Many people are afraid that after they buy our EAEP2201 guide torrent they may fail in the exam and the refund procedure will be very complicated. We guarantee to you that the refund process is very simple and only if you provide us the screenshot or the scanning copy of your failure marks we will refund you in full immediately. If you have doubts or problems about our EAEP2201 Exam Torrent, please contact our online customer service or contact us by mails and we will reply and solve your problem as quickly as we can. We won't waste your money and your time and if you fail in the exam we will refund you in full immediately at one time. We provide the best EAEP2201 questions torrent to you and don't hope to let you feel disappointed.

Esri EAEP2201 Exam is a comprehensive assessment of an individual's understanding of ArcGIS Enterprise. To take the exam, individuals must have prior experience with ArcGIS Enterprise administration, including deploying and configuring the ArcGIS Server, Portal for ArcGIS, and ArcGIS Data Store. Enterprise Administration Professional 2201 certification also requires proficiency in creating and managing services, configuring security and authorization permissions, and managing users, groups and content.

To prepare for the Esri EAEP2201 Certification Exam, individuals are encouraged to take Esri's Enterprise Administration with ArcGIS course, which covers the topics covered in the exam. Additionally, individuals can use Esri's online resources, such as the ArcGIS Enterprise documentation, to further prepare for the exam.

Test EAEP2201 Simulator & Leading Offer in Qualification Exams & EAEP2201 Learning Mode

Many people are afraid of walking out of their comfortable zones. So it is difficult for them to try new things. But you will never grow up if you reject new attempt. Now, our EAEP2201 study materials can help you have a positive change. It is important for you to keep a positive mind. Our EAEP2201 Study Materials can become your new attempt. It is not difficult for you. We have simplified all difficult knowledge. So you will enjoy learning our EAEP2201 study materials. During your practice of our EAEP2201 study materials, you will find that it is easy to make changes.

Esri EAEP2201 (Enterprise Administration Professional 2201) Certification Exam is a comprehensive assessment of an individual's knowledge and skills in the field of enterprise administration using Esri technology. EAEP2201 exam is designed for professionals who have experience in administering enterprise ArcGIS systems and are looking to validate their expertise. It is a globally recognized certification that demonstrates proficiency in enterprise administration, and successful completion of the exam demonstrates that the individual has the knowledge and skills required to manage complex, large-scale ArcGIS installations.

Esri Enterprise Administration Professional 2201 Sample Questions (Q45-Q50):

NEW QUESTION # 45

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Batch delete users with ArcPy
- B. Use command line utilities
- C. Delete users using the Member tab

Answer: A

NEW QUESTION # 46

A GIS administrator must automate certain data workflows and administrative tasks in ArcGIS Enterprise.

The administrator must meet several requirements:

- * The processes and methods must be well and thoroughly documented
 - * An option must be provided to modify the processes on the fly
 - * Scripts and processes must be shared to different individuals throughout the ArcGIS Enterprise organization
- Which ArcGIS Server role should be used to meet these requirements?

- A. ArcGIS Workflow Manager Server
- B. ArcGIS GeoEvent Server
- C. ArcGIS Notebook Server

Answer: A

NEW QUESTION # 47

An organization has an ArcGIS Enterprise deployment but does not have access to ArcGIS Online. The GIS administrator wants to create a web page that is easy to navigate by non-GIS users but allows these users to interact with, download, and create apps from data.

Which option should the GIS administrator use?

- A. ArcGIS Hub
- B. ArcGIS Experience Builder
- C. ArcGIS Enterprise Sites

Answer: C

Explanation:

ArcGIS Enterprise Sites is a capability within ArcGIS Enterprise that enables organizations to create tailored web pages for sharing data and content. These sites are designed to be user-friendly for non-GIS users, allowing them to interact with, download, and create applications from the organization's data. Since the organization does not have access to ArcGIS Online, ArcGIS Enterprise Sites provides the necessary functionality within their existing deployment.

ArcGIS Hub (Option A) is a separate product that requires ArcGIS Online. ArcGIS Experience Builder (Option B) is a tool for creating web applications but does not provide the comprehensive site-building capabilities needed for this scenario.

Reference Source: ArcGIS Enterprise documentation on Sites

NEW QUESTION # 48

A GIS administrator must automate certain data workflows and administrative tasks in ArcGIS Enterprise.

The administrator must meet several requirements:

- * The processes and methods must be well and thoroughly documented
 - * An option must be provided to modify the processes on the fly
 - * Scripts and processes must be shared to different individuals throughout the ArcGIS Enterprise organization
- Which ArcGIS Server role should be used to meet these requirements?

- A. ArcGIS Workflow Manager Server
- B. ArcGIS GeoEvent Server
- C. ArcGIS Notebook Server

Answer: C

Explanation:

ArcGIS Notebook Server provides an integrated platform to create, share, and run data science, data management, and administrative scripts. It allows users to write, document, and run Python code in one place, facilitating well-documented processes. The interactive nature of notebooks enables users to modify processes on the fly. Additionally, notebooks can be shared across the organization, allowing different individuals to access and run the scripts as needed.

ArcGIS Workflow Manager Server is designed for managing and automating GIS workflows but does not provide the same level of flexibility for scripting and documentation. ArcGIS GeoEvent Server is intended for real-time data processing and event detection, which does not align with the requirements outlined.

Reference Source: ArcGIS Enterprise documentation on ArcGIS Notebook Server capabilities and use cases.

NEW QUESTION # 49

A GIS administrator has a group of users who share maintenance responsibilities for a critical application.

The administrator needs to allow all users to edit the application without transferring ownership.

Which option should the administrator use?

- A. A public group
- B. A collaboration group
- C. A shared update group
- D. An administrative group

Answer: C

Explanation:

A shared update group allows group members to edit each other's items without needing to transfer ownership. This is ideal for collaborative editing and shared responsibility for applications, maps, or dashboards.

From Esri documentation:

"Shared update groups allow multiple members to update items shared with the group, even if they do not own the items."

* Option B doesn't exist as a group type in ArcGIS Enterprise.

* Option C allows viewing, but not editing others' content.

* Option D applies to distributed collaboration, not shared editing.
