UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q38-Q43):

NEW QUESTION # 38
Who should be involved in the UAT phase?

- A. RPA Developer, Solution Architect, and Client Business Team
- B. Process Owner. RPA Developer, Business Analyst and Support Team
- C. Support Team, Solution Architect, Business Analyst and Process Owner
- D. Business Analyst. Process Owner, and Subject Matter Expert

Answer: D

Explanation:
During the User Acceptance Testing (UAT) phase, the individuals who should be involved include the Business Analyst, Process Owner, and Subject Matter Expert. This group ensures that the automation meets business requirements, is technically accurate, and adheres to operational needs, which are critical for validating the solution before full deployment.References: UiPath Documentation on UAT at
https://docs.uipath.com/.

NEW QUESTION # 39
What is the purpose of creating an AS IS process map during the business analysis phase for RPA?

- A. To understand the current state of the business process
- B. To evaluate the feasibility of the automation solution
- C. To design the automation solution
- D. To identify potential automation opportunities

Answer: A

Explanation:
The purpose of creating an AS IS process map during the business analysis phase for RPA is to understand the current state of the business process. This mapping is crucial as it provides a detailed visualization of the process as it currently operates, including all steps, decision points, and interactions, which is essential for identifying inefficiencies and areas suitable for automation.
Reference: UiPath Documentation on Business Analysis at https://docs.uipath.com/.

NEW QUESTION # 40
What is the role of UiPath Automation Hub?

- A. Discovers the primary stakeholders of the business processes
- B. Estimates when the business process should be automated
- C. Helps in choosing the members of the RPA development team
- D. Manages and tracks the progress of automation projects

Answer: D

Explanation:
The role of UiPath Automation Hub is to manage and track the progress of automation projects. It acts as a centralized platform where all stakeholders can collaborate, share ideas, and monitor the various stages of automation initiatives, ensuring transparency and efficient management of the automation lifecycle.
Reference: UiPath Documentation on Automation Hub at https://docs.uipath.com/.

NEW QUESTION # 41
As a Business Analyst, what is a recommended action to take once the team has a comprehensive view of the tasks and work towards process automation in an Assisted Task Mining project?

- A. Review the merged trace and fill in beneficial details for the larger group.
- B. Record and upload all the traces.
- C. Request users to record a trace.
- D. Perform the task to be recorded again.

Answer: A

Explanation:

Next Steps After Gaining Comprehensive Task Insights:

After obtaining a detailed view of tasks, the Business Analyst should focus on refining the merged trace to ensure it accurately represents the task. This includes annotating beneficial details to provide clarity for broader use.

Why Option D is Correct:

Reviewing and annotating the merged trace ensures the process documentation is complete, actionable, and aligned with automation goals.

Why Other Options Are Incorrect:

Option A: Re-performing the task is redundant after data has been captured.

Option B: Uploading all traces is not the primary action once a comprehensive view has been achieved.

Option C: Additional recording is unnecessary if sufficient data has already been collected.

NEW QUESTION # 42

As a business analyst, how would you organize the testing effort in UiPath Test Manager?

- A. Create a testing project for each workflow in an RPA project.
- B. Create a testing project for each test result in an RPA project.
- C. Create a testing project for each RPA project.
- D. Create a testing project for each test case in an RPA project.

Answer: C

Explanation:

Organizing Testing Efforts in UiPath Test Manager:

A testing project in UiPath Test Manager is typically created for each RPA project to streamline test management and maintain alignment with the overall automation lifecycle.

Why Option D is Correct:

Grouping tests under a single project for an RPA initiative ensures all test cases, scenarios, and results are organized centrally.

Why Other Options Are Incorrect:

Option A/B/C: Organizing test efforts by individual test results, workflows, or cases would lead to fragmented and inefficient management.

NEW QUESTION # 43
