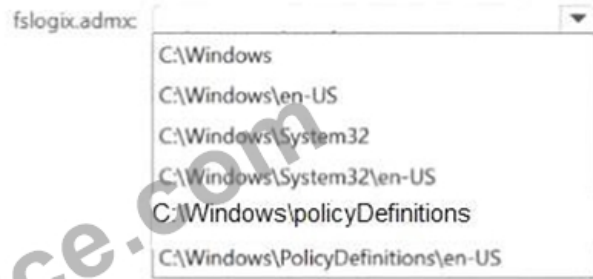

You plan to manage the user profiles of Computer1 by using FSLogix.

You need to use Local Group Policy Editor to configure FSLogix on Computer1 by using the English (United States) version of fslogixadmx and fslogix.adml Group Policy administrative template files.

To which folder on Computer1 should you copy the files? To answer, select the appropriate options in the answer area.

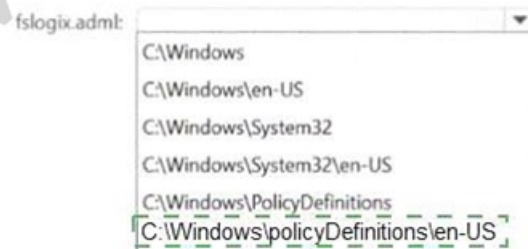

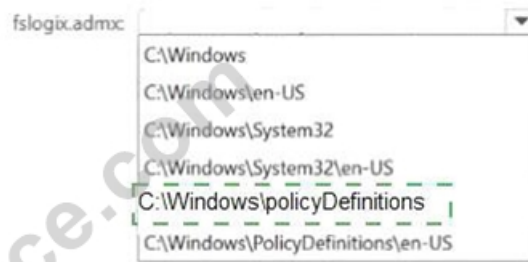

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Explanation:

