

# Clear the API API-936 Exam with VCEDumps

DOWNLOAD the newest VCEDumps API-936 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1RZKS3u5jkkhrSoF\\_UjtKzh06SYFqRWGZ](https://drive.google.com/open?id=1RZKS3u5jkkhrSoF_UjtKzh06SYFqRWGZ)

Just the same as the free demo, we have provided three kinds of versions of our API-936 preparation exam, among which the PDF version is the most popular one. It is understandable that many people give their priority to use paper-based API-936 Materials rather than learning on computers, and it is quite clear that the PDF version is convenient for our customers to read and print the contents in our API-936 study guide.

With our API-936 exam materials, you will find that the difficult topics have been given special attention by our professional experts and explained with the help of examples, simulations and graphs. Our API-936 study braindumps will certainly help candidates to enrich their knowledge in their daily work and be ready to answer all questions in the real exam. The benefits of studying our API-936 learning guide is doubled to your expectation.

## Reliable API-936 Test Pass4sure - Best API-936 Study Material

We believe that one of the most important things you care about is the quality of our API-936 exam materials, but we can ensure that the quality of it won't let you down. Many candidates are interested in our API-936 exam materials. What you can set your mind at rest is that the API-936 exam materials are very high quality. API-936 exam materials draw up team have a strong expert team to constantly provide you with an effective training resource. They continue to use their rich experience and knowledge to study the real exam questions of the past few years, to draw up such an exam materials for you. In other words, you can never worry about the quality of API-936 Exam Materials, you will not be disappointed.

### API Refractory Personnel Sample Questions (Q69-Q74):

#### NEW QUESTION # 69

Hydration is the process that causes refractory concrete to:

- A. become formable.
- B. dry out.
- C. resist heat.
- D. **develop green strength.**

**Answer: D**

Explanation:

Hydration refers to the chemical reaction between water and cement components in refractory concretes (hydraulic bonded castables), resulting in the formation of calcium-aluminate hydrates, which are responsible for initial strength-known as green strength. This strength enables the lining to be demolded and eventually dried without mechanical failure.

Hydration is not related to final heat resistance or dryout; those come later during the firing or heat-up stages. It is distinct from setting in air-setting refractories or sintering in ceramic-bonded types.

Reference:

API TR 978 - Section on Hydraulic Bonded Castables and Cement Chemistry: "Hydration develops green strength necessary for handling and pre-dryout stages."

#### NEW QUESTION # 70

Arrange for testing at either an independent laboratory or the manufacturer's plant is

- A. Inspector responsibility
- B. Owner responsibility
- C. Contractor responsibility
- D. Manufacturer responsibility

Answer: C

#### NEW QUESTION # 71

Sections of the lining below minimum thickness shall be:

- A. cut out entirely and replaced.
- B. roughed and gunned to full thickness.
- C. discussed with engineer.
- D. increased in thickness with a skim coat.

Answer: A

Explanation:

Per API 936, linings that fall below the minimum thickness must be removed and replaced to maintain structural integrity: "Areas below the minimum thickness shall be cut out and replaced."

- API Std 936, Section 8.2.1, Thickness Acceptance Criteria

Applying a skim coat (option B) is not an acceptable corrective action for substandard thickness.

#### NEW QUESTION # 72

When installing refractory castables in hot weather conditions, which of the following is acceptable? (This may have more than one correct answer; please select all that apply.)

- A. Shading of equipment and mix area
- B. Decreasing mixing time
- C. Spraying water on equipment
- D. Air conditioning of ambient air

Answer: A,C,D

Explanation:

API TR 980 provides guidance for hot weather installation, recommending:

"Preventive measures include shading material and equipment, cooling of mix water and forms, and in some cases, air conditioning of ambient air. Spraying water on equipment may be used to reduce radiant heat."

- API TR 980, Section 4.5.2

However, decreasing mixing time is not advised; it can result in insufficient material wet-out or inconsistent dispersion. Therefore:

A (air conditioning): Acceptable

B (decreasing mixing time): Not acceptable

C (shading): Acceptable

D (spraying water): Acceptable

#### NEW QUESTION # 73

For fire clay and some high alumina materials, the most commonly used index of refractoriness is known as:

- A. Refractoriness
- B. Pyrometric cone equivalent
- C. Refractoriness under load
- D. None of the above

**Answer: B**

#### NEW QUESTION # 74

.....

The field of information technology has seen multiple advancements lately. Reputed companies around the globe have set the Refractory Personnel API-936 certification as criteria for multiple well-paid job roles. Only API-936 certified will easily get high-paying posts in popular companies. Additionally, a API API-936 Certification holder can climb the career ladder and get promotions within the current organization.
