What's more, part of that Braindumpsqa NCP-CN dumps now are free: <https://drive.google.com/open?id=1w41oPSRV6hka7srZ7K0GeGCq2e9aujWA>

You should keep in mind to pass the NCP-CN certification exam is not an easy task. It is a challenging job. If you want to pass the NCP-CN exam then you have to put in some extra effort, time, and investment then you will be confident to pass the Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) exam. With the complete and comprehensive NCP-CN exam dumps preparation you can pass the Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) exam with good scores. The Braindumpsqa NCP-CN Questions can be helpful in this regard. You must try this.

You can trust Braindumpsqa NCP-CN exam real questions and start preparation without wasting further time. We are quite confident that with the Braindumpsqa NCP-CN real exam questions you will get everything that you need to learn, prepare and pass the challenging Nutanix NCP-CN Certification Exam easily.

## **New NCP-CN Test Papers | NCP-CN Reliable Exam Dumps**

Our product provides the demo thus you can have a full understanding of our NCP-CN prep torrent. You can visit the pages of the product and then know the version of the product, the updated time, the quantity of the questions and answers, the characteristics

and merits of the NCP-CN test braindumps, the price of the product and the discount. There are also the introduction of the details and the guarantee of our NCP-CN prep torrent for you to read. You can also know how to contact us and what other client's evaluations about our NCP-CN test braindumps. The pages of our product also provide other information about our product and the exam.

## Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q32-Q37):

### NEW QUESTION # 32

A company is required by NIST to follow FIPS guidelines for compliance.

What is the first step for enabling FIPS in NKP?

- A. Click Enable in the NKP Kommander Web UI, Global Workspace -> Settings -> FIPS menu.
- B. Run the command `nkp cluster create <provisioner> <options> --fips`
- C. Run the command `export FIPS_ENABLED=true`
- **D. Follow the OS vendor's instructions to ensure that the OS or OS images are prepared for operating in FIPS mode.**

**Answer: D**

Explanation:

According to the NKPA 6.10 documentation under the "Preparing for FIPS Compliance" section, the first step for enabling FIPS in an NKP environment is to ensure that the underlying operating system (OS) or OS images are correctly configured for FIPS mode. The Nutanix Kubernetes Platform can only leverage FIPS-compliant cryptographic modules if the underlying OS is already configured for FIPS operation.

Specifically, the documentation states:

"Before enabling FIPS in NKP, ensure that the OS or OS images are prepared and configured to operate in FIPS mode, following the vendor's guidelines. Once the OS is in FIPS mode, the NKP cluster components can be provisioned with FIPS support." This foundational step is critical to ensure cryptographic consistency and compliance throughout the NKP stack.

### NEW QUESTION # 33

A Platform Engineer is going to deploy NKP to a Nutanix cluster on-prem as well as Amazon EKS. What is the function of the bootstrap cluster for this architecture?

- A. Simplifies the networking requirements for Kubernetes.
- B. Increases security from a single point of entry.
- C. Saves cost by minimizing resources required for provisioning.
- **D. Uses Cluster API for infrastructure-agnostic provisioning.**

**Answer: D**

Explanation:

The NKPA course explains the role of a bootstrap cluster in NKP deployments, particularly in hybrid architectures involving Nutanix on-prem and Amazon EKS. A bootstrap cluster is a temporary Kubernetes cluster created during the deployment process to initialize Cluster API (CAPI) components, which manage the lifecycle of the target NKP clusters. The primary function of the bootstrap cluster is to use Cluster API for infrastructure-agnostic provisioning (Option D).

CAPI enables NKP to provision clusters across different infrastructures (e.g., Nutanix AHV, AWS EKS) in a consistent, infrastructure-agnostic manner. The bootstrap cluster runs the CAPI controllers (e.g., CAPX for Nutanix, CAPA for AWS) that orchestrate the creation of the target clusters, abstracting the underlying infrastructure details. The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "The bootstrap cluster in NKP uses Cluster API to provide infrastructure-agnostic provisioning, enabling consistent cluster creation across diverse environments like Nutanix AHV and Amazon EKS." This ensures that the same CAPI-based workflow can deploy clusters on both on-prem Nutanix and cloud-based EKS.

Incorrect Options:

\* A. Increases security from a single point of entry: A bastion host, not a bootstrap cluster, provides a single point of entry for security. The bootstrap cluster is temporary and focuses on provisioning.

\* B. Simplifies the networking requirements for Kubernetes: Networking is managed by the target cluster's CNI (e.g., Calico), not the bootstrap cluster.

\* C. Saves cost by minimizing resources required for provisioning: The bootstrap cluster is temporary and does not significantly impact costs; its purpose is provisioning, not cost-saving.

### NEW QUESTION # 34

A company was using a test application called temp-shop developed in the temp-ecommerce NKP Starter cluster. Now, the cluster has just been taking up valuable resources that could be used for other projects, so the development team has decided to remove it. Before proceeding, they verified that they had the cluster configuration file temp-ecommerce.conf.

What command should the development team execute to delete the cluster with its nodes and application?

