## Sample Questions (Q62-Q67):

### NEW QUESTION # 62

Your client uses product categories and global sourcing rules for supply planning. However, their newest product doesn't follow these rules. For a specific item in the category, it needs to be sourced from a different supplier globally. How should they set this up for the easiest maintenance, going forward?

- A. Create a new global sourcing rule for the item; assign it to the assignment set at the item-organization level; leave the category as is for the remainder of the products.
- **B. Create a new global sourcing rule for the item; assign it to the assignment set at the item level; leave the category as is for the remainder of the products.**
- C. Create a new local sourcing rule for the item; assign it to the assignment set at the item level; leave the category as is for the remainder of the products.
- D. Create a new global sourcing rule for the item; remove the category level assignments and create new item level assignments for all items in the category pointing each to the correct global sourcing rule.
- E. Create a new global sourcing rule for the item; assign it to the assignment set at the item-organization level; alter the category to be category-organization for the remainder of the products.

**Answer: B**
