

AWS-Solutions-Associate考古題推薦 & AWS-Solutions-Associate證照資訊

P.S. Testpdf在Google Drive上分享了免費的2026 Amazon AWS-Solutions-Associate考試題庫：<https://drive.google.com/open?id=1sTTDgyXMx8KkL88nOgi3SHNSCoPyOnSD>

因為Amazon技術一直在快速發展，所以AWS-Solutions-Associate認證考試的試題也在不斷變化。因此，Testpdf的考古題也在一直更新。並且，如果你購買了Testpdf的資料，Testpdf將為你提供一年的免費更新服務。只要試題一更新，Testpdf馬上把最新版的資料發送給你。這樣就可以保證你隨時擁有最新版的資料。Testpdf不僅可以幫助你通過考試，還可以幫助你學習最新的知識。这样实惠的资料你千万不要错过。

AWS-Solutions-Architect-Associate 考試是一個入門級認證考試，非常適合希望在雲計算中建立職業生涯或希望提升現有 AWS 技能的 IT 專業人員。此考試旨在為在 AWS 上設計和部署可擴展和高可用性系統的人士提供幫助，這些人士需擁有至少一年的相關經驗。候選人預期對 AWS 服務（如 EC2、S3、RDS 和 VPC）和在 AWS 上設計和部署應用程序擁有基本了解。

真實的AWS-Solutions-Associate考古題推薦 & 保證Amazon AWS-Solutions-Associate考試成功與頂級的AWS-Solutions-Associate證照資訊

我們Testpdf Amazon的AWS-Solutions-Associate考試的試題及答案，為你提供了一切你所需要的考前準備資料，關於Amazon的AWS-Solutions-Associate考試，你可以從不同的網站或書籍找到這些問題，但關鍵是邏輯性相連，我們的試題及答案不僅能第一次毫不費力的通過考試，同時也能節省你寶貴的時間。

AWS-Solutions-Architect-Associate 考試包括 65 道多選和多響應問題，考生有 130 分鐘的時間完成考試。該考試涵蓋了廣泛的主題，包括 AWS 核心服務、安全、數據庫和網絡。考生必須獲得 720 分或更高的及格分數才能獲得認證。

最新的 AWS Certified Solutions Architect AWS-Solutions-Associate 免費考試真題 (Q79-Q84):

問題 #79

An AWS workload in a VPC is running a legacy database on an Amazon EC2 instance. Data is stored on a 200GB Amazon EBS (gp2) volume. At peak load times, logs show excessive wait time.

What solution should be implemented to improve database performance using persistent storage?

- A. Migrate the data on the Amazon EBS volume to an SSD-backed volume.
- **B. Migrate the data on the EBS volume to provisioned IOPS SSD (io1).**
- C. Change the EC2 instance type to one with burstable performance.
- D. Change the EC2 instance type to one with EC2 instance store volumes.

答案：B

解題說明:

Burstable performance instances can burst CPU to a higher level. But the question asks for a solution to improve database performance using persistent storage.

問題 #80

A company maintains a searchable repository of items on its website. The data is stored in an Amazon RDS for MySQL database table that contains more than 10 million rows. The database has 2 TB of General Purpose SSD storage. There are millions of updates against this data every day through the company's website. The company has noticed that some insert operations are taking 10 seconds or longer. The company has determined that the database storage performance is the problem. Which solution addresses this performance issue?

- A. Change the DB instance to a memory optimized instance class
- **B. Change the storage type to Provisioned IOPS SSD**
- C. Enable Multi-AZ RDS read replicas with MySQL native asynchronous replication.
- D. Change the DB instance to a burstable performance instance class

答案: B

解題說明:

<https://aws.amazon.com/ebs/features/>

"Provisioned IOPS volumes are backed by solid-state drives (SSDs) and are the highest performance EBS volumes designed for your critical, I/O intensive database applications.

These volumes are ideal for both IOPS-intensive and throughput-intensive workloads that require extremely low latency."

https://docs.aws.amazon.com/AmazonRDS/latest/UserGuide/CHAP_Storage.html

問題 #81

Typically, you want your application to check whether a request generated an error before you spend any time processing results. The easiest way to find out if an error occurred is to look for an _____ node in the response from the Amazon RDS API.

- A. Incorrect
- B. FALSE
- **C. Error**

答案: C

問題 #82

Identify a benefit of using Auto Scaling for your application.

- **A. Your application gains better fault tolerance.**
- B. Your application optimizes only logistics and operations.
- C. You acquire clarity on prototypes in your application.
- D. Your application receives latency requirements in every region.

答案: A

解題說明:

Explanation/Reference:

Explanation:

When you use Auto Scaling, your applications gain better fault tolerance. Auto Scaling can detect when an instance is unhealthy, terminate it, and launch an instance to replace it. You can also configure Auto Scaling to use multiple Availability Zones. If one Availability Zone becomes unavailable, Auto Scaling can launch instances in another one to compensate.

<http://docs.aws.amazon.com/AutoScaling/latest/DeveloperGuide/how-as-works.html>

問題 #83

A company receives inconsistent service from its data center provider because the company is headquartered in an area affected by natural disasters. The company is not ready to fully migrate to the AWS Cloud but it wants a failure environment on AWS in case the
