Easy to Use and Compatible Huawei H12-891_V1.0 Practice Test Formats

P.S. Free 2026 Huawei H12-891_V1.0 dumps are available on Google Drive shared by ExamDiscuss: https://drive.google.com/open?id=1vw7Wdogazi2cS0InldYAROepNB01Ou2f

However, ExamDiscuss saves your money by offering H12-891_V1.0 real questions at an affordable price. In addition, we offer up to 12 months of free H12-891_V1.0 exam questions. This way you can save money even if H12-891_V1.0 introduces fresh HCIE-Datacom V1.0 H12-891_V1.0 exam updates. Purchase the Huawei H12-891_V1.0 preparation material to get certified on the first attempt.

We are dedicated to helping you pass your exam just one time. H12-891_V1.0 learning materials are high quality, and we have received plenty of good feedbacks from our customers, they thank us for helping the exam just one time. If you can't pass your exam in your first attempt by using H12-891_V1.0 exam materials of us, we ensure you that we will give you full refund, and no other questions will be asked. In addition, we provide you with free demo for one year for H12-891_V1.0 Exam Braindumps, and the update version for H12-891_V1.0 exam materials will be sent to your email address automatically.

Free Demo Version and Free Updates of Real Huawei H12-891_V1.0 Questions

Our H12-891_V1.0 test prep is renowned for free renewal in the whole year. As you have experienced various kinds of exams, you must have realized that renewal is invaluable to H12-891_V1.0 study materials, especially to such important H12-891_V1.0 exams. And there is no doubt that being acquainted with the latest trend of exams will, to a considerable extent, act as a driving force for you to pass the exams and realize your dream of living a totally different life. So if you do want to achieve your dream, buy our H12-891_V1.0 practice materials.

Huawei HCIE-Datacom V1.0 Sample Questions (Q182-Q187):

NEW QUESTION # 182
An existing router running OSPF is connected to zone 0 and zone l. You configured zone l as the Stub domain.
What classes does an LSA that operates only inside zone l contain?

- A. 7 ?LSA
- B. 1 ??LSA,2 ??LSA 5 ??LSA
- C. 3LSA 4LSA1 2
- D. 1 ?LSA ? 2 ?LSA
- E. 1LSA,2 3LSA

Answer: E

NEW QUESTION # 183
Which of the following statements about configuring user access authentication is incorrect?

- A. You need to bind an access profile to an authentication profile to specify the user authentication mode.Then, apply the authentication profile to an interface to enable network access control.
- B. If the RADIUS or HWTACACS server is used for authentication, you need to configure parameters for interconnection with the authentication server in the AAA scheme.
- C. You can configure an 802.1X access profile, a MAC access profile, a Portal access profile, or a multi- mode authentication profile based on the actual authentication requirements on the network.
- D. To implement network access control on users, you need to determine the domains to which they belong and the AAA schemes that they use.

Answer: A

Explanation:
Huawei'suser access authentication configurationincludes the following components:
AAA scheme: Defines how users are authenticated (local, RADIUS, HWTACACS, etc.).
Domain: Groups users and associates them with an AAA scheme.
Access profile: Defines access control rules like 802.1X, MAC, Portal, or multi-mode authentication.
Correct workflow:
Bind theauthentication profile(which references the access profile) to theuser access interface.
Not the other way around.
Incorrect statement:
D:It incorrectly states youbind the access profile to the authentication profile, when in fact, theauthentication profile binds the access profileand is applied to the interface.
Correct answer: D

NEW QUESTION # 184
When Huawei iMaster NCE-IP is used to configureSR-MPLS TE tunnels, which of the following protocols is used by the controller to collect device running status information?

- A. BGP-LS
- B. IS-IS
- C. Telnet
- D. Telemetry

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

TheiMaster NCE-IP controllerusesTelemetryto collect real-timedevice running statusinformation efficiently and with low latency.

Telemetry (A):Enables continuousdata streamingto the controller, including network performance and link state information.

Telnet (B):Used for manual device management and not suitable for automated data collection.

BGP-LS (C):Used fordistributing link-state information, but not for real-time performance data collection.

IS-IS (D):AnIGP protocol, not used for collecting device status.

NEW QUESTION # 185

On the campus network shown, IPv6 is deployed for service tests. Four routers are deployed on the network, and OSPFv3 is used for IPv6 network connectivity. An engineer checks the LSDB of R2 and obtains a Link- LSA. Which of the following statements about the LSA are correct?

- A. This LSA indicates that R2 does not support external routes but can participate in IPv6 route calculation.
- B. The IPv6 address prefix of R2's GE0/0/0 is 2001:DB8:2345:23::/64.
- C. The link-local address of R2's GE0/0/0 is FE80::2E0:FCFF:FECD:4F79.
- D. This LSA is generated by R2.

Answer: B,C,D

Explanation:

InOSPFv3,Link-LSA (Type 8)is generated by a routerfor each of its interfacesto advertise:

Therouter's link-local addresson that interface.

TheIPv6 prefixesassociated with the interface.

Flags and options, such as router priority or loopback indicators.

From the output:

Link-LSA (Interface GigabitEthernet0/0/0)

Originating Router: 10.1.2.2

Link-Local Address: FE80::2E0:FCFF:FECD:4F79

Prefix: 2001:DB8:2345:23::/64

A: The link-local address of R2's GE0/0/0 is FE80::2E0:FCFF:FECD:4F79# This matches the Link-Local Address field in the LSA.# B: The IPv6 address prefix of R2's GE0/0/0 is 2001:DB8:2345:23::/64# This matches the Prefix field in the LSA.# C: This LSA indicates that R2 does not support external routes but can participate in IPv6 route calculation##Incorrect.

TheLink-LSAdoesnot provide any indicationabout external route capabilities.

It simply advertisesinterface-specific IPv6 and link-local info.

Whether R2 supports external routes depends onType 5 (External) or Type 7 (NSSA) LSAs, not Link-LSAs.

D: This LSA is generated by R2# The Originating Router: 10.1.2.2 is R2's router ID, so this LSA is definitely generated by R2.#

Correct Answers:A, B, D The Link-LSA in OSPFv3 contains:

The link-local address used by the originating router on the link.

A list of all IPv6 prefixes associated with the link.

Flags such as router priority and the Router-LSA options.

These LSAs are alwaysgenerated by the router itselfand arenot flooded beyond the link.

NEW QUESTION # 186

Collecting information before a cutover helps you determine whether services are normal before and after the cutover.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Before performing a network cutover (migration or upgrade), it is essential to collect baseline data to ensure that services operate normally before and after the change.

Importance of Pre-Cutover Information Collection:

* Identifies Network Baseline - Helps compare pre-cutover and post-cutover performance.

* Detects Hidden Issues - Ensures that no existing network issues interfere with the cutover process.

* Prevents Service Interruptions - Ensures all dependent services are accounted for.

* Provides Rollback Plan - If issues arise, administrators can restore previous configurations.
