

# Quiz 2026 Nutanix Fantastic NCP-EUC Accurate Study Material

P.S. Free & New NCP-EUC dumps are available on Google Drive shared by Pass4SureQuiz: <https://drive.google.com/open?id=1w1sGlzaX2XZfllIKanMJ4Q3EoVcIdZjDC>

Our NCP-EUC exam guide question is recognized as the standard and authorized study materials and is widely commended at home and abroad. Our NCP-EUC study materials boost superior advantages and the service of our products is perfect. We choose the most useful and typical questions and answers which contain the key points of the test and we try our best to use the least amount of questions and answers to showcase the most significant information. Our NCP-EUC learning guide provides a variety of functions to help the clients improve their learning and pass the NCP-EUC exam.

## Nutanix NCP-EUC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Given a scenario, determine resource utilization of a specific virtual desktop or groups of desktops</li> <li>Architect a Nutanix EUC Implementation</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Demonstrate optimal AOS configurations to support an EUC implementation</li> <li>Describe the features and architecture of a DaaS environment</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Given business requirements, determine an appropriate EUC configuration</li> <li>Troubleshoot, Optimize, and Scale a Nutanix EUC Implementation</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Demonstrate an understanding of gold images</li> <li>Describe the Role of Desktop as a Service (DaaS) in a Nutanix EUC Solution</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Demonstrate an understanding of the properties of Citrix, Horizon, and Nutanix Solutions</li> <li>Configure and Operate a Nutanix EUC Environment</li> </ul>

Nutanix Certified Professional - End-User Computing (NCP-EUC) certification exam is a highly sought after credential in the IT

industry. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is designed for IT professionals who specialize in end-user computing and virtual desktop infrastructure (VDI). NCP-EUC Exam focuses on testing the candidate's knowledge and skills in deploying, managing, and troubleshooting Nutanix VDI solutions. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is a testament to the candidate's expertise in designing and implementing VDI solutions using Nutanix infrastructure.

## Marvelous NCP-EUC Exam Questions: Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Demonstrate Latest Training Quiz - Pass4SureQuiz

By seeing your goofs you can work on your show continually for the Nutanix NCP-EUC approach. You can give vast phony tests to make them ideal for Nutanix NCP-EUC and can check their past given exams. Nutanix NCP-EUC Dumps will give reliable free updates to our clients generally all the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam.

### Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q132-Q137):

#### NEW QUESTION # 132

An administrator has created a Prism Central Playbook Action named Virtual Desktop Add CPU to add 2 vCPU to virtual desktop when an alert is triggered after the virtual desktop's CPU usage has exceeded 80%.

Initially the Playbook Action works as expected, however over time it seems it is no longer being triggered.

What is causing this issue?

- A. The vNUMA boundary has been breached preventing more vCPUs to be added.
- B. There are no more CPUs available to allocate to the VM.
- C. Additional vCPUs need to be registered.
- **D. The virtual desktop CPU Usage alerts were not cleared.**

**Answer: D**

Explanation:

<https://next.nutanix.com/community-blog-154/new-x-play-actions-in-prism-central-2021-7-40005> The Prism Central Playbook Action is a tool that allows you to automate tasks based on triggers, such as events, alerts, or webhooks. You can define a series of actions (called a playbook) that perform operations on your infrastructure, such as adding or reducing resources on a VM2.

To use the Playbook Action for VMs, you need to meet some prerequisites, such as:

The Prism Central version must be 2020.11 or later.

The AOS version must be 5.15 LTSR or later.

The hypervisor must be AHV or ESXi.

The VMs must have Nutanix Guest Tools (NGT) installed and enabled3.

One of the possible reasons why the Playbook Action is no longer being triggered is that the virtual desktop CPU Usage alerts were not cleared. According to the Prism Central guide3, "If an alert has been triggered once and has not been cleared yet, then it will not trigger any action again until it has been cleared". Therefore, if the CPU Usage alert remains active for a virtual desktop, it will prevent the Playbook Action from adding more vCPUs to it.

#### NEW QUESTION # 133

What Flow Network Security function is a schema of rules for specifying/enforcing a desired behavior and has one or more policies?

