# Latest F5CAB2 Dumps Questions - F5CAB2 New Exam Braindumps

All operating systems also support this web-based F5CAB2 practice test. The third format is desktop F5CAB2 practice exam software that can be accessed easily after installing it on your Windows PC or Laptop. These formats are there so that the students can use them as per their unique needs and prepare successfully for F5CAB2 the on first try.

We are equipped with a team of IT elites who have a good knowledge of IT field and do lots of study in F5 certification exam. All dumps free of ValidDumps are creating based on the actual test. Our colleagues check the updating of F5CAB2 Test Questions everyday to make sure that all answers are latest and valid. Our F5CAB2 test study material contains valid top questions and detailed exam answers.

Quiz F5CAB2 - Authoritative Latest BIG-IP Administration Data Plane Concepts (F5CAB2) Dumps Questions

As one of the hot exam of our website, F5 dumps pdf has a high pass rate which reach to 85%. According to our customer's feedback, our F5CAB2 vce braindumps covers mostly the same topics as included in the real exam. So if you practice our F5CAB2 Test Questions seriously and review test answers, pass exam will be absolute.

F5 BIG-IP Administration Data Plane Concepts (F5CAB2) Sample Questions (Q33-Q38):

NEW QUESTION # 33
An application is configured so that the same pool member must be used for an entire session, and this behavior must persist across HTTP and FTP traffic. A user reports that a session terminates and must be restarted after the active BIG-IP device fails over to the standby device.
Which configuration settings should the BIG-IP Administrator verify to ensure proper behavior when BIG-IP failover occurs? (Choose one answer)

- A. Stateful failover and Network Failover detection
- B. SYN-cookie insertion threshold and connection low-water mark
- C. Cookie persistence and session timeout
- D. Persistence mirroring and Match Across Services

Answer: D

Explanation:
This scenario combines session continuity, multiple protocols (HTTP and FTP), and HA failover behavior, which directly implicates persistence handling across devices and services.
Key Requirements Breakdown
* Same pool member for entire session

* Session must survivefailover
* Session must spanmultiple services (HTTP and FTP)
Why Persistence Mirroring + Match Across Services Is Required
Persistence Mirroring
* Ensurespersistence records are synchronizedfrom the active BIG-IP to the standby BIG-IP.
* Without mirroring:
* After failover, the standby device hasno persistence table
* Clients are load-balanced again
* Sessions break, forcing users to restart
* Persistence mirroring is essential forsession continuity during failover Match Across Services
* Allows asingle persistence recordto be shared acrossmultiple virtual servers / protocols
* Required when:
* HTTP and FTP must use thesame pool member
* Multiple services are part of a single application session
Together, these settings ensure:
* Persistence survivesdevice failover
* Persistence is honoredacross HTTP and FTP
Why the Other Options Are Incorrect
* A. Cookie persistence and session timeoutCookie persistence only applies to HTTP and does not address FTP or failover synchronization.
* B. Stateful failover and Network Failover detectionStateful failover applies toconnection state, not persistence records, and does not link HTTP and FTP sessions.
* D. SYN-cookie insertion threshold and connection low-water markThese are DoS / SYN flood protection settings, unrelated to persistence or HA behavior.

NEW QUESTION # 34
A BIG-IP Administrator has acluster of devices.
What should the administrator doafter creating a new Virtual Server on device 1? (Choose one answer)

- A. Create a new virtual server on device 2
- B. Create a new cluster on device 1
- C. Synchronize the settings of thegroup to device 1
- D. Synchronize the settings ofdevice 1 to the group

Answer: D

Explanation:
In a BIG-IPdevice service cluster, configuration objects such asvirtual servers, pools, profiles, and iRules are maintained throughconfiguration synchronization (config-sync).
Key BIG-IP concepts involved:
* Device Service Cluster (DSC)A cluster is a group of BIG-IP devices that share configuration data. One device is typically used to make changes, which are then synchronized to the rest of the group.
* Config-Sync Direction Matters
* Changes are made on alocal device
* Those changes must bepushed to the group
* The correct operation is"Sync Device to Group"
WhyCis correct:
* The virtual server was createdonly on device 1
* Other devices in the cluster do not yet have this object
* To propagate the new virtual server to all cluster members, the administrator mustsynchronize device 1 to the group Why the other options are incorrect:
* A. Synchronize the settings of the group to device 1This would overwrite device 1's configuration with the group's existing configuration and mayremove the newly created virtual server.
* B. Create a new cluster on device 1The cluster already exists. Creating a new cluster is unnecessary and disruptive.
* D. Create a new virtual server on device 2This defeats the purpose of centralized configuration management and risks configuration drift.
Conclusion:
After creating a new virtual server on a BIG-IP device that is part of a cluster, the administrator must synchronize the configuration from that device to the groupso all devices share the same ADC application objects.