Answer Area

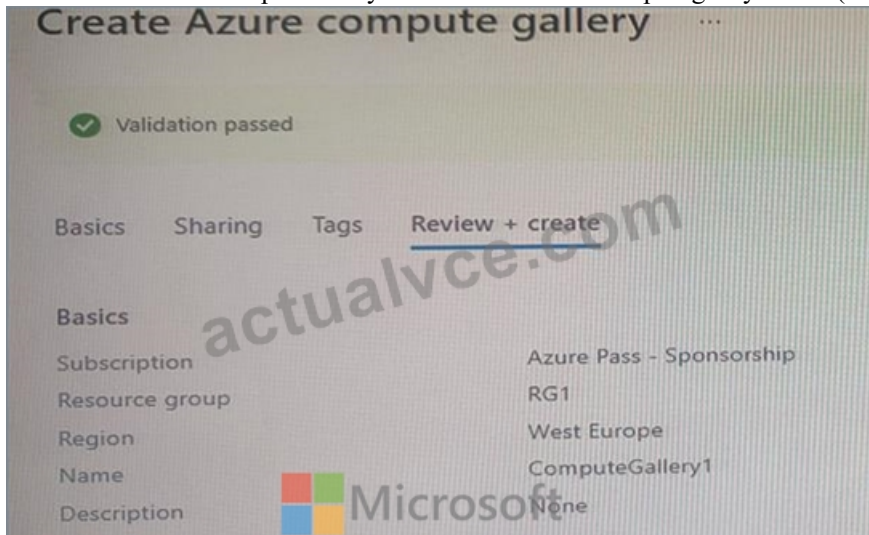

NEW QUESTION # 89

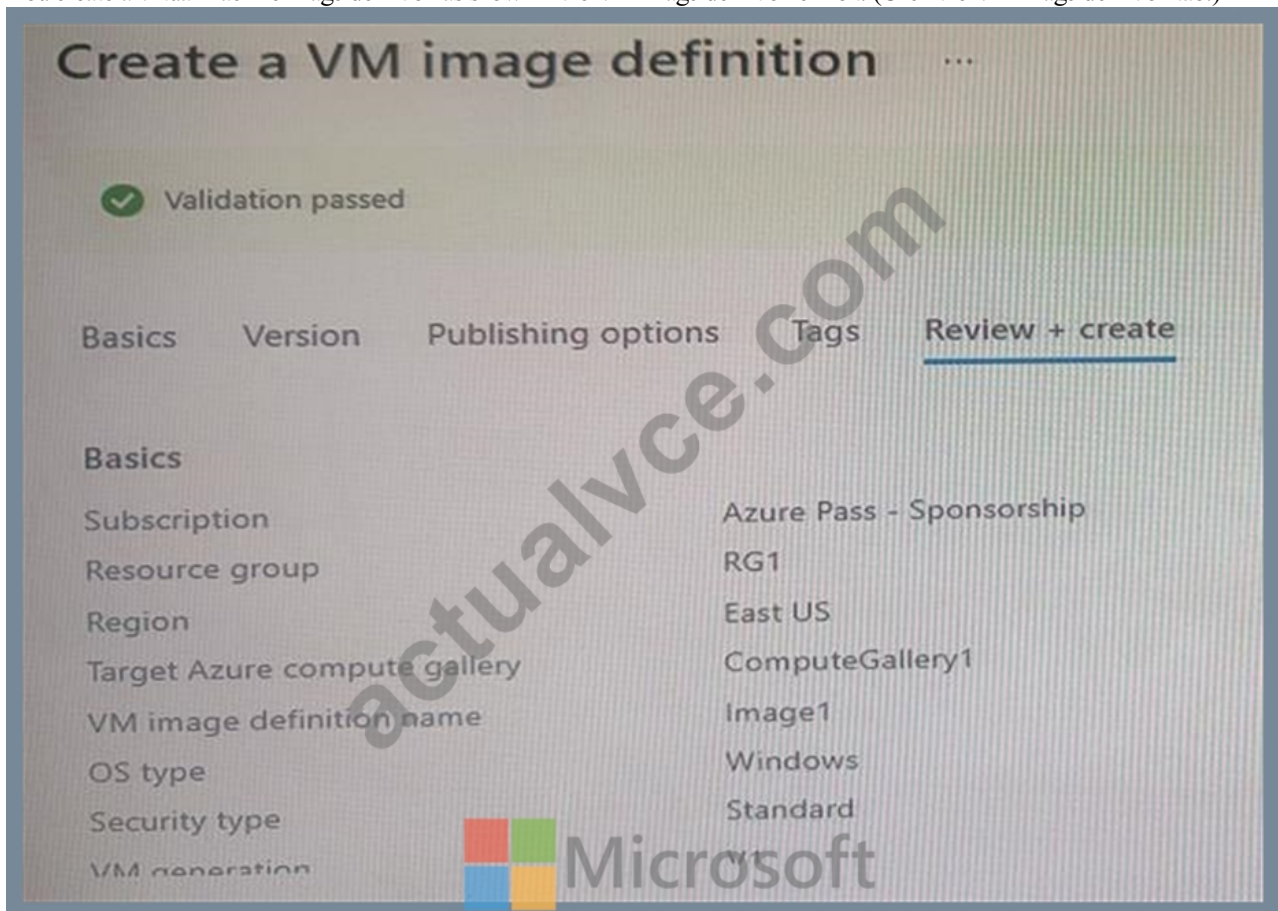

You have an Azure subscription that contains the virtual machines shown in the following table.

Name	Location	vCPUs	Generation
VM1	West Europe	8	2
VM2	East US	2	1
VM3	West US	1	1

You create an Azure Compute Gallery as shown in the Azure compute gallery exhibit. (Click the Azure compute gallery tab.)

You create a virtual machine image definition as shown in the VM image definition exhibit. (Click the VM image definition tab.)

Question	Azure compute gallery	VM image definition
Publisher	Contoso	
Offer	WindowsServer2022	
SKU	Datacenter	
Publishing options		
Product name	None	
License terms link	None	
Description	None	
Release notes URI	None	
Privacy terms URI	None	
Purchase plan name	None	
Purchase plan publisher name	None	
Recommended VM vCPUs	4-16	
Recommended VM memory	1-32 GB	
Excluded disk types	None	
VM image definition end of life date	None	

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
You can use VM1 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>
You can use VM2 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>
You can use VM3 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
You can use VM1 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>
You can use VM2 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>
You can use VM3 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION # 90

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. Pool1 contains three session hosts. You need to implement a private endpoint connection for Pool1.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a private endpoint by using the connection target sub-resource.
- B. Reregister the Microsoft.DesktopVirtualization resource provider for the Azure subscription.
- C. Create a private endpoint by using the global target sub-resource.
- D. Reregister the Microsoft.virtualMachinesImages resource provider for the Azure subscription.
- E. Create a private endpoint by using the feed target sub-resource.

Answer: A,B

NEW QUESTION # 91

You plan to deploy Windows Virtual Desktop.

Users have the devices shown in the following table.

Type	Platform
Tablet	Windows 10 Pro
Phone	Android
Laptop	macOS

From which device types can the users connect to Windows Virtual Desktop resources by using the Remote Desktop client app and the Remote Desktop web client? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows two dropdown menus. The first is labeled 'Remote Desktop client app.' and the second is labeled 'Remote Desktop web client:'. Both menus have four options: 'Tablet only', 'Tablet and phone only', 'Tablet and laptop only', and 'Tablet, phone, and laptop'. In the original image, the 'Tablet and laptop only' option in both menus is highlighted with a green dashed box, indicating it is the correct selection.

Answer:

Explanation:

This is a detailed view of the selection interface. It shows the 'Remote Desktop client app:' dropdown with 'Tablet and laptop only' selected, and the 'Remote Desktop web client:' dropdown with 'Tablet and laptop only' selected. Green dashed boxes highlight the selected options in both dropdowns.

NEW QUESTION # 92

You have an Azure Virtual Desktop deployment that uses Azure Active Directory Domain Services (Azure AD DS). You have the following host pool:

* Name: Pool1

* Type: Personal

* Number of session hosts: 5

You plan to deploy two new session hosts to Pool1. What should you do before you deploy the session hosts?

- A. Precreate a computer account in Azure AD DS.
- B. Increase the maximum session limit.
- C. Create a registration key.
- D. Create a scaling plan.

Answer: A

Explanation:

This is done by using the Add-AzDomainComputer cmdlet in PowerShell. After the computer accounts have been created, the new session hosts can be deployed. For more information, please refer to the following Microsoft documentation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-session-host-pools#precreate-computer-accounts-in-azure-ad-ds>.
