

CAS-004 Real Exam Questions, Test CAS-004 Vce Free

P.S. Free & New CAS-004 dumps are available on Google Drive shared by Prep4sureExam: https://drive.google.com/open?id=1r24vgr88Kk2djT4YU_hesTcPv-TVjkrG

Please believe us that our CAS-004 torrent question is the best choice for you, The high pass rate of our CAS-004 exam prep is 99% to 100%, These free updates will help you study as per the CompTIA CAS-004 latest examination content, Passing an exam isn't an easy thing for some candidates, if you choose the CAS-004 training materials of us, we will make the exam easier for you, CompTIA CAS-004 Vce Format Nowadays the competition in the job market is fiercer than any time in the past.

Once you see the halo, reduce the setting until the halo has been diminished, (<https://www.prep4sureexam.com/CAS-004-dumps-torrent.html>) The difference between them is subtle, While the financial risks are relatively low, the potential return is limited to the royalty stream.

Download CAS-004 Exam Dumps

The next step is to send it to an approver to either approve the task or reject it, As well as our after-sales services, Please believe us that our CAS-004 torrent question is the best choice for you.

The high pass rate of our CAS-004 exam prep is 99% to 100%, These free updates will help you study as per the CompTIA CAS-004 latest examination content.

Passing an exam isn't an easy thing for some candidates, if you choose the CAS-004 training materials of us, we will make the exam easier for you, Nowadays the competition in the job market is fiercer than any time in the past.

CAS-004 Vce Format & Reliable CAS-004 Exam Materials - CAS-004 Latest Test Labs

P.S. Free & New CAS-004 dumps are available on Google Drive shared by PrepAwayPDF: <https://drive.google.com/open?id=1NJpjLKT1vMloMqQ0jX-Hq31kn2pTVqGq>

Remember that this is a crucial part of your career, and you must keep pace with the changing time to achieve something substantial in terms of a certification or a degree. So do avail yourself of this chance to get help from our exceptional CompTIA CAS-004 Dumps to grab the most competitive CompTIA CAS-004 certificate. PrepAwayPDF has formulated the CompTIA Advanced Security Practitioner (CASP+) Exam (CAS-004) product in three versions. You will find their specifications below to understand them better.

CompTIA CAS-004 is an advanced level certification exam that validates the skills and knowledge of IT professionals in cybersecurity. CAS-004 exam is designed for those who are seeking to advance their careers in the field of cybersecurity by demonstrating their ability to configure and implement security solutions that protect against various cyber threats. CAS-004 exam is intended for security professionals with at least 5 years of experience in the field.

CompTIA CAS-004 (CompTIA Advanced Security Practitioner (CASP+)) Certification Exam is designed for IT professionals who are responsible for advanced-level security practices in their organizations. CAS-004 Exam is a vendor-neutral certification that provides the necessary skills and knowledge to design, implement, and manage complex security solutions. CAS-004 exam is intended for professionals who have a minimum of 10 years of experience in IT administration, including at least 5 years of hands-on technical security experience.

Test CAS-004 Vce Free, Reliable CAS-004 Exam Sample

before making a choice, you can download a trial version of CAS-004 preparation materials. After you use it, you will have a more complete understanding of this CAS-004 exam questions. In this way, you can use our CAS-004 study materials in a way that suits your needs and professional opinions. We hope you will have a great experience with CAS-004 Preparation materials. At the same time, we also hope that you can realize your dreams with our help. We will be honored.

CompTIA CAS-004 exam covers a range of advanced cybersecurity topics, including enterprise security architecture, security operations and incident response, research and analysis, integration of computing, communications, and business disciplines, technical integration of enterprise components, and risk management. CAS-004 Exam consists of 90 multiple-choice and performance-based questions, and candidates have 165 minutes to complete the exam.

CompTIA Advanced Security Practitioner (CASP+) Exam Sample Questions (Q530-Q535):

NEW QUESTION # 530

An organization found a significant vulnerability associated with a commonly used package in a variety of operating systems. The organization develops a registry of software dependencies to facilitate incident response activities. As part of the registry, the organization creates hashes of packages that have been formally vetted. Which of the following attack vectors does this registry address?

- A. Side-channel analysis
- **B. Supply chain attack**
- C. Pass-the-hash attack
- D. Cipher substitution attack
- E. On-path attack

Answer: B

NEW QUESTION # 531

An application server was recently upgraded to prefer TLS 1.3, and now users are unable to connect their clients to the server. Attempts to reproduce the error are confirmed, and clients are reporting the following:

ERR_SSL_VERSION_OR_CIPHER_MISMATCH

Which of the following is MOST likely the root cause?

