Our SAP Certified Professionals make sure that C_BCBTM_2509 exam questions cover all core exam topics, allowing you to better understand the important exam topics.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q13-Q18):

NEW QUESTION # 13

What is the primary benefit of using SAP Business Transformation Management solutions early in a RISE project?
(Note: There are 2 correct answers to this question.)

- A. They automate non-critical business functions without supporting overall ERP transformation.
- B. The earlier the solutions are leveraged in a transformation project, the more value they can generate.

- C. They are primarily focused on human resources management.
- **D. They make ERP transformations more cost efficient by providing faster insights into operations.**

Answer: B,D

Explanation:

Leveraging SAP Business Transformation Management (BTM) Solutions early in a RISE with SAP project allows organizations to gain critical insights into their existing processes, applications, and technology landscape. This helps accelerate transformation readiness and reduces rework during design and implementation.

"Early adoption of SAP BTM Solutions within RISE projects maximizes value by providing transparency and actionable insights into business processes and IT landscapes, ensuring cost-efficient and faster ERP transformation." Reference:

Early Value Realization (Answer A):

The earlier BTM tools such as SAP Signavio, SAP LeanIX, and WalkMe are applied, the faster organizations can identify inefficiencies and define transformation scope, which increases long-term value generation.

"The earlier SAP BTM tools are introduced, the more transformation value can be realized through early visibility, stakeholder alignment, and optimized process design." Cost Efficiency through Faster Insights (Answer B):

SAP BTM solutions provide data-driven visibility into as-is processes and dependencies, enabling companies to reduce transformation costs by addressing inefficiencies early.

"SAP BTM enables customers to accelerate decision-making and reduce transformation cost and effort through real-time operational insights." Incorrect Options:

C: BTM solutions do not focus on non-critical automation; they support end-to-end ERP transformation.

D: They are not specific to HR; they span all business domains (Finance, Supply Chain, IT, etc.).

Therefore, the verified and correct answers are:

A: The earlier the solutions are leveraged in a transformation project, the more value they can generate.

B: They make ERP transformations more cost efficient by providing faster insights into operations.

NEW QUESTION # 14

How does the integration between SAP Signavio and SAP LeanIX enhance IT and business alignment?

- A. Integration solely enhances reporting capabilities.
- **B. The integration allows linking of business applications to business processes.**
- C. The tools only provide visualization without actionable insights.
- D. Business processes are directly controlled by SAP LeanIX applications.

Answer: B

Explanation:

The integration between SAP Signavio and SAP LeanIX provides a unified view of business and IT, allowing companies to connect business processes (Signavio) with IT applications and systems (LeanIX). This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise architecture insights (how IT supports it).

"SAP enables enterprises to visualize dependencies between processes and applications, ensuring coordinated decision-making and improved transformation outcomes." Incorrect Options:

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.

B: Both tools provide actionable insights via analytics and process intelligence.

C: LeanIX does not "control" processes; it maps IT dependencies and applications.

Verified Correct answer: D: The integration allows linking of business applications to business processes.

NEW QUESTION # 15

What are the main use cases for SAP Signavio and SAP LeanIX solutions?

- A. Enhancing customer service and managing digital supply chain.
- B. Improving financial management and material management.
- **C. Enabling business transformation and continuous excellence.**
- D. Expanding product offerings and portfolio management.

Answer: C

Explanation:

The SAP Signavio and SAP LeanIX solutions are foundational components of SAP Business Transformation Management (BTM). Their main purpose is to enable enterprise-wide transformation, continuous optimization, and operational excellence by connecting business processes and IT architecture.

"The combined use of SAP Signavio and SAP LeanIX empowers organizations to enable business transformation through a comprehensive view of processes, applications, and technology, driving continuous excellence and improvement." Reference: SAP Signavio provides business process intelligence, while SAP LeanIX delivers enterprise architecture transparency. Together, they support organizations in transforming operations, modernizing IT landscapes, and achieving long-term performance improvement.

