You can free download the demos to take a look at the advantages of our TDA-C01 training guide.

To take the Tableau TDA-C01 exam, individuals need to have a basic understanding of data analysis and visualization concepts. It is recommended to have practical experience using Tableau and have completed Tableau's official training courses. TDA-C01 exam consists of multiple-choice questions and practical exercises that test an individual's ability to use Tableau's tools and functions effectively.

Tableau TDA-C01 is a certification exam designed to test the skills and expertise of professionals in the field of data analytics. Tableau Certified Data Analyst certification program is offered by Tableau, an American software company that specializes in developing interactive data visualization products. The TDA-C01 exam is aimed at professionals who want to validate their skills in using Tableau for data analysis and reporting. Tableau Certified Data Analyst certification exam is ideal for individuals who are seeking to enhance their knowledge and skills in data analytics, as well as for organizations that want to validate the abilities of their employees in using Tableau software.

Tableau TDA-C01 (Tableau Certified Data Analyst) Exam is a certification exam designed for individuals who wish to demonstrate their proficiency in using Tableau products to perform data analysis tasks. TDA-C01 exam measures the candidate's ability to connect to and prepare data, create and analyze visualizations, and share insights through interactive dashboards. The TDA-C01 certification is widely recognized in the industry and demonstrates a high level of expertise with Tableau software.

Explanation:

A screenshot of a computer Description automatically generated

NEW QUESTION # 14

Your company has two divisions located in the United States and Germany. Each division has a separate database. The following is a sample of the sales data for the division in the United States.

- ☐ The following is a sample of the sales data for the division in Germany.
 - ☐ You have population data in a file named Population.csv. The following is a sample of the data.
 - ☐ You plan to create a visualization that will show the sales per capita for each salesperson. Each salesperson must be identified by their full name.
 - ☐ You need to prepare the data to support the planned visualization. The data source must support being published.
- Which four actions should you perform in order?
- (Place the four correct options in order Use the arrows to move Options to Answer Area arrows to re-order the options. Use Answer Area arrows to re-order the options)

Answer:

Explanation:

- 1 - Open Tableau Desktop
- 2 - Create a new column to concatenate the name for the Germany division.
- 3 - Union the sales data of both divisions.
- 4 - Join the sales data and the population data by using City as the join field

NEW QUESTION # 15

You have a blank dashboard.

You want to add two sheets to the dashboard. The sheets must support the Show/Hide button.

To which two objects can you add the sheets? (Click the two appropriate Options in the Answer Area.)

Answer:

Explanation:

□ Explanation:

□ To add two sheets to the dashboard that support the Show/Hide button, you can add them to either a horizontal or a vertical container. A container is an object that can hold one or more sheets or other objects and allow you to arrange them in a layout. A Show/Hide button is a feature that lets you hide or show a container and its contents on the dashboard. You can add a Show/Hide button to any container, whether it is tiled or floating, by using the drop-down menu of the container and selecting "Add Show/Hide Button." You can also customize the appearance and behavior of the button.

To add a horizontal or a vertical container to the dashboard, you can drag them from the Objects pane to the dashboard. A horizontal container will arrange the sheets or objects horizontally, while a vertical container will arrange them vertically. You can then drag the sheets you want to add from the Sheets pane to the container. You can resize and reorder the sheets or objects within the container by using the handles and arrows.

The other objects in the Answer Area, such as text, image, web page, blank, navigation, download, and extension, do not support the Show/Hide button. They are either static elements that cannot hold other objects, or dynamic elements that require user interaction or external sources. You can add them to the dashboard as well, but they will not have the same functionality as a container with a Show/Hide button.