NEW QUESTION # 35

What type of virtual server will have a destination IP address of 0.0.0.0 and listen on a specific VLAN for requests?

- A. Forwarding (Layer 2)
- B. Standard
- C. Forwarding (IP)
- D. Wildcard

Answer: D

Explanation:

In BIG-IP LTM, a Wildcard virtual server is defined by using a destination IP address of 0.0.0.0. These virtual servers are designed to handle traffic that does not match any more specific Virtual Server destination address.
* 0.0.0.0 Destination:This address acts as a "catch-all" for IP traffic.
* VLAN Specificity:While the destination address is generic, a Wildcard virtual server is typically restricted to a specific VLAN (such as the Internal VLAN) to process outbound traffic from backend servers.
* Service Ports:A wildcard virtual server can be configured for a specific port (e.g., 0.0.0.0:80) or for all ports (0.0.0.0:0).
* Data Plane Usage:It is commonly used for transparently intercepting outbound traffic for the purpose of Source NAT (SNAT), bandwidth shaping, or directing traffic to a gateway pool.

NEW QUESTION # 36

The BIG-IP appliance fails to boot. The BIG-IP Administrator needs to run the End User Diagnostics (EUD) utility to collect data to send to F5 Support.
Where can the BIG-IP Administrator access this utility?

- A. Internal VLAN interface
- B. Console Port
- C. External VLAN interface
- D. Management Port

Answer: B

NEW QUESTION # 37

A BIG-IP Administrator has a cluster of devices. What should the administrator do after creating a new Virtual Server on device 1?

- A. synchronize the settings of the group to device 1
- B. create a new cluster on device 1
- C. create the new virtual server on device 2
- D. synchronize the settings of device 1 to the group

Answer: D

Explanation:

F5 BIG-IP uses a ConfigSync mechanism to ensure that all members of a Device Service Cluster (DSC) share the same configuration.
* Manual Synchronization:By default, configuration changes made on one device (the "source") do not automatically propagate to other members.
* Direction of Sync:Once a Virtual Server is created on device 1, that device's configuration is now
"newer" than the rest of the group. The administrator must initiate a synchronization from the modified device (device 1) to the Sync-Failover group.
* Consistency:This ensures that if a failover occurs, device 2 (the standby) will have the exact same Virtual Server configuration and can take over traffic immediately without interruption.

NEW QUESTION # 38

......

Our F5CAB2 questions pdf is up to date, and we provide user-friendly F5CAB2 practice test software for the F5CAB2 exam. Moreover, we are also providing money back guarantee on all of F5CAB2 test products. If the F5CAB2 braindumps products fail to deliver as promised, then you can get your money back. The F5CAB2 Sample Questions include all the files you need to prepare for the F5CAB2 exam. With the help of the F5CAB2 practice exam questions and test software, you will be able to feel the real F5CAB2 exam scenario, and it will allow you to assess your skills.

F5CAB2 New Exam Braindumps: https://www.validdumps.top/F5CAB2-exam-torrent.html

F5 Latest F5CAB2 Dumps Questions So indiscriminate choice may lead you suffer from failure, Practice tests for F5CAB2 pdf dumps are best for self-assessment, It will allow you to prepare for the F5 BIG-IP Administration Data Plane Concepts (F5CAB2) F5CAB2 exam anywhere anytime, The system designed of F5CAB2 learning guide by our IT engineers is absolutely safe, F5 Latest F5CAB2 Dumps Questions Contributes to higher income.

Creating Custom Window Chrome, Sharpen your print F5CAB2 production skills with this definitive resource created specifically for design professionals who need to create files using the Adobe Creative F5CAB2 New Exam Braindumps Cloud, including InDesign, Photoshop, Illustrator, and Acrobat and output for printing.

Hot Latest F5CAB2 Dumps Questions Pass Certify | Efficient F5CAB2 New Exam Braindumps: BIG-IP Administration Data Plane Concepts (F5CAB2)

So indiscriminate choice may lead you suffer from failure, Practice tests for F5CAB2 Pdf Dumps are best for self-assessment, It will allow you to prepare for the F5 BIG-IP Administration Data Plane Concepts (F5CAB2) F5CAB2 exam anywhere anytime.

The system designed of F5CAB2 learning guide by our IT engineers is absolutely safe, Contributes to higher income.
