Valid DEP-2025 Exam Question, DEP-2025 Exam Materials

PracticeVCE Apple Deployment and Management Exam (DEP-2025) questions in three formats is an invaluable resource for preparing for the DEP-2025 exam and achieving the Apple certification. With customizable DEP-2025 practice exams, up-to-date

DEP-2025 questions, and user-friendly formats, PracticeVCE is the perfect platform for clearing the Apple DEP-2025 test. So, try the demo version today and unlock the full potential of PracticeVCE Apple Deployment and Management Exam (DEP-2025) exam dumps after payment, taking one step closer to your career goals.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 2	• Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 3	• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 4	• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 5	• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 6	• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 7	• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 8	• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 9	• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 10	• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 11	• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.

Apple Deployment and Management Exam Sample Questions (Q132-Q137):

NEW QUESTION # 132
Which common technology is Enterprise SSO (Single Sign-On) in iOS, iPadOS, and macOS based on?

* A. Gatekeeper

- B. Kerberos
- C. Keychain
- D. Passkeys

Answer: B

Explanation:
Enterprise SSO leverages Kerberos. TheApple Platform Deployment Guidestates, "Enterprise Single Sign-On in iOS, iPadOS, and macOS is based on Kerberos, enabling seamless authentication to enterprise resources." Options B, C, and D serve different purposes.
References:
Apple Platform Deployment Guide, "SSO" section.
macOS Security Overview, "Authentication" section.

NEW QUESTION # 133
What links a device to an MDM solution?

- A. An enrollment profile
- B. APNs
- C. A firewall
- D. A restriction

Answer: A

Explanation:
Mobile Device Management (MDM) solutions are used to manage and secure Apple devices remotely. To link a device to an MDM solution, an enrollment profile is required. This profile is a configuration file that, once installed on the device, establishes a connection between the device and the MDM server, allowing the server to send commands and policies to the device. The enrollment profile contains information such as the MDM server's URL and authentication details, enabling secure communication via Apple Push Notification service (APNs). While APNs (option A) facilitates communication between the MDM server and the device after enrollment, it is not the mechanism that links the device to the MDM solution. A firewall (option B) is a network security tool and unrelated to linking a device to MDM, and a restriction (option C) is a policy applied via MDM, not the linking mechanism itself. According to Apple's official documentation, such as the Apple Platform Deployment Guide, the enrollment profile is the foundational step for MDM enrollment.

NEW QUESTION # 134
What happens when a user doesn't install a managed software update after the deadline passed on Mac?

- A. All update notifications are disabled to reduce user distraction.
- B. Users receive notifications that the update is now overdue and needs immediate attention.
- C. Users receive a reminder that they can still defer the update for up to 30 days.
- D. The update automatically installs without user intervention if the deadline is missed.

Answer: D

Explanation:
Apple'smanaged software updatesallow MDM administrators to enforce deadlines for macOS upgrades or patches. Apple Learning specifies that if the user does not manually install the update before the deadline, theupdate installs automatically. This occurs regardless of user activity, ensuring the Mac is brought into compliance. Users may receive reminders before the deadline, but once the deadline passes, the update is forced to install. This guarantees that security patches or new OS versions are not indefinitely delayed by end- user inaction. Notifications are not suppressed, and there is no 30-day deferral once a deadline is in effect.
The entire purpose of this mechanism is to ensure organizations can enforce timely compliance with critical security or functional updates.

NEW QUESTION # 135
What's the benefit of using User Enrollment?

- A. Separates personal and managed data
- B. Simplifies device setup
- C. Enables app license management
- D. Allows additional restrictions

Answer: A

Explanation:
User Enrollment, designed for Bring Your Own Device (BYOD) scenarios, separates personal and managed data on a device using a cryptographic boundary. This ensures organizational policies (e.g., managed apps, email) are isolated from personal content (e.g., photos, personal apps), protecting user privacy while allowing management. Additional restrictions (option A) are a supervision feature, not User Enrollment. App license management (option B) is tied to Managed Distribution, not enrollment type. Simplified setup (option D) aligns with ADE, not User Enrollment. TheApple Platform Deployment Guidehighlights data separation as User Enrollment's key benefit.
Reference:Apple Platform Deployment Guide(Chapter: User Enrollment).

NEW QUESTION # 136
What is required to use Managed Lost Mode?

- A. Managed Apple Account
- B. Activation Lock
- C. Find My
- D. Supervision

Answer: D

Explanation:
Supervision is required for Managed Lost Mode. The iOS Deployment Reference states, "Managed Lost Mode is an MDM feature available only on supervised devices, allowing administrators to lock and locate lost devices." Reference:
iOS Deployment Reference, "Managed Lost Mode" section.
Mobile Device Management Protocol Reference, "Lost Mode Requirements" section.

NEW QUESTION # 137
......

We know that DEP-2025 exam is very important for you working in the IT industry, so we developed the DEP-2025 test software that will bring you a great help. All exam materials you you need are provided by our team, and we have carried out the scientific arrangement and analysis only to relieve your pressure and burden in preparation for DEP-2025 Exam.