- A. The client application is configured to use AES-256 in GCM.
- B. The client application is testing PFS.
- **C. The client application is configured to use RC4.**
- D. The client application is configured to use ECDHE.

Answer: C

Explanation:

Reference:

The client application being configured to use RC4 is the most likely root cause of why users are unable to connect their clients to the server that prefers TLS 1.3. RC4 is an outdated and insecure symmetric-key encryption algorithm that has been deprecated and removed from TLS 1.3, which is the latest version of the protocol that provides secure communication between clients and servers. If the client application is configured to use RC4, it will not be able to negotiate a secure connection with the server that prefers TLS 1.3, resulting in an error message such as ERR_SSL_VERSION_OR_CIPHER_MISMATCH. The client application testing PFS (perfect forward secrecy) is not a likely root cause of why users are unable to connect their clients to the server that prefers TLS 1.3, as PFS is a property that ensures that session keys derived from a set of long-term keys cannot be compromised if one of them is compromised in the future. PFS is supported and recommended by TLS 1.3, which uses ephemeral Diffie-Hellman or elliptic curve Diffie-Hellman key exchange methods to achieve PFS. The client application being configured to use ECDHE (elliptic curve Diffie-Hellman ephemeral) is not a likely root cause of why users are unable to connect their clients to the server that prefers TLS 1.3, as ECDHE is a key exchange method that provides PFS and high performance by using elliptic curve cryptography to generate ephemeral keys for each session. ECDHE is supported and recommended by TLS 1.3, which uses ECDHE as the default key exchange method. The client application being configured to use AES-256 in GCM (Galois/Counter Mode) is not a likely root cause of why users are unable to connect their clients to the server that prefers TLS 1.3, as AES-256 in GCM is an encryption mode that provides confidentiality and integrity by using AES with a 256-bit key and GCM as an authenticated encryption mode. AES-256 in

GCM is supported and recommended by TLS 1.3, which uses AES-256 in GCM as one of the default encryption modes. Verified Reference: <https://www.comptia.org/blog/what-is-tls-13> <https://partners.comptia.org/docs/default-source/resources/casp-content-guide>

NEW QUESTION # 532

An IPSec solution is being deployed. The configuration files for both the VPN concentrator and the AAA server are shown in the diagram.

Complete the configuration files to meet the following requirements:

- * The EAP method must use mutual certificate-based authentication (With issued client certificates).
- * The IKEv2 Cipher suite must be configured to the MOST secure authenticated mode of operation,
- * The secret must contain at least one uppercase character, one lowercase character, one numeric character, and one special character, and it must meet a minimum length requirement of eight characters, INSTRUCTIONS Click on the AAA server and VPN concentrator to complete the configuration.

Fill in the appropriate fields and make selections from the drop-down menus.

VPN Concentrator:

AAA Server:

Answer:

Explanation:

See the answer below in Explanation.

Explanation:

VPN Concentrator:

AAA Server:

NEW QUESTION # 533

A security engineer is re-architecting a network environment that provides regional electric distribution services. During a pretransition baseline assessment, the engineer identified the following security-relevant characteristics of the environment:

- * Enterprise IT servers and supervisory industrial systems share the same subnet.
- * Supervisory controllers use the 750MHz band to direct a portion of fielded PLCs.
- * Command and telemetry messages from industrial control systems are unencrypted and unauthenticated.

Which of the following re-architecture approaches would be best to reduce the company's risk?

- A. Implement a one-way guard between enterprise IT services and mission-critical systems, obfuscate legitimate RF signals by broadcasting noise, and implement modern protocols to authenticate ICS messages.
- **B. Create a new network segment for enterprise IT servers, configure NGFW to enforce a well-defined segmentation policy, and implement a WIDS to monitor the spectrum.**
- C. Segment supervisory controllers from field PLCs, disconnect the entire network from the internet, and use only the 750MHz link for controlling energy distribution services.
- D. Characterize safety-critical versus non-safety-critical systems, isolate safety-critical systems from other systems, and increase the directionality of RF links in the field.

Answer: B

Explanation:

The best approach to reduce the company's risk is to segregate the enterprise IT servers and supervisory industrial systems.

Creating a new network segment and using a Next-Generation Firewall (NGFW) to enforce a strict segmentation policy will help to isolate the systems and protect against potential attacks. Additionally, implementing a Wireless Intrusion Detection System (WIDS) can help monitor the spectrum for unauthorized devices or interference.

NEW QUESTION # 534

A security analyst discovered that the company's WAF was not properly configured. The main web server was breached, and the following payload was found in one of the malicious requests:

Which of the following would BEST mitigate this vulnerability?

- A. CAPTCHA
- B. Network intrusion prevention
- C. Data encoding
- **D. Input validation**

Answer: D