"SAP Signavio and SAP LeanIX support use cases centered around continuous business transformation, providing insights that align business goals with IT strategies." Incorrect Options:

B: Product portfolio management is managed under SAP PLM, not BTM solutions.

C: Supply chain management is covered by SAP Digital Supply Chain applications, not LeanIX or Signavio.

D: Financial and material management belong to SAP S/4HANA core ERP modules.

Verified Correct answer: A: Enabling business transformation and continuous excellence.

NEW QUESTION # 16

How does the SAP Signavio Process Collaboration Hub help organizations?

- A. By automatically generating legal compliance reports and enabling collaboration.
- **B. By providing transparency into processes and enabling collaboration.**
- C. By creating marketing strategies based on customer feedback.
- D. By replacing existing process modeling tools with AI-driven automation.

Answer: B

Explanation:

The SAP Signavio Process Collaboration Hub is designed to make business processes transparent and accessible across the organization while fostering collaboration among stakeholders.

"The SAP Signavio Process Collaboration Hub provides a central entry point for all users to access, share, and collaborate on process-related information, offering transparency across business processes." Reference:

It allows employees, analysts, and management to view, discuss, and contribute to process improvement initiatives, supporting collaborative transformation and process governance.

"It enables everyone in the organization to access process information, provide feedback, and collaborate for continuous improvement." Options A, C, and D are incorrect:

A: Compliance reporting is not a function of Collaboration Hub.

C: Marketing strategy and customer feedback analysis are outside its purpose.

D: It does not replace modeling tools; it integrates with Process Manager and Process Intelligence.

Thus, the correct and SAP-verified answer is B: By providing transparency into processes and enabling collaboration.

NEW QUESTION # 17

What are the core solutions provided by SAP LeanIX?

(Note: There are 2 correct answers to this question.)

- A. SAP Signavio Journey Modeler
- **B. Enterprise Architecture Management**
- **C. Technology Risk and Compliance**
- D. SAP Commerce Cloud

Answer: B,C

Explanation:

SAP LeanIX is an integral part of SAP's Business Transformation Management (BTM) portfolio. It provides visibility and control over an organization's IT landscape, supporting enterprise architecture, technology risk management, and transformation planning.

"SAP LeanIX delivers comprehensive Enterprise Architecture Management (EAM) and Technology Risk and Compliance capabilities that enable organizations to align IT with business goals and manage technology landscapes efficiently." Reference:

Enterprise Architecture Management (Answer B):

This solution allows organizations to document, visualize, and analyze their application and technology landscape to support informed decision-making during transformation.

"With Enterprise Architecture Management, customers gain transparency into their application portfolios, dependencies, and business capabilities to optimize transformation efforts." Technology Risk and Compliance (Answer D):

This module helps identify and mitigate technology-related risks, ensuring compliance with internal and external standards while maintaining operational resilience.

"Technology Risk and Compliance enables continuous monitoring of technology standards, risks, and compliance requirements to maintain stability during business transformation." Incorrect Options:

A (SAP Signavio Journey Modeler) belongs to the SAP Signavio suite, not LeanIX.

C (SAP Commerce Cloud) is part of SAP Customer Experience (CX) solutions, unrelated to LeanIX's transformation and architecture management focus.

Therefore, the correct and verified answers from SAP BTM documentation are:

B: Enterprise Architecture Management

D: Technology Risk and Compliance

NEW QUESTION # 18

.....

In addition to the PDF questions FreeDumps offers desktop SAP Certified Associate - Positioning SAP Business Transformation Management Solutions (C_BCBTM_2509) practice exam software and web-based SAP Certified Associate - Positioning SAP Business Transformation Management Solutions (C_BCBTM_2509) practice exam, to help you cope with SAP Certified Associate - Positioning SAP Business Transformation Management Solutions (C_BCBTM_2509) exam anxiety.