- A. Category set2
- B. Category1
- **C. Security policy model3**
- D. Security policy

**Answer: C**

Explanation:

In the terminology of Flow Network Security Next-Gen (FNS NG), the components are defined as follows:

\* Security Policy Model: Defined as "A schema of policies for specifying and enforcing a desired behavior.<sup>4</sup> A Policy Model will have one or more policies."<sup>5</sup> This model provides the framework (such as Application, Isolation, or Quarantine) within which specific policies are created.

\* Security Policy: Defined as a "collection of security rules and assets [entities, endpoints, categories, applications, etc.] on which the rules have to be enforced together."<sup>6</sup> Therefore, the function that acts as the overarching schema and contains "one or more policies" is the Security Policy Model.<sup>7</sup>

#### NEW QUESTION # 134

The administrator has checked the logs to see the below output:

The API call sent to the VM via XD Plugin at [CDF logs]:

□ Following that while the VM is being powered OFF, query for the current VM state results in ON (the administrator sees a number of these until the VM is marked as power OFF) logs]:

□ Upon further review the administrator notices in COF logs, after a number of queries for the machine state, one results in a conflicting state, reporting the Power state as ON and OFF [CDF logs] HCM should the administrator resolve the issue?

- A. Increase the distribution time in Machine Update Rollout
- **B. Create a Scheduled reboot cycle.**
- C. Decrease the distribution time in Machine Update Rollout
- D. Delete Scheduled reboot settings

**Answer: B**

#### NEW QUESTION # 135

An administrator needs to configure a VM with UEFI. When attempting to boot the VM via PXE in a Nutanix cluster using Nutanix IPAM, the VM fails to boot.

What is the most likely cause of this failure?

- **A. SDM boot ISO is required with UEFI.**
- B. The VM has insufficient memory.
- C. The VM is using a SATA controller.
- D. UEFI boot requires manual MAC assignment.

**Answer: A**

Explanation:

When using Nutanix IPAM (Managed Network) for DHCP, the built-in DHCP service has limitations regarding UEFI PXE boot support (specifically regarding the dynamic delivery of architecture-specific boot files like bootx64.efi vs undionly.kpxe).

To successfully provision UEFI VMs in this scenario-particularly for Citrix Provisioning Services (PVS)- the BDM (Boot Device Manager) ISO (referred to here as SDM boot ISO due to common industry acronym variance in exam banks) is required. The BDM ISO allows the VM to boot directly from a virtual CD-ROM that contains the bootstrap information needed to contact the provisioning server, bypassing the limitations of the IPAM PXE implementation for UEFI workloads.

#### NEW QUESTION # 136

An administrator needs to deploy virtual desktops to a Hyper-V Nutanix cluster with writable differencing disks, The administrator will use read only master image with clones that link back to the image.

Which native feature will the cluster use to complete this task?

- A. VM Flash Mode
- B. Compression
- **C. Shadow Clones**
- D. Oplog

**Answer: C**

Explanation:

The feature in Nutanix that would be used to complete the task of deploying virtual desktops to a Hyper-V Nutanix cluster with writable differencing disks using a read-only master image with clones that link back to the image is Shadow Clones. Shadow

Clones allow for the creation of a snapshot or a clone of a VM that uses the original VM's disks as read-only, and only writes changes to a separate differencing disk. This is useful when deploying virtual desktops as it can reduce storage requirements and improve performance.

Nutanix shadow clones are a feature that enables distributed caching of virtual disks (vDisks) that are in a multi-reader scenario. This can improve performance and reduce network traffic for scenarios such as VDI or private clone boot storms

**NEW QUESTION # 137**

.....

As we all know, if you get a NCP-EUC certification in a large company, you will have more advantages no matter you apply for jobs or establish some business. With a NCP-EUC certification, you can not only get a good position in many companies, but also make your financial free come true. Besides, you can have more opportunities and challenge that will make your life endless possibility. We promise you that NCP-EUC Actual Exam must be worth purchasing, and they can be your helper on your way to get success in gaining the certificate. So why not have a detailed interaction with our NCP-EUC study material?
