And no matter which format of Salesforce-Slack-Administrator study engine you choose, we will give you 24/7 online service and one year's free updates on the Salesforce-Slack-Administrator practice questions.

### Salesforce Certified Slack Administrator Sample Questions (Q194-Q199):

#### NEW QUESTION # 194

You're an Org Owner trying to determine which organizations your company works with in Slack Connect channels. What is the best way to gather this information?

- A. Export the list of Slack Connect channels from the analytics dashboard.
- **B. Review the Slack Connect section of your Slack sidebar.**
- C. Review the Slack Connect connections In the org admin dashboard.
- D. Search for Slack Connect channels in the channel management dashboard.

**Answer: B**

### NEW QUESTION # 195

When advising team members on the best practices of threading, what should you tell them is an effective way of using threads?

- A. To use slash commands without disturbing the rest of the channel members
- B. To ensure that others in a channel will be notified of new messages
- C. To add responses such as "thank you" or "I'm looking into it" without cluttering the channel needlessly
- **D. To make multiple discussions in the same channel easier to follow**

**Answer: D**

Explanation:

Slack encourages using threads to keep conversations organized and prevent clutter in busy channels.

Official Slack documentation says:

"Threads help organize conversations around specific messages, allowing multiple discussions to happen simultaneously within a single channel without causing confusion." While thanking or quick responses (Option B) can also be done in threads, the primary reason for using threads is to manage multiple discussions efficiently.

(Reference: Slack Administration Study Guide - Best Practices for Channel Communication and Threading)

-

### NEW QUESTION # 196

Your Slack Governance Support model includes a group of people designated as Workspace Admins to distribute the workload. What is a key benefit of setting up a user group for the Workspace Admins?

- A. Any Slack member by default can add themselves to the Workspace Admin user group to follow along with their activities.
- **B. Any @mention of the Workspace Admin user group will notify all of the group members, allowing any Slack member to send questions to the group.**
- C. People that the team works with in Slack Connect can be added to the user group in order to work more closely with the Workspace Admins on certain issues.
- D. Any Enterprise Grid member can @mention the user group from any workspace within the Enterprise Grid org to send a notification to all of the user group members.

**Answer: B**

Explanation:

Slack user group functionality explains:

"When a user group is @mentioned, all members of the user group are notified, making it easy for others to reach all members at once for questions or updates." Option A is misleading because visibility of user groups depends on workspace settings. B and C are inaccurate - external users cannot be added, and users cannot add themselves to user groups.

(Reference: Slack Administration Study Guide - Using User Groups)

### NEW QUESTION # 197

You're an Org Admin for an organization with sales associates traveling globally.

You need to ensure Slack mobile access remains secure even if a device is lost or stolen.

What is the best option to increase the likelihood of keeping information on mobile devices secure?

(Select the best answer.)

- **A. Turn on Mobile Session Duration to invoke an automatic logout from the Slack mobile app after a specified time frame.**
- B. Require mobile devices to have a passcode.
- C. Do not allow Slack app download on corporate mobile devices.
- D. Require users to sign out of Slack on their mobile device when it's not in use.

**Answer: A**

Explanation:

Slack advises:

"Turning on Mobile Session Duration policies allows admins to automatically log users out of Slack mobile apps after a set period, reducing risk if a device is lost or stolen." Requiring a passcode (B) is good mobile practice but not Slack-specific. A (manual sign-out) is unreliable. D (no app downloads) would block necessary communication entirely.

(Reference: Slack Administration Study Guide - Mobile Security Features)

### NEW QUESTION # 198

You're a Workspace Owner who recently launched Slack at your company. Google Calendar is one of the essential productivity apps used by everyone in the company. You want to ensure that your colleagues can all access their Google Calendars from Slack. What is the best way to enable the Google Calendar app for all members of your workspace?

(Select the best answer.)

- **A. Connect Google Calendar to your company's email domain, and enable domain-wide authentication for Google Calendar app in Slack to automatically install the app for all users.**
- B. Direct all users to integrate their Google Calendar app by posting instructions in your #announcements channel and linking to the app's page in the Slack Apps Directory.
- C. Pre-approve the Google Calendar integration so users have the option to easily enable their own calendar apps.
- D. Use the Admin API to automate approvals for Google Calendar app requests.

**Answer: A**

Explanation:

To ensure that all users have seamless access to Google Calendar within Slack:

"Enable domain-wide authentication for Google Calendar in Slack. This ensures the app is automatically installed and authorized for all users without requiring manual setup." Pre-approving (C) still requires individual installation by users. Posting instructions (A) is manual and inconsistent. Using Admin API (D) helps manage app requests but does not guarantee seamless access.

(Reference: Slack Administration Study Guide - Managing Apps and Domain-Wide Authentication)

### NEW QUESTION # 199

.....

The software version is one of the three versions of our Salesforce-Slack-Administrator exam prep. The software version has many functions which are different with other versions'. On the one hand, the software version of Salesforce-Slack-Administrator test questions can simulate the real examination for all users.
