

FCP_FAZ_AD-7.4 Guaranteed Success - FCP_FAZ_AD-7.4 Real Exam

What's more, part of that TestSimulate FCP_FAZ_AD-7.4 dumps now are free: <https://drive.google.com/open?id=1YLncWXXMFNUKKtQEAOtjMeIrvbBNd>

In a new era of talent gradually saturated win their own advantages, how to reflect your ability? Perhaps the most intuitive way is to get the test FCP_FAZ_AD-7.4 certification to obtain the corresponding qualifications. However, the FCP_FAZ_AD-7.4 qualification examination is not so simple and requires a lot of effort to review. How to get the test certification effectively, I will introduce you to a product—the FCP_FAZ_AD-7.4 Learning Materials that tells you that passing the FCP_FAZ_AD-7.4 exam in a short time is not a fantasy. We have helped tens of thousands of candidates pass their FCP_FAZ_AD-7.4 exam with 99% pass rate.

Fortinet FCP_FAZ_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Device Management: Here, Fortinet network and security analysts are evaluated on their ability to handle devices linked to FortiAnalyzer. This includes adding new devices, managing them efficiently, and troubleshooting communication issues.
Topic 2	<ul style="list-style-type: none">Administration: This section evaluates the ability of network and security analysts to configure administrative access and manage Administrative Domains (ADOMs). It covers tasks such as setting user permissions, managing backups, and disk quotas, and ensuring secure and efficient management of administrative privileges within FortiAnalyzer systems.
Topic 3	<ul style="list-style-type: none">System Configuration: This section assesses the capabilities of network and security analysts in managing FortiAnalyzer systems. It includes tasks like performing initial configurations, setting up high-availability systems, and configuring RAID for storage.
Topic 4	<ul style="list-style-type: none">Logs and Reports Management: This part of the exam measures the candidate's ability to handle log data and generate reports using FortiAnalyzer. Network and security analysts must show proficiency in managing, analyzing, and reviewing logs to ensure effective system monitoring and auditing processes are in place.

FCP_FAZ_AD-7.4 Guaranteed Success | Latest FCP_FAZ_AD-7.4 Real Exam: FCP - FortiAnalyzer 7.4 Administrator

Free demo is available for FCP_FAZ_AD-7.4 training materials, so that you can have a better understanding of what you are going

to buy. Free demo will represent you what the complete version is like. We suggest you try free demo before buying. In addition, FCP_FAZ_AD-7.4 training materials are high quality and accuracy, since we have a professional team to collect the latest information of the exam. Therefore if you choose FCP_FAZ_AD-7.4 Exam Dumps of us, you can get the latest version timely. We provide you with free update version for one year for FCP_FAZ_AD-7.4 training materials.

Fortinet FCP - FortiAnalyzer 7.4 Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

An administrator has configured the following settings:

```
#config system global
  set log-checksum md5-auth
end
```

What is the purpose of executing these commands?

- A. To verify the integrity of the log files received.
- B. To create the secure channel used by the OFTP process.
- C. To record the hash value and authentication code of log files.
- D. To encrypt log transfer between FortiAnalyzer and other devices.

Answer: A

Explanation:

The purpose of executing the provided CLI commands, which include setting the log-checksum to md5-auth, is to ensure the integrity of the log files. This setting is used to record the MD5 hash value of log files, which is a widely used cryptographic hash function that produces a 128-bit (16-byte) hash value. By using MD5 authentication, FortiAnalyzer ensures that the log files have not been altered or tampered with during transit, thereby verifying their integrity upon receipt. This is not related to encrypting log transfers, scheduling reports, or creating secure channels for OFTP (Over-the-FortiGate Protocol) processes.

NEW QUESTION # 38

An administrator has configured the following settings:

```
#config system global
  set log-checksum md5-auth
end
```

What is the purpose of executing these commands?

- A. To verify the integrity of the log files received.
- B. To create the secure channel used by the OFTP process.
- C. To record the hash value and authentication code of log files.
- D. To encrypt log transfer between FortiAnalyzer and other devices.

Answer: C

Explanation:

The command set log-checksum md5-auth configures FortiAnalyzer to generate an MD5 hash for each log file, along with an authentication code. This ensures that the integrity of the logs can be verified, confirming that the logs have not been tampered with.

NEW QUESTION # 39

Which daemon is responsible for enforcing raw log file size?

- A. logfiled
- B. miglogd
- C. oftpd
- D. sqlplugind

Answer: A

NEW QUESTION # 40

What does the disk status Degraded mean for RAID management?

- A. FortiAnalyzer determined that the parity data in the disk is not valid.
- B. The hard drive is no longer being used by the RAID controller.
- C. One or more drives are missing from the FortiAnalyzer unit.
- D. The device is writing data to the disk to restore the volume to an optimal state.

Answer: B

Explanation:

When the RAID status is Degraded, it typically indicates that one or more drives in the RAID array have failed or are missing, causing the RAID array to operate with reduced redundancy. In this state, the array is still functioning, but it's at risk because the fault tolerance provided by RAID is compromised.

NEW QUESTION # 41

Which two purposes does the auto cache setting on reports serve? (Choose two.)

- A. It automatically updates the hcache when new logs arrive.
- B. It provides diagnostics on report generation time.
- C. It reduces the log insert lag rate.
- D. It reduces report generation time.

Answer: A,D

Explanation:
