High PEGACPSA24V1 Passing Score | PEGACPSA24V1 Questions

Pegasystems Certified Pega System Architect 24 Sample Questions (Q301-Q306):

NEW QUESTION # 301
Which relationship type should be used when multiple data objects relate to multiple cases?

- A. One-to-One
- B. One-to-Many
- C. Many-to-Many
- D. Parent-Child

Answer: C

Explanation:
A Many-to-Many relationship allows multiple data objects to be linked across multiple cases. For example, multiple employees can be assigned to multiple projects. This setup ensures efficient data sharing and avoids redundant entries. It is commonly used in resource management and product cataloging.

NEW QUESTION # 302
Which UI feature allows dynamically adding and removing fields in a form?

- A. SLA Recalculation
- B. Work Queue Processing
- C. Case Assignment
- D. Dynamic Repeat Grid

Answer: D

Explanation:
A Dynamic Repeat Grid allows users to add, modify, or remove rows of data dynamically. This is commonly used for entering multiple addresses, line items, or contact details. SLA recalculation, work queue processing, and case assignment do not provide dynamic UI updates.

NEW QUESTION # 303
Which two options allow adding fields to a case type? (Choose Two)

- A. Work Queue Settings
- B. Case Designer
- C. SLA Adjustment
- D. Data Model

Answer: B,D

Explanation:
Fields can be added via the Case Designer (for UI-driven fields) or the Data Model (for property-based fields). These ensure that cases capture the necessary information for processing. SLA adjustments and work queues do not control case fields.

NEW QUESTION # 304
Which two factors determine whether a case needs additional approvals before completion? (Choose Two)

- A. Compliance Requirements
- B. SLA Urgency Level

- C. Business Rules
- D. Case Creation Date

Answer: A,C

Explanation:
Business Rules define conditions under which approvals are required, ensuring workflow consistency.
Compliance Requirements mandate approvals in regulated industries, such as finance or healthcare.
These factors prevent unauthorized decisions and enhance security. SLA urgency and case creation date do not directly trigger approvals.

NEW QUESTION # 305
Which two rule types allow defining business logic conditions? (Choose Two)

- A. SLA Case Tracker
- B. Decision Trees
- C. Work Queue Escalation
- D. When Rules

Answer: B,D

Explanation:
When Rules define conditions that trigger rule execution, while Decision Trees allow multi-step decision- making. These ensure flexible and automated business processes. SLA tracking and work queue escalations do not define business logic.

NEW QUESTION # 306

......

It is the right time to think about your professional career. The right path is to enroll in Certified Pega System Architect 24 PEGACPSA24V1 certification and start preparation with the assistance of Pegasystems PEGACPSA24V1 PDF dumps and practice test software. The Pegasystems PEGACPSA24V1 PDF Questions file and practice test software both are ready to download. Just pay an affordable Pegasystems PEGACPSA24V1 exam dumps charge and download files and software.

High PEGACPSA24V1 Passing Score: https://www.passleadervce.com/Pega-CSA/reliable-PEGACPSA24V1-exam-learning-guide.html

"I never thought I would pass Pegasystems High PEGACPSA24V1 Passing Score exam during the first attempt and sadly I didn't, Pegasystems PEGACPSA24V1 Valuable Feedback Also this helps you to get an idea about the real exam's, I am glad to introduce a secret weapon for all of the candidates to pass the exam as well as get the related certification without any more ado-- our PEGACPSA24V1 study materials, Pegasystems PEGACPSA24V1 Valuable Feedback Latest exam collection materials guarantee you 100% pass.
