

# Oracle 1Z0-1042-25 Training Tools, 1Z0-1042-25 Questions Pdf

Our 1Z0-1042-25 valid practice questions are designed by many experts in the field of qualification examination, from the user's point of view, combined with the actual situation of users, designed the most practical 1Z0-1042-25 learning materials. We believe that no one will spend all their time preparing for 1Z0-1042-25 Exam, whether you are studying professional knowledge, or all of which have to occupy your time to review the exam. Using the 1Z0-1042-25 test prep, you will find that you can grasp the knowledge what you need in the exam in a short time.

## Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Using OIC Connections &amp; Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>• <b>Creating Orchestrated Integrations:</b> This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.</li> </ul>

### 1Z0-1042-25 Questions Pdf | 1Z0-1042-25 Sample Exam

The 1Z0-1042-25 study materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the 1Z0-1042-25 training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our 1Z0-1042-25 study engine. Firmly believe in an idea, the 1Z0-1042-25 exam questions are as long as the user to follow our steps to obtain the certificate.

### Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q25-Q30):

#### NEW QUESTION # 25

You have an Oracle Integration (OIC) synchronous integration flow that updates external systems with several invocations. However, several of your OIC integration clients are reporting that they are experiencing timeouts waiting for the response confirmation from this processing. Which is a legitimate strategy to mitigate this issue?

- A. Change the implementation logic to invoke multiple fine-grained external API calls within a single loop.
- B. Increase the blocking timeout within the OIC integration settings to allow for extended time.
- **C. Change the design implementation strategy to an asynchronous flow that provides a separate notification to clients when the processing is complete.**

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation:

Timeouts:

B:True-async flow resolves client wait issues.

#### NEW QUESTION # 26

Which statement about Oracle Integration (OIC) is NOT valid?

- **A. An application pattern integration can contain one or more trigger (source) connections for requests sent to OIC and one or more invoke (target) connections for requests sent from OIC.**
- B. When you open the Map Editor for a request or response message in an integration, the data structures are automatically populated with the information pulled from the trigger and invoke connections.
- C. Using the connectivity agent, you can create hybrid integrations and exchange messages between applications in private or on-premises networks and OIC.
- D. OIC Lookups are based on a static definition, meaning you create and populate them during design time.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation:

OIC Patterns:

B:False-one trigger per app-driven integration.

#### NEW QUESTION # 27

Which is NOT an advantage of using Oracle Integration Cloud (OIC) for creating application integrations?

- A. Data mapping recommendations
- **B. User Choice of IDE for development**
- C. Auto-association of Oracle SaaS applications
- D. Prebuilt integrations
- E. Public/Private Cloud portability

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation:

Oracle Integration Cloud (OIC) is a platform designed to simplify and accelerate the creation of integrations between various applications, whether cloud-based or on-premises. Its key advantages include:

Prebuilt integrations (A): OIC provides a library of prebuilt adapters and integration recipes, reducing development time.

Auto-association of Oracle SaaS applications (B): OIC seamlessly integrates with Oracle SaaS applications (e.g., HCM, ERP) via adapters, often auto-configuring connection details.

Public/Private Cloud portability (D): OIC supports hybrid integrations, connecting public cloud services with private/on-premises systems via the Connectivity Agent.

Data mapping recommendations (E): The OIC mapper provides intelligent suggestions to simplify data transformation between source and target schemas.

However, User Choice of IDE for development (C) is not an advantage because OIC uses a browser-based, low-code design environment rather than offering a choice of external Integrated Development Environments (IDEs) like Eclipse or IntelliJ.

Development is confined to OIC's built-in designer, which prioritizes simplicity over flexibility in tooling. This limitation distinguishes it from platforms where developers can select their preferred IDE.

#### NEW QUESTION # 28

You have created a new OIC project to be used by other team members working on a new group of related integrations. Which role is NOT available to you as the project owner to assign to other users for integrations within this project?

- A. View
- B. Monitor
- C. Edit
- **D. Invoke**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation:

Project Roles:

B: False - Invoke not a project-level role.

#### NEW QUESTION # 29

Oracle Integration Cloud (OIC) integrations can be exported so that later they can be imported into another OIC instance environment. Which statement is NOT true about the import and export of OIC integrations?

- A. Exported integrations include all their dependent connection resource information except URLs and credentials.
- B. Imported integrations can be reconfigured to use different connection resources by using the OIC REST API.
- C. Imported integrations cannot be immediately activated if their dependent connection resources are not already present in the target OIC environment.
- **D. Integrations must be exported as a package if you want to import them into another OIC environment.**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation:

OIC supports exporting and importing integrations for migration or backup:

Option A: True - activation requires all dependent connections (e.g., adapters) to exist in the target environment; otherwise, manual configuration is needed.

Option B: True - exported integrations (IAR files) include connection metadata but exclude sensitive data like URLs and credentials for security.

Option D: True-the OIC REST API allows post-import reconfiguration of connections.

### NEW QUESTION # 30

• • • • •

If you want to pass exam and get the related certification in the shortest time, the 1Z0-1042-25 study practice dump from our company will be your best choice. Although there are a lot of same study materials in the market, we still can confidently tell you that our 1Z0-1042-25 exam questions are most excellent in all aspects. With our experts and professors' hard work and persistent efforts, the 1Z0-1042-25 Prep Guide from our company have won the customers' strong support in the past years. A growing number of people start to choose our 1Z0-1042-25 study materials as their first study tool. It is obvious that the sales volume of our study materials is increasing every year.
