Its primary purpose is to identify, assess, and plan for risks related to agile adoption. This includes challenges like cultural resistance, skills gaps, tooling needs, and process adaptations.

The workshop ensures that these risks are proactively managed to smooth the agile transformation and increase the chances of successful agile delivery.

By focusing on agile adoption risks rather than project delivery or business as usual, the workshop addresses the foundational changes required for agility at team and organizational levels. Effective enablement workshops facilitate buy-in, identify training needs, and help tailor agile frameworks to the organization's context.
