D . "ERROR2"

- A. "END"
- B. Validation Error
- C. "ERROR1"
- D. "ERROR2"

Answer: D

NEW QUESTION # 26
Refer to the exhibits.
The Set Payload transformer's value is set to {'year':'2020'}.
What message value should be added to the Logger component to output the message 'The year is 2020', withouthardcoding 2020?

- A. The year is #[payload.year]'
- B. #["The year is "++ payload.year].
- C. '#[The year is $(pay load .year)]*
- D. '#[The year is " + paytoad.year]'

Answer: B

NEW QUESTION # 27
What is the correct Syntax to add a customer ID as a URI parameter in the HTTP listener's path attribute?

- A. {customerID}
- B. $[customerID]
- C. (customerID)
- D. #[customerID]

Answer: A

Explanation:
URL parameters are always accessed using { } like => {customerID}

NEW QUESTION # 28

Refer to exhibits.

□

In the execution of the Scatter-Gather , the flow route completes after 10 seconds and the flow2 route completes in 40 seconds. How many seconds does it take for the Scatter-Gather to complete?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Scatter-Gather sends the event to each routes concurrently. Hence both route in this example will start in parallel. So total time to complete processing is 40 seconds The Scatter-Gather component is a routing event processor thatprocesses a Mule event through different parallel processing routes that contain different event processors. Each route receives a reference to the Mule event and executes a sequence of one or more event processors. Each of these routes uses a separate thread to execute the event processors, and the resulting Mule event can be either the same Mule event without modifications or a new Mule event with its own payload, attributes, and variables. The Scatter-Gather component then combines the Mule events returned by each processing route into a new Mule event that is passed to the next event processor only after every route completes successfully.

The Scatter-Gather component executes each route in parallel, not sequentially. Parallel execution of routes can greatly increase the efficiency of your Mule application and may provide more information than sequential processing.
