Free Download 1z0-1080-25 Exam Questions And Answers - Trustable 1z0-1080-25 Exam Tool Guarantee Purchasing Safety

The Oracle 1z0-1080-25 certification exam also enables you to stay updated and competitive in the market which will help you to gain more career opportunities. Do you want to gain all these 1z0-1080-25 certification exam benefits? Looking for the quick and complete Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam dumps preparation way that enables you to pass the Oracle Planning 2025 Implementation Professional in 1z0-1080-25 certification exam with good scores?

By reviewing these results, you will be able to know and remove your mistakes. These 1z0-1080-25 practice exams are created as per the pattern of the 1z0-1080-25 real examination. Therefore, Oracle Planning 2025 Implementation Professional (1z0-1080-25) mock exam takers will experience the real exam environment. It will calm down their nerves so they can appear in the Oracle 1z0-1080-25 final test without anxiety or fear.

1z0-1080-25 Braindumps Pdf & Real 1z0-1080-25 Dumps Free

TrainingDumps is a trusted platform that has been helping Oracle Planning 2025 Implementation Professional 1z0-1080-25 candidates for many years. Over this long time period, countless candidates have passed their Oracle Planning 2025 Implementation Professional 1z0-1080-25 Exam and they all got help from Oracle Planning 2025 Implementation Professional practice questions and easily pass the final exam.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 2	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 3	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 4	• Design business rules and rulesets":his section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 5	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 6	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 7	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.

Topic 8	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 9	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 10	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 11	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 12	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 13	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 14	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 15	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 16	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 17	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 18	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 19	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 20	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 21	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 22	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 23	• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 24	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 25	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.

Topic 26	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.

Oracle Planning 2025 Implementation Professional Sample Questions (Q97-Q102):

NEW QUESTION # 97
Which task must be completed before EPM administrators import a Machine Learning model into Planning?

- A. EPM Administrators create data maps and Groovy rules to move and process data.
- B. EPM Administrators create a data model and push data to it to generate a PMML file.
- C. Data Scientists create Groovy rules designed to evaluate historical data and identify patterns.
- D. Data Scientists build and train the ML model in a data science tool and save it as a PMML file.

Answer: D

Explanation:
Before an EPM (Enterprise Performance Management) administrator can import a Machine Learning (ML) model into Oracle Planning, a prerequisite task must be completed by data scientists. According to Oracle's
"Bring Your Own ML" feature in the Planning application, the process begins with data scientists gathering historical data related to a business problem, training an ML algorithm, and generating a Predictive Model Markup Language (PMML) file using a third-party data science tool or Oracle Data Science Cloud. This PMML file represents a fully trained ML model that can then be imported into the Planning application by an EPM administrator.
Option A is correct because it aligns with this prerequisite step: the ML model must be pretrained and saved as a PMML file before the import process can begin. Option B is incorrect because Groovy rules are not created by data scientists to evaluate historical data; instead, these rules are automatically generated by the Planning application during the import process to integrate the ML model with the application. Option C is also incorrect, as EPM administrators do not generate PMML files by creating data models and pushing data- instead, they import an existing PMML file. Finally, Option D is incorrect because while EPM administrators may create data maps and Groovy rules as part of the deployment process, this occurs after the PMML file is imported, not before.
The Oracle Planning 2024 Implementation documentation emphasizes that the "Bring Your Own ML" functionality relies on importing a prebuilt PMML file, making the data scientists' role in building and training the model a mandatory first step.

NEW QUESTION # 98
Which client requirement aligns with using a custom BSO plan type along with or in place of the Workforce module?

- A. The Operations department requires a more granular level of detail than the Sales department in the Entity dimension.
- B. Because of sparse dimensionality, aggregation times are slow in the Workforce module.
- C. The client would like to plan salary by Position.
- D. The client requires more than three custom dimensions.
- E. The client has 10 dimensions in the application and needs to report at each intersection.

Answer: B

NEW QUESTION # 99
Which Planning feature or component enables you to create, validate, deploy, and launch business rules?

- A. Calculation Manager
- B. Validation Rules Editor
- C. Data Integration
- D. Member Formulas

Answer: A

NEW QUESTION # 100

Which two permissions are assigned when a model is first created in Strategic Modeling?

- A. Owner permissions
- B. Default permissions
- C. Power User permissions
- D. Viewer permissions

Answer: A,B

NEW QUESTION # 101

Which three are Navigation Flow customization categories?

- A. Global
- B. Group
- C. User
- D. Role
- E. Artifact

Answer: A,B,D

Explanation:

In Oracle Planning 2024, Navigation Flows can be customized to tailor the user interface and experience based on specific categories. The three customization categories supported are Role, Group, and Global:

* A. Role: Navigation Flows can be customized for specific user roles (e.g., Planner, Administrator), allowing different layouts or access to cards based on job functions.

* C. Group: Customization can be applied to user groups, enabling administrators to assign tailored navigation flows to predefined sets of users based on their team or department.

* E. Global: Global customization applies to all users across the application, serving as the default navigation flow unless overridden by Role or Group settings.

* B. User: This is incorrect because Oracle Planning does not support navigation flow customization at the individual user level-customizations are broader, targeting roles or groups.

* D. Artifact: This is incorrect because "Artifact" refers to application components (e.g., forms, rules) managed in migration, not a category for navigation flow customization.

The Oracle documentation confirms that Role, Group, and Global are the three levels at which navigation flows can be customized, providing flexibility in how users interact with the Planning application.