- A. `nkp delete cluster --cluster-name=temp-shop --self-managed --kubeconfig=temp-shop.conf`
- B. `nkp delete cluster --cluster-name=temp-ecommerce --self-managed --kubeconfig=temp-ecommerce.conf`
- C. `nkp delete cluster --all`
- D. `nkp delete cluster --application-name=temp-shop --self-managed --kubeconfig=temp-ecommerce.conf`

**Answer: B**

Explanation:

As per the NKPA 6.10 documentation, the correct approach for deleting an entire NKP-managed cluster (including nodes and deployed applications) is to use the `nkp delete cluster` command with the cluster name and `--kubeconfig` parameter. The `--self-managed` flag ensures the deletion of resources provisioned by the cluster.

Exact extract:

"Use `nkp delete cluster --cluster-name=<name> --self-managed --kubeconfig=<config>` to delete a cluster and its associated resources." Reference:

Nutanix Kubernetes Platform Administration (NKPA) 6.10 - "Cluster Deletion Workflow" NCP-CN 6.10 Study Guide - "Deleting a Managed Cluster"

### NEW QUESTION # 35

A Platform Engineer is getting started with NKP and has created a bastion host with all needed prerequisites.

How should the engineer install Kommander?

- A. NKP CLI
- B. Ansible
- C. AWS CLI
- D. Terraform

**Answer: A**

### NEW QUESTION # 36

Which two statements are true regarding deploying NKP on an Azure Kubernetes Service (AKS) Infrastructure? (Choose two.)

- A. Existing AKS clusters must be attached to the Management cluster.
- B. AKS best practices encourage building customized images.
- C. NKP Management cluster with the Kommander component must be installed before installing NKP on AKS cluster.
- D. AKS clusters can be deployed as Management or Pro NKP clusters.

**Answer: A,C**

Explanation:

The NKPA course outlines the specifics of integrating Azure Kubernetes Service (AKS) with NKP, focusing on fleet management and the deployment architecture. The correct statements are:

\* Existing AKS clusters must be attached to the Management cluster (Option A):NKP does not provision AKS clusters directly because AKS is a managed Kubernetes service. Instead, NKP attaches existing AKS clusters to its management plane for

centralized management. The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "For AKS integration, existing AKS clusters must be attached to the NKP Management cluster using the Attach Cluster functionality, as NKP does not provision AKS clusters." This involves creating a service account with cluster-admin permissions in the AKS cluster and providing its kubeconfig to NKP.

\* NKP Management cluster with the Kommander component must be installed before installing NKP on AKS cluster (Option C):The Kommander component is part of the NKP Management cluster and provides the centralized management plane for fleet management, including AKS clusters. The NKPA course specifies that an NKP Management cluster with Kommander must be deployed before attaching or managing external clusters like AKS. The NCP-CN 6.10 Study Guide notes: "An NKP Management cluster with Kommander must be installed prior to integrating AKS clusters, as Kommander enables the fleet management capabilities for external clusters." Incorrect Options:

\* B. AKS best practices encourage building customized images: AKS best practices recommend using the default node images provided by Azure, which are optimized for AKS features like autoscaling and security. Custom images can lead to loss of functionality, as noted in previous questions (e.g., Q91).

\* D. AKS clusters can be deployed as Management or Pro NKP clusters: AKS clusters are attached, not deployed, by NKP. Additionally, AKS clusters cannot serve as NKP Management clusters; the Management cluster must be deployed on supported infrastructure like Nutanix AHV, AWS, or vSphere. "Pro NKP clusters" is not a valid term in NKP documentation-Pro refers to a license tier, not a cluster type.

## NEW QUESTION # 37

.....

Based on high-quality products, our NCP-CN guide torrent has high quality to guarantee your test pass rate, which can achieve 98% to 100%. NCP-CN study tool is updated online by our experienced experts, and then sent to the user. And we provide free updates of NCP-CN training material for one year after your payment. The data of our NCP-CN Exam Torrent is forward-looking and can grasp hot topics to help users master the latest knowledge. And you can also free download the demo of NCP-CN exam questions to have a check.

**New NCP-CN Test Papers:** [https://www.braindumpsqa.com/NCP-CN\\_braindumps.html](https://www.braindumpsqa.com/NCP-CN_braindumps.html)

Nutanix Valid Exam NCP-CN Registration We will provide free updates for 1 year from the date of purchase, Nutanix Valid Exam NCP-CN Registration Next, we'll show you how to implement workloads and security, The most proper price or even the price doesn't match up to Nutanix NCP-CN practice pdf training's high quality, There are several answers and questions for you to have a try on the NCP-CN study material vce.

The code repository for this live lesson, About your problems with our NCP-CN Reliable Study Guide Free exam simulation, our considerate staff usually make prompt reply to your mails especially for those who dislike waiting for days.

## Enjoy the Most Recent NCP-CN Exam Questions with 1 year of Free Updates

We will provide free updates for 1 year from NCP-CN the date of purchase, Next, we'll show you how to implement workloads and security, The most proper price or even the price doesn't match up to Nutanix NCP-CN practice pdf training's high quality.

There are several answers and questions for you to have a try on the NCP-CN study material vce, In addition, the knowledge is totally written and compiled by the examination syllabus.
